Panzer Tracts No. 2-2 - Panzerkampfwagen II Ausf. G, H, J, L. and M Thomas L. Jentz, 2007 Panzer Tracts No. 2-2 - Panzerkampfwagen II Ausf. G, H, J, L, and M development and production from 1938 to 1943. As a result of digging through public and private archives for 38 years, we are able to create this accurate history of the very rare variants from the Pz.Kpfw.II family - the VK 901, VK 903, VK 1301, VK 1303, and VK 1601. Original drawings, documented measurements, and original wartime photographs were used to create four-view drawings of the VK 901 and VK 1601 (printed at 1/35th scale). Over a thousand hours were spent precisely measuring external details of the Luchs in order to create as-built drawings of all six views (including right side and belly) with both the VK 1301 and VK 1303 turrets in 1/24th scale. Even the smallest details are clearly discernable in the component drawings at 1/10th scale including the surprise feature of an Orterkompass mounted on the turret roof. This 56 page book is illustrated with over 50 drawings and 41 clean/rare photos.

Panzerkampfwagen IV Ausf. H and Ausf. J. Volume 2 Samir Karmieh, Lukasz Gladysiak, 2017-04-03 The Pz.Kpfw. IV Ausf. H and Pz.Kpfw. IV Ausf. J tanks were produced in the largest numbers in the range known as Sonderkraftfahrzeug 161 in German terminology - 7,000 vehicles. This means that significant quantities of these vehicles were delivered to units from late Spring 1943 in case of the Ausf. H and from Summer 1944 as far as the Ausf. J is concerned. They fought on every front of the war. In addition to the Germans, as will be described in this book, other Axis forces also used of both types of these tanks.

of detail for the 8-wheeled Armored Car, Sd. Kfz. Panzer I Tank, Sd. Kfz. Panzer II Tank, Sd. Kfz. Panzer 35 T Tank, Sd. Kfz. Panzer III, Sd. Kfz. Armored Halftrack, and dozens more.

Panzers I & II Bob Carruthers, 2013-05-17 The first vehicle to be produced in any numbers for the Panzerwaffe was the tiny Panzer I known as the MG Panzerwagen. Almost from the outset the limitations of the design for the Panzer I were obvious. It was essentially a training vehicle which was only pressed into service as a last resort. It was to be succeeded by the Panzer II which could at least engage armoured cars and combat against tanks with approximately the same armour as itself. Together these two tanks formed the bulk of the armour which between 1939 and 1941 conquered half of Europe. This comprehensive overview of the light Panzers in action was compiled by Emmy Award winning historian Bob Carruthers. It draws heavily on war-time intelligence reports to produce a fascinating insight into the development and combat history of the light Panzers at the tactical and operational level. Also featured are rare developments such as the Panzer II flame thrower variant alongside unpublished photographs and illustrations which provide an absorbing study, from an array of primary sources, of the world of the light Panzer and their crews from contemporary Allied sources.

German Tanks in Normandy 1944 Steven J. Zaloga, 2021-08-19 A new study of the German Panzer forces that stood between the Allies' D-Day beachhead and victory in World War II – how they compared, how they were organized, and how they fought. The German tank forces in Normandy in June–August 1944 had the advantage of fighting on the defensive side, as well as comprising some of the most powerful and advanced tanks used by any side in the war. Yet success in tank warfare depends on many things beyond technological superiority. This book describes the types of tanks, tank destroyers and assault guns used by the Panzer units in Normandy, how they fought on the Normandy battlefield, and why they were overwhelmed by the advancing Allies. It discusses the organization and equipment of the units, providing thumbnail sketches of basic organization and doctrine as well as statistical data on the types and categories of AFVs in German service.

Panzer III—German Army Light Tank Dennis Oliver, 2020-08-31 “Concentrates on the Panzer III as operated during the invasion of the Soviet Union . . . a mixture of history, camouflage and models . . . well done.” —ModelingMadness.com The Pzkw III tank was the mainstay of the Panzer divisions during the Blitzkrieg era, which could fairly be said to have ended with the Germans’ failure to take Moscow in the winter of 1941. Although less heavily armored than many of its opponents and somewhat outgunned by the latest Soviet types, the Pzkw III was at the forefront of the advances made over almost impossible distances during the summer and autumn and provided the core of the armored reserve that fought the defensive battles of the winter months. In Dennis Oliver’s latest volume in the TankCraft series he uses archive photos and extensively researched color illustrations to examine the Pzkw III and the units that operated this deservedly famous armored vehicle along a 1,000-mile front during the battles of Operation Barbarossa, the German invasion of the Soviet Union. A key section of his book displays available model kits and after-market products, complemented by a gallery of beautifully constructed and painted models in various scales. Technical details as well as modifications introduced during production and in the field are also examined, providing everything the modeler needs to

recreate an accurate representation of these historic tanks. "This book will prove invaluable for model makers and military historians interested in this often overlooked but important AFV. This is another great addition to the TankCraft series and is highly recommended to all." —Miniature Armoured Fighting Vehicles Association

AK271 D.A.K. PROFILE GUIDE , This book shows the original German camouflage of vehicles used by the Deutsche Afrika Korps, with color variants throughout the war. We look at German Army vehicle colours for the African campaign, including the European Dark Gray (RAL 7021) in which they arrived to Libya. This continues through to the initial camouflage colours, Yellow-Brown RAL 8000 with Green-Gray spots RAL 7008 (in 1941), and the new Yellow-Brown RAL 8020 and Sand Gray RAL 7027, used from 1942. We also include a selection of Italian vehicles, often forgotten, which fought alongside the Germans against the Allies from 1941 to 1943. This is supplemented by the addition of allied vehicles serving with the Axis troops, with some curious American halftracks on a doublepage spread, with distinctive German markings, from 1943. Over 170 profiles cover schemes from the most common camouflage to the most original and unusual vehicles used by the DAK and Regio Esercito, including major artillery pieces used in Africa, highlighting above all the powerful 88 mm Flak 18/36/37. Through the 108 pages of this book, you will find inspiration for your next African modelling project; projects that you can enhance further with the AK 550 Africa Korps Colors Acrylic Set, and the AK 068 DAK Weathering Set.

