**Rabi: Scientist & Citizen** John Rigden, 2019-08-15 “Rabi’s voice comes through vividly and forcefully. This is a work of great inspiration.” — Aage Bohr, Professor of Physics, Niels Bohr Institute, Copenhagen, Denmark “This excellent work is the first full biography of Professor Rabi, the scientist who epitomizes the passing of the torch of physics from Europe to the United States almost a half-century ago. As I read this biography it was almost as if Rabi himself were retelling these events so that all can share his memories of those exciting and important years and benefit from his experience and wisdom.” — Rosalyn S. Yalow, Nobel Laureate in Medicine “A delightful book about a delightful man. Rabi always found a simpler way to do any given experiment, and this made him a great physicist. He has now become a sage who has given the most useful advice to all his colleagues.” — Hans A. Bethe, Nobel Laureate in Physics and Professor Emeritus of Physics, Cornell University “A steadily fascinating account of an exemplary life. Rigden gives the lay reader a clear idea of what the physicist is seeing, what leads him to such strange thoughts. His account of ‘The Matter of J. Robert Oppenheimer’ gives more useful information in a few pages than I could find in the near thousand-page transcript of the hearings.” — Howard Nemerov, Pulitzer Prize-winning Poet and Professor of English, Washington University “An admirable biography, the best possible replacement for the memoirs that Rabi never found time to write.” McGeorge Bundy, Professor of History, New York University “The twentieth century [was] a time of high adventure in physics. It is no wonder that Rabi, with his ebullience and complex genius and wisdom found his profession ‘wonderful.’ As Rigden demonstrates in this complete and very good book, physics was wonderful for Rabi and Rabi was wonderful for physics.” — R. R. Wilson, Science “The growth, in this century, of the American physics community — in size, stature, and influence — is certainly a historical development with deep roots and profound implications. John Rigden’s Rabi: Scientist and Citizen is a fascinating treatment of that subject as reflected in the career and person of Isidor I. Rabi... The [book] sets forth in coherent and sometimes passionate prose an impressive account of I. I. Rabi’s self-image and vision, a vision shared by an important group of physicist colleagues... an engaging personal portrait.” — Allan A. Needell, Isis: A Journal of the History of Science “A real tour de force and a pleasure to read.” — John G. King, Physics Today “Rabi’s life was remarkable, full of incident, vision and action, including war, hot and cold. The biography is a masterpiece, rich in anecdote and never losing the narrative drive.” — New Scientist “Nobel prize-winning physicist I. I. Rabi was described by journalist Daniel Greenberg in 1967 as the éminence grise of America’s scientific establishment. During the Second World War he was in charge of radar research as an associate director of the MIT Radiation Laboratory and was a senior consultant for Los Alamos Scientific Laboratory. After the war he helped to establish the Brookhaven National Laboratory; he sat on the General Advisory Committee (GAC) of the Atomic Energy Commission, eventually succeeding Oppenheimer as chairman; under Eisenhower he was an architect of the president’s Science Advisory Committee. As an elder statesman in the American Cold War scientific community, he was concerned to solidify both the political and the cultural power of science. John S. Rigden’s biography of Rabi, now reissued with a new preface by the author, emphasizes Rabi’s view of science as properly not just a source of technological and military strength, but as ‘the center of culture’.” — Charles Thorpe, British Journal for the History of Science “Rigden, physicist and editor of the American Journal of Physics, has created an intimate portrait of this Titan of 20th century science... The book takes the reader into a world where powerful physical forces and powerful political forces come together to shape our century.” — Bulletin of Science, Technology & Society “[A] satisfying, sympathetic portrait of a modest, brilliant scientist who regards his calling as ‘sacred,’ a religious exploration of ‘one God,’ the God being nature. Readers will treasure equally the story of Rabi’s molecular-beam experiments which earned him the Nobel Prize in 1944 and a gallery of revealing glimpses of his scientist friends, chief among them J. Robert Oppenheimer.” — Publishers Weekly “I. I. Rabi is one of this country’s most distinguished physicists... his life has encompassed all of this century and the revolution in physics that it produced... an interesting story, ably told by John S. Rigden, a physicist at the University of Missouri-St. Louis.” — Lee Dembart, Los Angeles Times

