Russian Strategic Nuclear Forces Oleg Bukharin, Frank Von Hippel, 2004 A comprehensive databook of technical and institutional facts about the Soviet and Russian nuclear arsenal.

**Russian/Soviet Submarine Launched Ballistic Missiles: Nuclear Deterrence/Counter Force Strike** Hugh Harkins, 2018-02-04 In 2017, the sea based element of the Russian Federation nuclear deterrent triad was well advanced in its modernisation with the introduction of Project 955 Borey Strategic Missile Carrier submarines armed with the RMS-56 Bulava submarine launched ballistic missile. The Project 955/Bulava was introduced as a replacement for the Project 677BDR Strategic Missile Carrier submarines armed with R-29RKU-1/2 ballistic missiles and the Project 667BDRM Strategic Missile Carrier submarines armed with R-29RMU1/2/2.1 ballistic missiles. The Project 677BDR was on the verge of retirement whilst the Project 667BDRM was set to serve, in reducing numbers, well into the third decade of the twenty first century and possibly beyond, with an upper out of service date of 2030. The sole operational Project 941U Akula Heavy Ballistic Missile (Submarine) Cruiser remained in service in an operational/trials role with no out of service date announced by the Ministry of Defence of the Russian Federation. The Russian Federation was the major successor state from the dissolution of the Soviet Union in December 1991. This latter state introduced the world's first submarine launched ballistic missile and submarine based ballistic missile platform to service in 1959, sowing the seeds for four plus generations of missile submarines in Soviet and latter Russian Federation service. It was not, however, until the introduction of the Project 667A, armed, from 1968, with R-27 ballistic missile, that such submarine platforms began to be referred to as Strategic

Missile Carriers. The Project 667A was the template for four more Strategic Missile Carrier designs - the Project 667B/BD/BDR/BDRM armed with increasingly capable intercontinental range ballistic missiles of the R-29/R/RK/RM series. These systems were, from 1983, augmented by the Project 941/U Heavy Ballistic Missile (Submarine) Cruisers armed with the R-39/U - the largest and most powerful ballistic missile ever fielded on a submarine launch platform. This volume sets out to document the four generations of Soviet and later Russian Federation submarine launched ballistic missiles carried on the four generations of conventional and nuclear powered ballistic missiles submarines that have served the Soviet and Russian Federation Northern and Pacific fleets since 1959. All technical and historical information has been furnished by the respective design bureaus, manufacturers and the Ministry of Defence of the Russian Federation with additional input from western intelligence agencies.

**The Future of the Ballistic Missile Submarine Force in the Russian Nuclear Triad - Report on SSBN Force, Delta, Typhoon, Borey Subs, ICBM and Cruise Missile Competition, ALCM, Topol, Bombers, Bear U.** S. Military, Department of Defense (DoD), U. S. Navy (USN), U. S. Government, 2017-10-29 This unique study analyzes the current status of the Russian Federation's ballistic missile submarine force. It reviews the history of the ballistic missile submarine force, its current status, and the implementation of plans currently in progress and as well as the advantages and disadvantages of maintaining a ballistic missile submarine force. This thesis also assesses the other two legs of the nuclear triad - the intercontinental ballistic missiles (ICBMs) and long range bomber aircraft. The status of these two forces and their operational advantages and disadvantages are compared with those of the ballistic missile submarine force.

Also examined are the financial and political factors that may affect the prospects of the ballistic missile submarine force. This includes arms control treaties that may affect the force structure. Current and prospective energy prices suggest that the economy of the Russian Federation will be able to provide long term financing for the ballistic missile submarine force and Moscow's other strategic nuclear forces. This thesis concludes that the ballistic missile submarine force is a vital part of the Russian Federation's nuclear triad and will probably be maintained over the next 15 years and beyond.

CHAPTER V The purpose of this thesis is to analyze

factors that may shape the future of Russia's nuclear ballistic missile submarine (SSBN) force. The objective is to reach informed judgments as to whether and to what extent the SSBN force will be able to survive in Russia in light of budget constraints, evolving political and strategic priorities, and competition from bomber aircraft and land-based missiles. One of the key issues is to what extent maintaining ballistic missile submarine capabilities is beneficial to the Russian Federation (RF). Will Russian decision makers abandon the SSBN force in favor of more reliable and financially affordable assets? This thesis examines the characteristics of the SSBN force, including stealth, command and control, maintenance concerns, survivability, and capabilities, and then analyzes its merits and shortcomings. Operational and deterrence mission competition from land- and air-based platforms is examined to assess their role in the future of Russia's nuclear arsenal. Finally, budgetary competition from the rest of the navy is considered as yet another factor that may affect the prospects of the SSBN force.

**Russian Strategic Modernization** N. N. Sokov, 2000 This unique analysis of Soviet and Russian defense affairs provides an authoritative and thoroughly documented assessment from a former Soviet foreign policy insider. As an active and informed participant, Sokov's discussion of the evolution of the Soviet and Russian strategic posture offers fascinating and illuminating firsthand insights into Soviet weapons systems, elite decisionmaking, and bureaucratic politics during both the Soviet and Russian periods. The book thus casts light not merely on the development of the Soviet ICBM and SLBM programs, but on a much broader spectrum of issues linked to Soviet and Russian security policy formulation. With its combination of informed analysis and use of new documentation, this work will be invaluable for all concerned with U.S.-

Russian strategic relations.

**Cold War Submarines** Norman Polmar, Kenneth J. Moore, 2014-05-14 Submarines had a vital, if often unheralded, role in the superpower navies during the Cold War. Their crews carried out intelligence-collection operations, sought out and stood ready to destroy opposing submarines, and, from the early 1960s, threatened missile attacks on their adversary's homeland, providing in many respects the most survivable nuclear deterrent of the Cold War. For both East and West, the modern submarine originated in German U-boat designs obtained at the end of World War II. Although enjoying a similar technology base, by the 1990s the superpowers had created submarine fleets of radically different designs and capabilities. Written in collaboration with the former Soviet submarine design bureaus, Norman Polmar and K. J. Moore

authoritatively demonstrate in this landmark study how differing submarine missions, antisubmarine priorities, levels of technical competence, and approaches to submarine design organizations and management caused the divergence.

*Encyclopedia of the Cold War* Ruud van Dijk,William Glenn Gray,Svetlana Savranskaya,Jeremi Suri,Qiang Zhai,2013-05-13 Between 1945 and 1991, tension between the USA, its allies, and a group of nations led by the USSR, dominated world politics. This period was called the Cold War – a conflict that

stopped short to a full-blown war. Benefiting from the recent research of newly open archives, the Encyclopedia of the Cold War discusses how this state of perpetual tensions arose, developed, and was resolved. This work examines the military, economic, diplomatic, and political evolution of the conflict as well as its impact on the different regions and cultures of the world. Using a unique geopolitical approach that will present Russian perspectives and others, the work covers all aspects of the Cold War, from communism to nuclear escalation and from UFOs to red diaper babies, highlighting its vast-ranging and lasting impact on international relations as well as on daily life. Although the work will focus on the 1945–1991 period, it will explore the roots of the conflict, starting with the formation of the Soviet state, and its legacy to the present day.
