For King and Kaiser! Steven E. Clemente,1992-06-16 Steven Clemente describes how conservative traditions and aristocratic values were preserved in the selection and training of German army officers prior to World War I despite changing times and the influx of many middle-class recruits into the army. He demonstrates how right thinking and service to the King and the Kaiser were the basis for Prussian officer education in the period from 1860 to 1914. The history provides considerable detail about German secondary school education, the selection of officers, the curriculum, and life in the cadet and war schools, the life of a subaltern, and the education of the Prussian War Academy. The book concludes with an analysis of the attitudes and loyalties of the officers that entered World War I. Students of European history and military affairs will find this study one that raises a number of provocative questions about German performance in World War I and in subsequent years.

Steam Locomotives ,1985 Steam Locomotives is a definitive history of 178 years of steam locomotive development. It is enhanced with over 750 illustrations including 300 full-color drawings showing the major designs in their correct liveries. There is also a detailed appendix with full technical specifications of over 500 locomotives types from more than 30 nations. This is a wonderful book for all railroad buffs.

Steam-powered workshops as model Volker Koch, The use of steam engines to drive machine tools was the cornerstone of the first industrial revolution, and it was only the use of electric motors that made the complicated - and not entirely harmless - transmissions superfluous. No wonder, then, that model makers are also fascinated by such workshops with their complex mechanics. But how do you build such a workshop? Can you build it yourself? Or can commercially available components be used to create an attractive steam workshop? Volker Koch answers these questions and many more in his extensively illustrated book, which revives a fascinating piece of technical history. From the content: Driving machines, transmissions, operating models The three-part machine system" Driving machines for model workshops Transmissions for model workshops Operating models for model workshops Drive by a simple model locomobile Robust self-made steam engine A simple hammer mill with steam drive Model workshop with Märklin components A simple Mamod layout Self-made operating models

Droysen and the Prussian School of History Robert Southard, 2014-07-11 The Prussian School of History first predicted and advocated, then celebrated and defended, the unification of Germany by Prussia. Experts in German historiography and the history of German liberalism have often complained about the lack of a book, in any language, that traces the origins and explains the ideas of this school of history. Here is that book. Robert Southard finds that, for the Prussian School, history had an agenda. These historians generally expected history to complete its main tasks in their own time and country. The outcome of their politics was, really, an end of history -- not a cessation to historical occurrences, but a cessation of onward historical movement because the historical process had already achieved its long-term, beneficent purposes. Leading us through the intricacies of important but untranslated works of J. G. Droysen, Max Duncker, Rudolph Hayn, and Heinrich von Sybel, Southard demonstrates their belief that the historical sequence was a continual unfolding of God's plan. Indispensable for those interested in the history of German historical writing, this book also has major implications for understanding the history of political liberalism.

Baltica & Balto-Slavica Frederik Herman Henri Kortlandt, 2009 This volume offers a discussion of the phonological, accentological and morphological development of the Baltic languages and their Indo-European origins. The first half of this book is about Baltic historical phonology and morphology and the second half is about Prussian. The emphasis is on the relative chronology of sound changes and on the development of the flexional and derivational categories of nouns, pronouns and verbs. It is argued that the Balto-Slavic acute tone was a glottal stop which developed from the Indo-European laryngeals and from Winter's law and that the original circumflex continues other vocalic sequences. Special points of attention are the gen.pl. endings, ē and ī/jā stems, and thematic and athematic present endings. The second half of the book contains a comparative analysis of the three Prussian catechisms, resulting in the conclusion that they represent three consecutive stages of a real linguistic system. It includes a discussion of the Prussian accent shift, initial vowels, diphthongs, infinitives, verb classes, participles and traces of ablauting paradigms. The final part of the book offers a full linguistic interpretation of the three Prussian catechisms on the basis of the preceding chapters, followed by a list of references and a word index. The book is of interest to Balticists, Slavicists, Indo-Europeanists, and other

historical linguists.