**Rabi'a From Narrative to Myth** Rkia Elaroui Cornell, 2019-01-03 Rabi’a al-‘Adawiyya is a figure shrouded in myth. Certainly a woman by this name was born in Basra, Iraq, in the eighth century, but her life remains recorded only in legends, stories, poems and hagiographies. The various depictions of her – as a deeply spiritual ascetic, an existentialist rebel and a romantic lover – seem impossible to reconcile, and yet Rabi’a has transcended these narratives to become a global symbol of both Sufi and modern secular culture. In this groundbreaking study, Rkia Elaroui Cornell traces the development of these diverse narratives and provides a history of the iconic Rabi’a’s construction as a Sufi saint. Combining medieval and modern sources, including evidence never before examined, in novel ways, Rabi’a From Narrative to Myth is the most significant work to emerge on this quintessential figure in Islam for more than seventy years.

**Rabi'a The Mystic and Her Fellow-Saints in Islam** Margaret Smith, 2010-10-31 Authoritative 1928 account of the extraordinary life, work and teaching of Rabi'a, a freed slave and revered female Sufi saint.

**Rabi'a the Mystic, A. D. 717-801, and Her Fellow Saints in Islam** Margaret Smith, 1977

**Rabi'a The Mystic and her Fellow-Saints in Islam** Margaret Smith, 1984-10-04 For centuries there has been fascination, within and beyond the Islamic world, with the mystical teachings of Sufism, and with the role of the Islamic 'saints' whose life and work were important to Islamic theology. Margaret Smith's classic work, Rabi'a the Mystic, describes the teaching, life and times of one of the great women of the Islamic tradition, Rabi'a of Basra. This study has never been bettered. It is now reissued unchanged, but with a new introduction by Professor Annemarie Schimmel. This emphasises the importance of the book - and of Rabi'a herself - and questions of major importance today: the nature of mystical belief and experience, the Sufi tradition, and the role of women in the Islamic world.

She was the first to introduce the idea that God should be loved for God's own sake. She is widely considered to be the most important of the early Sufi poets. She was the first in a long line of female Sufi mystics. Included with a selection of her few poems in the correct form & meaning is a biography, selected bibliography and essay on Sufi Poetry. A decades-old family rivalry is reaching a boiling point as the patriarchs vie for a seat in Congress. Democrat vs Republican, Muslim vs Christian, Hashmi vs Swain — the Midwestern town of Arbor Hills is one spark away from an explosion of violence. So when two men find themselves irresistibly drawn together at a party, only to discover they were born on opposite sides of a bloody battle line, Matthew Swain and Rabi Hashmi know they should leave well enough alone. The pull between them is magnetic, though, and it's too strong to ignore. Unable to resist, they meet again in secret. Generations of hatred can't temper the passionate love growing between them, but two men falling for each other in the middle of a war zone can't hold back the inevitable clash. And when decades of political, religious, and personal strife finally come to a head, there will be blood. This 60,000 word novel was previously published.

**Rabi'a Basri: Selected Poems** Paul Smith,2013-11-08 RABI'A BASRI: SELECTED POEMS Translation & Introduction Paul Smith RABI'A BASRI (717-801). Throughout her life, her Love of God, poverty and self-denial did not waver. She did not possess much other than a broken jug, a rush mat and a brick, which she used as a pillow. She spent nights in prayer and contemplation, chiding herself if she slept because it took her away from her active Love of God. As her fame grew she had many disciples. More interesting than her asceticism is the actual concept of Divine Love that Rabi'a introduced. She was the first to introduce the idea that God should be loved for God's own sake, not out of fear -- as earlier Sufis had done. She taught that repentance was a gift from God as none could repent unless God had already accepted him and given this gift of repentance. She had a high ideal, worshipping God neither from fear of Hell nor from hope of Paradise, for she saw such self-interest as unworthy of God's servants; emotions like fear and hope were like veils. She is widely considered the most important of the early Sufi poets. Here are most of the small number of poems that survive in the forms they were composed, an introduction on her life and times and a chapter on Sufi poetry. 100 pages.
