The Franco-Prussian War Karine Varley, 2024-06-14 The Franco-Prussian War of 1870–71 has traditionally been seen as a limited conflict between French and German forces. This edited volume challenges this view and shows that it was a war of ideas, values, and perceptions, which transformed the political, diplomatic, and military culture across Europe. Based on interdisciplinary research, the book suggests that the war raised new questions about power, the nation, violence, and notions of civilization, which brought about a decisive shift in how warfare was experienced and perceived. While the Franco-Prussian War may have begun as a traditional dynastic struggle, it became a modern war and an important precursor to the First World War in its use of new weaponry and industrialized warfare. At the same time, the development of humanitarian movements and international law on the conduct of war meant that the fighting was subjected to unprecedented scrutiny, while new technologies accelerated the pace at which narratives about the war were constructed and consumed. This volume will appeal to scholars in the fields of war studies, international relations and diplomacy, and intellectual and cultural history. It will also be a useful addition to undergraduate and postgraduate courses on nineteenth-century European history and cultural studies.

Transnationalism in the Prussian East M. Tilse, 2011-07-19 Interpreting the German-Polish relationship according to a paradigm of 'synthesis' between nations, this book examines the process and socio-political effects of how conflict and contradiction between Germans and Poles gave rise to mentalities and behaviours that were 'transnational'; representing the harmonization of the national dichotomy.

Franco-Prussian War 1870–1871, Volume 1 Quintin Barry, 2007-03-19 The first volume of this comprehensive study of the Franco-Prussian War presents a detailed account of Germany Confederation's decisive victory over France. In the first part of this two-volume military history, Quintin Barry examines the war against the French Imperial Army waged by the armies of the German Confederation, directed by that supreme military mind, Helmuth von Moltke. Barry places Moltke and his strategic planning in the context of the European balance of power following the ending of the Austria Prussian War in 1866. He then explores the initial mobilization and deployment of the armies in 1870. All the battles of this opening round of the war are described in detail, including Weissenburg, Worth, Spicheren, Borny-Colombey, Mars la Tour, Gravelotte, Beaumont and, of course, Sedan. The book ends as the Second Empire of Napoleon III lies defeated, crushed by the German armies. Barry has made full use of an extensive number of German and French language sources. His detailed text is accompanied by a number of black and white illustrations and newly drawn battle maps. Orders of battle are also provided.

The Archaeology of the Prussian Crusade Aleksander Pluskowski, 2013-05-07 The Archaeology of the Prussian Crusade explores the archaeology and material culture of the crusade against the Prussian tribes in the 13th century, and the subsequent society created by the Teutonic Order which lasted into the 16th century. It provides the first synthesis of the material culture of a unique crusading society created in the south-eastern Baltic region over the course of the 13th century. It encompasses the full range of archaeological data, from standing buildings through to artefacts and ecofacts, integrated with written and artistic sources. The work is sub-divided into broadly chronological themes, beginning with a historical outline, exploring the settlements, castles, towns and landscapes of the Teutonic Order's theocratic state and concluding with the role of the reconstructed and ruined monuments of medieval Prussia in the modern world in the context of modern Polish culture. This is the first work on the archaeology of medieval Prussia in any language, and is intended as a comprehensive introduction to a period and area of growing interest. This book represents an important contribution to promoting International awareness of the cultural heritage of the Baltic region, which has been rapidly increasing over the last few decades.

German Moonlight Wilhelm Raabe, 2012 This volume assembles English translations of three of Wilhelm Raabe's narratives. *German Moonlight* is a tongue-in-cheek study of lunacy and split personality; *Höxter* and *Corvey* is a reconstruction of civil unrest and anti-Jewish violence in the seventeenth century which advocates tolerance and sobriety in troubled times; and *At the Sign of the Wild Man* is an inverted genre piece in which a rural idyll is devastated by an agent of global capitalism.

"French Sculpture Following the Franco-Prussian War, 1870-80" Michael Dorsch, 2017-07-05 French Sculpture Following the Franco-Prussian War, 1870-80 investigates the role played by the trope of the 'strong woman, fallen man' in re-establishing morale among the French people following the Franco-Prussian War. The study explores how certain French sculptors - including Falguière, Merci-Barrias, and Rodin - presented this recent history of defeat in commemorative monuments that increasingly dominated public space across France during the final decades of the nineteenth century. Though it focuses on French nationalism and the commemoration of war (or, as is the case with the French following the Franco-Prussian War, the commemoration of defeat), this volume also examines shifts in gender roles in the latter half of the nineteenth century, and the impact of military defeat on relations between the sexes. The book probes the aesthetic discourse of the period concerning the merits of traditional allegorical sculpture versus new-fangled realist sculpture in depicting modern life. Drawing on extensive archival research, Michael Dorsch gives a voice to the sculptures he discusses, restoring these often ignored works to their proper place in history.

Dynamic of Destruction Alan Kramer, 2008-11-07 On 26 August 1914 the world-famous university library in the Belgian town of Louvain was looted and destroyed by German troops. The international community reacted in horror - 'Holocaust at Louvain' proclaimed the Daily Mail - and the behaviour of the Germans at Louvain came to be seen as the beginning of a different style of war, without the rules that had governed military conflict up to that point - a more total war, in which enemy civilians and their entire culture were now 'legitimate' targets. Yet the destruction at Louvain was simply one symbolic moment in a wider wave of cultural destruction and mass killing

that swept Europe in the era of the First World War. Using a wide range of examples and eye-witness accounts from across Europe at this time, award-winning historian Alan Kramer paints a picture of an entire continent plunging into a chilling new world of mass mobilization, total warfare, and the celebration of nationalist or ethnic violence - often directed expressly at the enemy's civilian population.