Hitler's Light Panzers at War Paul Thomas, 2015-02-28 *Hitler's Light Panzers at War* is a highly illustrated record of the German light tank from its beginnings in the 1930s to the

key battles it fought in Poland, France, North Africa, Russia and North Western Europe. The book analyses the development of the light Panzer, which ranged from the Panzer I, II and the Czech built Panzer 35 & 38t. It describes how the Germans carefully utilized the development of these light machines for war, and depicts how these tanks were adapted and up-gunned to face the ever-increasing enemy threat.??Using 250 rare and unpublished photographs together with detailed captions and accompanying text, Hitler's Light Panzers At War provides a unique insight into the many variants that saw action on the battlefield. It provides a vivid account of light Panzer operational deployment from the early Blitzkrieg campaigns to the final demise of the Nazi war machine.

Top 50 Tanks Martin Dougherty,2017-09-19 Counting down from 50 to the very best at number 1, Top 50 Tanks features the greatest armored fighting vehicles from World War I to present day.

How to Kill a Tiger Tank Craig Moore,2021-12-02 When the Panzer VI Ausf.E Tiger I tank first arrived on the battlefield, it launched an Allied and Soviet intelligence race to discover everything they could about this new threat. The British Army needed to know how to knock it out, and then communicate their information to the troops that had to face this new German metal monster either by official means or via newspapers. Using original

official period documents from the Second World War, *How to Kill a Tiger Tank: Unpublished Scientific Reports from the Second World War*, this is not a typical book on the Tiger tank. It shows the reader what the British and Commonwealth forces knew about the Tiger I tank during the war and the results of scientific firing trials. Unpublished and original documents, discovered in different archives, have been transcribed and reproduced along with existing photographs found in these secret reports. These include top secret Bletchley Park Enigma intercepts of German messages, which were decoded and translated before being sent to Prime Minister Winston Churchill. One such intercept discovered in the archives shows the exact moment when Churchill became aware of the existence of a heavy tank called the Tiger. On 25 November 1942, he marked the intercept in his normal red pen and asked Field Marshal Alan Brooke, Chief of the Imperial General Staff, indicating the word 'Tiger' in the message with 'CIGGS, what are these?'

Sd. Kfz. 161 Panzer IV Krzysztof Mucha, 2015-09-19 In June 1943 the production of Pz.Kpfw. IV Ausf. H began in order to increase the armor piercing capabilities of its main armament. Although the new model received the modified 75-mm KwK43 L/48 tank gun, the Ausf. H was still sharing many components with the previous version. This Panzer IV version first saw combat in the summer of 1943 during the German retreat on the Eastern front. The tank proved to be quite complicated and labor-consuming in production which led to simplifying its design. As a result, the less complex Ausf. J model was introduced into production in June 1944.

Panzer IV vs Sherman Steven J. Zaloga, 2015-08-20 As the Allies attempted to break out of Normandy, it quickly became apparent that there would be no easy victory over the

Germans, and that every scrap of territory on the way to Berlin would have to be earned through hard fighting. This study concentrates on, the ferocious battles between the German Panzer IV and US Sherman that were at the heart of this decisive phase of World War II. The two types were among the most-produced tanks in US and German service and were old enemies, having clashed repeatedly in the Mediterranean theater. Throughout their long service careers, both had seen a succession of technical developments and modifications, as well as an evolution in their intended roles – but both remained at the forefront of the fighting on the Western Front. Written by an expert on tank warfare, this book invites the reader into the cramped confines of these armoured workhorses, employing vivid technical illustrations alongside archive and contemporary photography to depict the conditions for the crewmen within.

Panzer III, German Army Light Tank Dennis Oliver, 2022-10-24 The Pzkw III was the most effective tank available to the German army in North Africa during the battles of 1941. It outnumbered all the other types in service with the Afrikakorps at that time and when compared to the Pzkw I and Pzkw II designs it was a potent, modern weapons system. Although less heavily armored than its British opponents it was sturdy and reliable and its main armament was the equal of any enemy anti-tank gun it was called upon to face. This volume of the TankCraft series, the first of two parts, examines the story of the tank's North African service beginning with the arrival of Panzer-Regiment 5 in Tripoli and ending with the advance to El Alamein in late 1942. Dennis Oliver uses archive photos and extensively researched color illustrations to examine the Pzkw III and the Panzer units that took part in the early battles in North Africa. A key section of his book displays

available model kits and aftermarket products, complemented by a gallery of beautifully constructed and painted models in various scales. Technical details as well as modifications introduced during production and in the field are also examined, providing everything the modeler needs to recreate an accurate representation of these historic tanks.
