Perambulators Jan Swift,Geoff Swift,2011-11-20 A complete illustrated history of the British wheeled baby carrier, from the eighteenth century to the end of the classic pram era, this book is a nostalgic trip down memory lane, and an invaluable resource for any owner or collector of historic prams. Examining and illustrating the design and development of full-size prams, this book details the technological changes that affected pram design, and the rise in popularity of the pram. In an intriguing final section the author goes on to examine the designs of children's toy prams, which were perfect miniature versions of the full-sized prams. These miniature prams kept pace with the design changes of the full-sized prams, and this section will be especially interesting for toy collectors.

The Pram Diet Rebecca Mugridge,2011-05-02 The inspirational journey of a mum who turned her life around with one simple thing: her baby's pram! Overweight and miserable after the birth of your baby? The Pram Diet offers inspiration, hope and realistic, practical tips from a mum who turned her life around with one simple thing: her baby's pram. Many mothers with new babies find it hard to lose weight after their child is born. Sometimes it's because they lack the time to prepare nourishing food for themselves or to exercise. Sometimes it's because they're suffering from postnatal depression. Rebecca Mugridge understands - following the birth of her first child she was overweight and unhappy, and at a loss to do anything about it. Then one day she put her baby in the pram and went for a walk. Several months and a lot of pram-walking later, she had lost 30 kgs and found a new lease of life, as well as a passion to help other mums.

The Ultimate Theory of the Universe Pram Nguyen,2003-12-10 Modern scientists are on the verge of crises for new guidance for their research in the 21st century because of new technologies, which have shed light on new discoveries that contradict with the Standard Model and the Big Bang theory. The Ultimate Theory of the Universe not only explains the structure of the cosmos, but also the spiritual facet that the 20th century science has never studied in depth. This book may be used as guidance for both scientists and ordinary people to live a meaningful life. REASONS YOU SHOULD OWN THE ULTIMATE THEORY OF THE UNIVERSE (THE LINK BETWEEN SCIENCE AND BUDDHISM FOR BETTER LIVING ON EARTH IN THE 21ST CENTURY) New Guidance for Research in the Twenty-First Century New Book Boldly Fuses Science, Religion, and Philosophy * The only complete source of information on Buddhism and modern science * Revealed in innovative new concepts on space and time measurements! * Get expert guidance on searching for the truth * Practical solutions to tough human problems * Everything you need to discover the latent potentialities within you and your environment! A COMPREHENSIVE REFERENCE EXPLORING A BROAD SPECTRUM OF LIFE AND THE UNIVERSE No God, no Brahma can be found, No mater of this wheel of life, Just bare phenomena roll Dependent on conditions all! Visuddhimagga Unlike an animal, man requires more than mere physical comfort and needs help to cope with his frustration and miseries arising from his daily experience. We seem to have an instinctive urgent to seek the Truth, but somehow lack the capacity to find it. The dilemma of trying to set up an absolute standard is merely one of the many puzzles that have harassed mankind since the dawn of civilization. Mans search for Truth has been a never-ending obsession. The Ultimate Theory of The Universe is a bridge between modern science and Buddhism. The author had tried to use Buddhism as a compass for the people of the 21st century. It seeks to answer major questions about Buddhism relation to modern science. ARRANGED INTO THIRTEEN COMPREHENSIVE SECTIONS It isnt fair to say that despite all the scientific progress achieved and the advantages conferred on man, science leaves the inner world basically unchanged. It has only heightened mans feeling of dependence and insufficiency, and has barely scratched the surface of mans inner world. Modern scientists are on the verge of crises for new guidance for their research in the 21st century because of new technologies, which have shed light on new discoveries that contradict with the Standard Model and the Big Bang theory. In addition to its failure to bring security to mankind, science has also made everyone feel even more insecure by threatening the world with the possibility of wholesale destruction. On the other hand, it is not difficult to understand that many of the views held in many religions regarding the cosmos and life are just

conventional thoughts of which have long been superseded. It is a general truth to say that religions have greatly contributed to human development and progress. They have laid down value and standards and formulated principles to guide human life. But, for all the good they have done, religions can no longer survive in the modern scientific age if the followers insist on imprisoning truth into set forms and dogmas, on encouraging ceremonies and practices which have been depleted of their original meaning. Technology has pushed us to the brink of advancement. But the new discoveries and achievements in science are contradicting to the accepted classic theories of today. This conflict calls for a new platform of alignment to guide the world to

Bread, Jam and a Borrowed Pram Dot May Dunn,2011-09-01 The compelling and heartwarming story of a young nurse's life and work in 1950s England from the SUNDAY TIMES bestselling author. Three small children peep out, their eyes watching me from beneath tousled but clean hair. Their clothes seem to have been put on their bodies to cover them rather than to fit them, none wears shoes. Two older girls stand by a table, the only piece of furniture I have seen in the house, apart from a rickety pram, which now stands in the doorway. The crumbling remains of a loaf of bread are being coated with jam, and eager fingers await them... It's the end of the 1950s and Britain is changing. The war's long shadow is fading and while the country gets ready for the swinging sixties, Dot is embarking on an adventure of her own. After qualifying as a midwife, young Dot has taken a job as a health visitor in the back streets of Birmingham. There, she's not just responsible for the babies brought into this world, but an army of toddlers, tykes and tots who all need a helping hand. For Dot it will be a heartrending journey - trying to help families with next to nothing, sharing the struggles of young mums and discovering how the spirit of the community can overcome the toughest of circumstances.

Staging a Revolution Kath Kenny,2022-09-01 Claire Dobbin, Helen Garner, Evelyn Krape, Jude Kuring and Yvonne Marini mocked the ocker character beloved by Pram Factory playwrights, and performed monologues about men, sex, and how they felt as a woman. Directed by Kerry Dwyer and produced by the Carlton Women's Liberation group, the play's frank revelations stunned audiences and shocked the Pram Factory world. Set against a backdrop of moratorium marches, inner-city cafes and share houses, and the rising tide of sexual liberation and countercultural movements, Kath Kenny uses interviews and archival material to tell the story of Betty Can Jump. On the 50th anniversary of this ground-breaking play, she considers its ongoing impact on Australian culture, and asks why the great cultural renaissance of women's liberation has been largely forgotten. She sets out her stake in this story, as a theatre reviewer today and as a child born into the revolutionary early 1970s. And she asks why feminism keeps getting stuck in mother-daughter battles, rethinking her own experience as a young feminist who clashed with Garner over the publication of *The First Stone*.

Origin of the Optimist Pram Clifford McKay, Jr.,2020-08-31 The story of a small sailboat that in 70 years is raced in 126 countries on 6 continents by millions of boys and girls, a boat in which 83% of Olympic Sailors trained, a story told by one who was there from the very beginning, supported by original historical sources. The idea for the Optimist Pram originated in the mind of Major Clifford McKay who in 1947 proposed to the

Clearwater, FL Optimist Club, a small, inexpensive, boat sponsored by local merchants so all boys and girls could sail. Clarke Mills, recent inductee into the National Sailing Hall of Fame, designed the boat and built many of the early ones. Axel Damgaard took one to Denmark, modified the rig slightly and renamed it the Optimist Dinghy, or Opti as it's popularly known today. The author, Clifford McKay Jr, the boy whose interest in sailing sparked his father's idea to make sailing possible to all the boys and girls of the town, carefully reports his memories, supported by newspaper reports and other historical documents from the time. The Origin of the Optimist Pram, written by Clifford McKay Jr, was originally published as a supplement to The Optimist Dinghy 1947-2007, by Robert Wilkes with Clifford McKay Jr.
