Video Games Around the World Mark J. P. Wolf, 2015-05-22 Thirty-nine essays explore the vast diversity of video game history and culture across all the world's continents. Video games have become a global industry, and their history spans dozens of national industries where foreign imports compete with domestic productions, legitimate industry contends with piracy, and national identity faces the global marketplace. This volume describes video game history and culture across every continent, with essays covering areas as disparate and far-flung as Argentina and Thailand, Hungary and Indonesia, Iran and Ireland. Most of the essays are written by natives of the countries they discuss, many of them game designers and founders of game companies, offering distinctively firsthand perspectives. Some of these national histories appear for the first time in English, and some for the first time in any language. Readers will learn, for example, about the rapid growth of mobile games in Africa; how a meat-packing company held the rights to import the Atari VCS 2600 into Mexico; and how the Indonesian MMORPG Nusantara Online reflects that country's cultural history and folklore. Every country or region's unique conditions provide the context that shapes its national industry; for example, the long history of computer science in the United Kingdom and Scandinavia, the problems of piracy in China, the PC Bangs of South Korea, or the Dutch industry's emphasis on serious games. As these essays demonstrate, local innovation and diversification thrive alongside productions and corporations with global aspirations. Africa • Arab World • Argentina • Australia • Austria • Brazil • Canada • China • Colombia • Czech Republic • Finland • France • Germany • Hong Kong • Hungary • India • Indonesia • Iran • Ireland • Italy • Japan • Mexico • The Netherlands • New Zealand • Peru • Poland • Portugal • Russia • Scandinavia • Singapore • South Korea • Spain • Switzerland • Thailand • Turkey • United Kingdom • United States of America • Uruguay • Venezuela

New Technological Applications for Foreign and Second Language Learning and Teaching Kruk, Mariusz, Peterson, Mark, 2020-03-13 Population diversity is becoming more prevalent globally with increasing immigration, emigration, and refugee placement. These circumstances increase the likelihood that a child will be raised speaking a different language in the home than the common language used in each country. This necessitates the development of comprehensive strategies that promote second language learning through the adoption of new technological advancements. New Technological Applications for Foreign and Second Language Learning and Teaching is a scholarly publication that explores how the latest technologies have the potential to engage foreign and second language learners both within and outside the language classroom and to facilitate language learning and teaching in the target language. Highlighting a range of topics such as learning analytics, digital games, and telecollaboration, this book is ideal for teachers, instructional designers, curriculum developers, IT consultants, educational software developers, language learning specialists, academicians, administrators, professionals, researchers, and students.

Asian Popular Culture Anthony Y.H. Fung, 2013-05-29 This book examines different aspects of Asian popular culture, including films, TV, music, comedy, folklore, cultural icons, the Internet and theme parks. It raises important questions such as - What are the implications of popularity of Asian popular culture for globalization? Do regional forces impede the globalizing of cultures? Or does the Asian popular culture flow act as a catalyst or conveying channel for cultural globalization? Does the globalization of culture pose a threat to local culture? It addresses two seemingly contradictory and yet parallel processes in the circulation of Asian popular culture: the interconnectedness between Asian popular culture and western culture in an era of cultural globalization that

turns subjects such as Pokémon, Hip Hop or Cosmopolitan into truly global phenomena, and the local derivatives and versions of global culture that are necessarily disconnected from their origins in order to cater for the local market. It thereby presents a collective argument that, whilst local social formations, and patterns of consumption and participation in Asia are still very much dependent on global cultural developments and the phenomena of modernity, yet such dependence is often concretized, reshaped and distorted by the local media to cater for the local market.

Encyclopedia of Virtual Communities and Technologies Dasgupta, Subhasish, 2005-10-31 This encyclopedia of virtual communities and technologies provides a much needed integrated overview of all the critical concepts, technologies and issues in the area of virtual communities--Provided by publisher.

Paradoxes of Individualization Dick Houtman, Stef Aupers, Willem de Koster, 2016-12-05 Paradoxes of Individualization addresses one of the most hotly debated issues in contemporary sociology: whether a process of individualization is liberating selves from society so as to make them the authors of their personal biographies. The book adopts a cultural-sociological approach that firmly rejects such a notion of individualization as naïve. The process is instead conceptualized as an increasing social significance of moral notions of individual liberty, personal authenticity and cultural tolerance, which informs two paradoxes. Firstly, chapters about consumer behavior, computer gaming, new age spirituality and right-wing extremism demonstrate that this individualism entails a new, yet often unacknowledged, form of social control. The second paradox, addressed in chapters about religious, cultural and political conflict, is concerned with the fact that it is precisely individualism's increased social significance that has made it morally and politically contested. Paradoxes of Individualization, will therefore be of interest to scholars and students of cultural sociology, cultural anthropology, political science, and cultural, religious and media studies, and particularly to those with interests in social theory, culture, politics and religion.

Investigating Dynamic Relationships Among Individual Difference Variables in Learning English as a Foreign Language in a Virtual World Mariusz Kruk, 2021-01-19 This book focuses on the dynamic relationships among individual difference (ID) variables (i.e., willingness to communicate, motivation, language anxiety and boredom) in learning English as a foreign language in the virtual world Second Life. The theoretical part provides an overview of selected issues related to the four ID factors in question (e.g., definitions, models, sources, types, empirical investigations). The empirical part reports the findings of a research project which aimed to examine the changing nature of WTC, motivation, boredom and language anxiety experienced by six English majors during their visits to the said virtual world, the main contributors to the changes in the levels of the constructs under investigation, as well as their relationships. The book closes with the discussion of directions for further research as well as pedagogical implications.

Pragmatics of Chinese as a Second Language Shuai Li, 2023-11-14 This book brings together a collection of high-quality empirical studies which examine multiple aspects involved in the acquisition, teaching and assessment of pragmatics in Chinese as a second language (L2). Gaming Rhythms Tom Apperley, 2011-06-16 Global gaming networks are heterogenous collectives of localized practices, not unified commercial products. Shifting the analysis of digital games to local specificities that build and perform the global and general, Gaming Rhythms employs ethnographic work conducted in Venezuela and Australia to account for the material experiences of actual game players. This book explores the materiality of digital play across diverse locations and argues that the dynamic relation between the everyday life of the player and the experience of digital game play can only be understood by examining play-practices in their specific situations. -- Website.
