American Military Transport Aircraft Since 1925 E.R.

Johnson,2013-04-23 Without the support of airlift, the modern American military machine would be brought to a standstill. Since World War II--beginning with the Cold War and continuing up to the present day--the U.S. armed forces have come increasingly to rely

upon airlift for mobility. The power to rapidly move and thereafter support a military operation--anywhere in the world, at any time--has become a foundational element of American defense policy. This work provides the reader with a comprehensive historical survey--including technical specifications, drawings, and photographs--of each type of fixed-wing aircraft used by U.S. military forces over a nearly 90-year period to carry out the airlift mission.

California Warbird Survivors 2002 Harold A. Skaarup, 2002-07-18 During the twentieth century, civil and military aviation has played a prominent role in the history and development of California. Commercial operators have exploited the advantages offered by aircraft to overcome its unique challenges of geography and climate. By virtue of California's comparative size and strategic importance on the West Coast of the continental USA, a wide variety of military aircraft have been based there through the years. The list of military aircraft types that made up the tapestry of California aviation is as extensive as the list of legendary figures who have contributed to its amazing history. While most of the military aircraft types no longer grace the airspace over California, many can be viewed in their former splendor as they stand as gate guards or museum exhibits. This booklet provides a comprehensive guide to where these restored aircraft can be found. Complementing the details concerning aircraft specifications and roles, the author has included many facts. Finally,

the descriptions of the recovery, restoration and preservation efforts stand as a tribute to the many volunteers who have devoted time, energy and financial support to ensure this rich heritage is preserved.

United States Marine Corps Aircraft Since 1913 E.R.

Johnson,2018-04-04 Among the world's military air arms, United States Marine Corps Aviation occupies a unique tactical niche. As the air component of a combined-arms expeditionary force, it exists primarily to support Marine combat forces on the ground in their amphibious assault mission. From the "Banana Wars" of the 1920s to the present day "War on Terror," Marine aviation has undergone a lengthy fine-tuning process not only in terms of warfare doctrines and tactics, but also in the types of aircraft needed to accomplish the mission. This comprehensive survey provides the history, technical specifications, drawings, and photographs of every type of fixed and rotary-wing aircraft used by Marine Air from its origins prior to World War I up to current operations.

featured in 350 films and television shows, providing brief individual histories, film locations, serial numbers and registrations. Aircraft are also cross-referenced by manufacturer.
