Pylon William Faulkner, 2011-11-29 One of the few of William Faulkner's works to be set outside his fictional Yoknapatawpha County, *Pylon*, first published in 1935, takes place at an air show in a thinly disguised New Orleans named New Valois. An unnamed reporter for a local newspaper tries to understand a very modern ménage à trois of flyers on the brainstorming circuit. These characters, Faulkner said, "were a fantastic and bizarre phenomenon on the face of the contemporary scene. . . . That is, there was really no place for them in the culture, in the economy, yet they were there, at that time, and everyone knew that they wouldn't last very long, which they didn't. . . . That they were outside the range of God, not only of respectability, of love, but of God too." In *Pylon* Faulkner set out to test their rootless modernity to see if there is any place in it for the old values of the human heart that are the central concerns of his best fiction.

Aerodynamic Interference of Wing-pylon-body Combinations at Low Subsonic Speeds

Kenneth Boland Walkley, Fred W. Martin, 1973 A method for determining the subsonic aerodynamic interference between a planar wing with pylons and a single axisymmetric body has been developed and evaluated. The wing and body solutions were obtained independently using a simple horseshoe vortex system and a three-dimensional point source distribution, respectively. A vortex image system based on the two-dimensional theory of images was then added to the body to maintain the tangent-flow boundary condition in the non-uniform wing flow field. Both the influence of the vortex image system within the body and the body flow field effects at the wing were evaluated. No significant

change in the wing vortex strength distribution resulted so that it was unnecessary to iterate the isolated wing solution. The theoretical results for incompressible flow were compared with pressure distributions obtained from low-speed wind tunnel tests of the wing-body configuration. The correlation was generally good. The Visions of the Pylons J. Daniel Gunther,2018 A detailed account and interpretation of a series of visions conducted between August 22, 1975 and February 5, 1977. Their purpose was to explore the Pylons of the Duant, or Starry Abode, first inscribed upon the alabaster coffin of 19th Dynasty Egyptian Pharaoh, Seti I. To the ancient Egyptians, the Duant was the place where the sun god Ra made his nocturnal journey through the underworld--which was divided into twelve hours. The Egyptian Book of Pylons describes a perilous journey where the Gate of each hour is protected by a fearsome guardian or watcher who prevents entry by the unworthy, or revelation of the deepest secrets of the netherworld to those allowed to pass. In modern Jungian psychology terms, the Duant is a representation of the Unconscious of mankind, the underworld, inhabited by gods and daemons, the living symbols called primordial images or Archetypes. The nocturnal journey of Ra is thus actually a journey deep within the human soul or Ba. The author's study of the ancient texts led him to suspect that these Pylons were also hidden gateways to the higher planes of the Tree of Life,

possibly including secret entrances to the Thirty Aethyrs as described by Elizbethan magician John Dee--
