Florence and its University during the Early Renaissance Jonathan Davies,2021-10-25 This book makes a substantial contribution to the study of Florentine history. It answers an important but hitherto unresolved question: why did the Florentine Republic keep a university in its capital city between 1385 and 1473 rather than follow the example of other Italian states in maintaining a university in a subject town? Based on a wide range of newly-found sources, it discloses that the University owed its survival to the support of the Florentine elite, especially the Medici family and its followers. It reveals systematically the close ties between the University and major developments in the social, economic, political, ecclesiastical, and cultural life of Florence and Florentine Tuscany. The appendices fill some of the greatest gaps in our knowledge of the University, identifying administrators, students, examiners, and teachers.

Innovation Communities Klaus Fichter,Severin Beucker,2012-01-03 Self-organising networks have become the dominant innovators of complex technologies and radical innovation. The growing need for co-operation to ensure innovation success calls for a broader understanding of what makes innovation projects successful and requires new concepts. The book introduces the new concept of "innovation communities", defining them as informal networks of like-minded individuals who act as innovation promoters or champions. These key figures come from various companies and organisations and will team up in a project-related fashion, jointly promoting a certain innovation, product or idea either on one or across different levels of an innovation system. The publication presents findings from surveys that demonstrate that networks of champions are a success factor in radical innovation. Five case studies of noteworthy innovation projects illustrate why the collaboration of champions can make innovation projects more successful. Furthermore, the book presents hands-on methods and includes best-practice cases and guidelines on how to develop innovation communities. This publication comprises empirical findings and practical experiences that are valuable for the following groups in particular: Entrepreneurs; Innovation, R&D, and network managers; Innovation and strategy consultants; Innovation and start-up intermediaries; Innovation researchers; Government officials and politicians responsible for R&D and innovation programmes and funding

Molecular Genetics Herbert Taylor,2012-12-02 Molecular Genetics, Part III: Chromosome Structure explores the structure and modification of DNA, chromatin, and higher order organization and possible subunits of chromosomes at the molecular level. It describes major changes in concepts of chromatin structure and packaging of DNA based on studies of nuclease digests and electron micrographs; the role of restriction endonucleases in molecular genetics; the involvement of DNA topoisomerases in concerted breaking and rejoining of DNA backbone bonds; enzymatic methylation of DNA; and transcriptional units in eukaryotic chromosomes. Organized into seven chapters, this volume begins with an overview of the general properties of type I and type II restriction enzymes, basic aspects of restriction enzyme technology, and applications of restriction enzyme technology to the

study of chromosome structure and function. It then discusses recombinant DNA technology; possible biological roles of DNA topoisomerases; recognition and control sequences in nucleic acids; composition and substructure of nucleosomes; analysis of chromosome fibers by electron microscopy; organization of fibers into chromosomes; and functional aspects of organization of chromosome fibers. Molecular biologists, geneticists, scientists, and electron microscopists will find this book extremely helpful.

Sales Promotion Techniques and VAT in the EU Nathalie Wittock, 2019-03-14

Sales promotion techniques, or SPTs, are a common facet of consumer life, with many companies offering price reductions, bonuses, or other deals in order to attract or retain customers. Although VAT on advertising costs is in principle fully deductible, problems frequently arise when products are supplied as part of a sales promotion. This book provides the first in-depth investigation of the extent to which the current VAT treatment in the EU of the various SPTs corresponds to the core properties of the VAT, with particular attention to the so-called neutrality principle. With nuanced precision, the author catalogs the SPTs commonly used in practice. Then, revealing serious inconsistencies among the relevant rulings of the European Court of Justice, she goes on to propose specific amendments to the VAT Directive. Focusing on the importance for VAT of determining the presence of an SPT, she thoroughly analyzes such aspects of the VAT-SPT relationship as the following: What are the key considerations for effectively determining whether the supply of a benefit upon fulfillment of a certain condition by a customer constitutes an SPT or a barter? To what extent are the VAT consequences of the use of SPTs compliant with the principle of neutrality? What distinguishes the VAT treatment of an SPT whereby a sales promotor both finances and supplies a benefit from that of an SPT whereby a sales promotor finances but does not himself supply a benefit? What legislative changes can be made in order to reach a more ideal and clear VAT treatment of SPTs in the EU? Not only considering the principle of neutrality, but also the other key features and principles of EU VAT. The research is conducted mainly through a review of European legislation, policy documents, and CJEU case law and the Belgian interpretation thereof. Where room is left for different interpretations, some viewpoints of EU VAT in the Netherlands and the United Kingdom, as well as in the corresponding system of New Zealand, are considered. With the finely tuned analysis presented in this book, practitioners can ensure an appropriate argumentation on the VAT treatment of SPTs with national tax authorities or before courts. As the first overall study on the VAT treatment of SPTs, clearly discussing the issues and legislative gaps and making concrete suggestions for future legislation, it is sure to be welcomed also by academics and EU policymakers.
