[Apollo 11](#) Ian Passingham,2019-06-30 A day-by-day account of the 1969 Apollo 11 Moon Landing—from launch prep to the crews’ return to Earth—by the author of 66: The World Cup in Real Time. Half a century has passed since arguably the greatest feat of the twentieth century: when Neil Armstrong became the first man to walk on the moon. Apollo 11: The Moon Landing in Real Time brings the mission back to life as never before in a thrilling day-by-day account, exploring everything from the historic flight itself to how the \$24-billion space program divided a nation. Journey back in time and feel the excitement build in the days before launch, and then experience the tension of the dramatic lunar landing and the relief of the crew’s safe return to Earth. This engaging account mixes easily understandable explanations of the groundbreaking technology behind Apollo 11 with entertainment, excitement, and humor in equal measure. Set against a backdrop of the Cold War, race riots, and the Vietnam War, the mission polarized opinion worldwide. Alongside these issues, read long-forgotten tales including how a Chilean lawyer claimed he was the legal owner of the moon, thousands of people signed up for proposed commercial moon flights, Hilton revealed plans for a lunar hotel, “flat Earth” believers claimed the mission was a hoax, and some scientists feared the astronauts would bring back deadly germs from space which would devastate mankind. “A most enjoyable read.” —Quest: The History of Spaceflight Quarterly

[The Chicago Guide to Landing a Job in Academic Biology](#) C. Ray Chandler,Lorne M. Wolfe,Daniel E. L. Promislow,2008-09-15 The Chicago Guide to Landing a Job in Academic Biology is an indispensable guide for graduate students and post-docs as they enter that domain red in tooth and claw: the job market. An academic career in the biological sciences typically demands well over a decade of technical training. So it’s ironic that when a scholar reaches the most critical stage in that career—the search for a job following graduate work—he or she receives little or no formal preparation. Instead, students are thrown into the job market with only cursory guidance on how to search for and land a position. Now there’s help. Carefully, clearly, and with a welcome sense of humor, The Chicago Guide to Landing a Job in Academic Biology leads graduate students and postdoctoral fellows through the perils and rewards of their first job search. The authors—who collectively have for decades mentored students and served on hiring committees—have honed their advice in workshops at biology meetings across the country. The resulting guide covers everything from how to pack an overnight bag without wrinkling a suit to selecting the right job to apply for in the first place. The authors have taken care to make their advice useful to all areas of academic biology—from cell biology and molecular genetics to evolution and ecology—and they give tips on how applicants can tailor their approaches to different institutions from major research universities to small private colleges. With jobs in the sciences ever more difficult to come by, The Chicago Guide to Landing a Job in Academic Biology is designed to help students and post-docs navigate the tricky terrain of an academic job search—from the first year of a graduate program to the final negotiations of a job offer.

[Dreadful Lady over the Mekong Delta](#) Bob Howe,2023-04-19 Dreadful Lady over the Mekong Delta looks at the men of No 2 Squadron and the operations they flew in the Vietnam War in their Canberra bombers. From April 1967, the Squadron spent four years attacking enemy targets, many of them in the Mekong Delta region, and contending with the politics, weather, and ‘fog’ of war. The riverine operations supported by No 2 Squadron were but a small part of an allied effort to disrupt the enemy’s movement of troops and supplies to locations in South Vietnam. It was, according to one commentator, ‘a kind of guerrilla warfare conducted in a navy environment’. Bob Howe arrived in Vietnam in 1969 as a youthful Canberra navigator/bomb-aimer, but much of his time was spent as a specialist in bombing operations. His time there provided him with the firsthand experience and detailed information to write this book. This book in its original format was first published in 2016 by the RAAF’s Air Power Development Centre, filling a gap in the recording of the RAAF’s operations in Vietnam. It also describes how crews overcame the difficulties of operating in an intense Asian war in an aircraft that was designed for a completely different environment. This new edition is intended to bring the experiences and exploits of Bob Howe, No 2 Squadron and its Canberra bomber aircraft to life for a new generation of reader.

📖 *Disney Stories* Newton Lee,Krystina Madej,2012-04-26 Disney Stories: Getting to Digital explores how Disney, the man and the company, used technological innovation to create characters and stories that engage audiences in many different media, in particular in video games and on the internet. Drawing on Disney films from the twenties and thirties, as well as the writings of historians, screenwriters and producers, Disney Stories: Getting to Digital explains how new film and animation techniques, many developed by Disney, worked together to evolve character and content development and produce entertaining stories that riveted audiences. Through an insider’s perspective of Disney’s legendary creation process, the book closely examines how the Disney Company moved its stories into the digital world in the 1990s and the virtual, online communities of the 2000s. By embracing the digital era, Disney led storytelling and technological innovation by granting their audience the unique opportunity to take part in their creation process through their online games, including The Lion King Animated Story Book, Disney Blast and Toontown. Disney Stories: Getting to Digital is intended for Disney fans and current practitioners looking to study the creation process of one of the most famous animation studios in existence. Professors teaching courses in new media, animation and interactive storytelling will also find this book a valuable asset.
