The Calling Card Script Paul Ashton, 2014-03-10 The calling card script is the script that expresses your voice, gets you noticed and helps you reach commission and production. Written by Paul Ashton, Development Manager of the BBC writersroom, and born out of his wide experience of reading scripts, working with writers, and as an industry 'gatekeeper', this is a guide to the key writing tools you need to know and understand to write a truly original script. As many professionals need to switch mediums and genres in order to survive and thrive, the book uniquely draws together the universal principles of dramatic storytelling for screen, stage, and radio. With a focus on the script as a blue print for performance, sections and chapters break down into bite-sized practical insights and the book mirrors both the journey of the story and process of writing it. The Calling Card Script shows how to tell a great story in script form and offers valuable professional development insight for all writers, whether established or just starting out, who wish to hone their craft and speak their voice.

Bearing Down Tom Trabulsi, 2012-05-18 What are the repercussions of the choices we have made or worse, what are the consequences of those events that are (at least partially) out of our

control? Once we consider these consequences, what do we do next? In this six-story collection, a colorful group of characters face just those questions in adventures that journey to places as diverse the Great Plains and the Deep South. As each story explores how these challenges impact the individual, the collection reveals a greater continuity of the contemporary American experience, as seen through the eyes of soldiers, roofers, heroin addicts, and a thirteen-year-old kid out to save his own mother. What seems to set us apart may, in fact, connect us in ways no one realizes. From New York City to New Orleans, the various landscapes of present-day America blend with characters and situations presented with a unique brand of realism, bringing disparate worlds together.

The Life Model of Social Work Practice Alex Gitterman, Caryl B. Germain, 2008-05-27 Originally published in 1980, this seminal work was the first to introduce an ecological perspective into social work practice. The third edition expands and deepens this perspective, further developing the basic premise that, by being situated within the people:environment interface, the social work profession is distinct from other service professions. The book presents the what (theories and concepts) and the how (practice methods) to help people with their life stressors and, simultaneously, to influence communities, organizations, and policymakers to be more responsive to them. In this edition, Gitterman and Germain examine major changes to our socioeconomic and political landscape. They restore a chapter on the history of social work practice, offering a view of the limited services for African Americans provided by settlements and charity organization societies. Building on the African American self-help and mutual aid traditions, this chapter traces the replication of a parallel social service system by African American leaders for their own communities. The chapter also addresses the impact of contemporary societal trends, including the global economy, immigration, cultural changes, and the technology revolution. In addition, it discusses current professional contexts of managed mental health care, evidence-based practice, and the professional uses of technology. A new chapter explores issues and processes embedded in assessment, practice monitoring, and practice evaluation. The volume continues to feature innovative schema for assessment and intervention with respect to stressful life transitions and traumatic events, environmental pressures, and dysfunctional interpersonal processes. Practice illustrations offer reflections of today's major social issues, such as AIDS, homelessness, and modern forms of violence.

Cross-Linguistic Transfer of Writing Strategies Karen

Forbes, 2020-10-19 In the context of increasingly multilingual global educational settings, this book provides a timely exploration of the phenomenon of cross-linguistic transfer of writing strategies (in particular, transfer from the foreign language to the first language) and presents a compelling case for a multilingual approach to writing pedagogy. The book presents evidence from a classroom-based intervention study conducted in a secondary school in England on cross-linguistic strategy transfer. It suggests that even beginner or low proficiency foreign language learners can develop effective skills and strategies in the foreign language classroom which can also positively influence writing in other languages, including their first language. This book ultimately encourages more joined-up, cross-curricular, cross-linguistic thinking related to language in schools by exploring the potential for collaboration between languages teachers.

Keys for Writers Ann Raimes, 1999 This concise composition handbook offers innovative design features that make it the most accessible tabbed handbook available: moveable KeyTabs that allow students to personalize the book, a menu-driven Key to the Book, and color-coded divider tabs to help students find information quickly. Complete coverage of grammar and the writing, research, and documentation processes are complemented by helpful multilingual/ESL material, Writing Across the Curriculum elements, and The 5Cs of Style. In recent years, technology has touched every aspect of writing and research and the Third Edition of **Keys for Writers** keeps pace with students' changing needs. This thorough revision now offers a full-color design; substantial new material on evaluating sources and the use of technology for research and writing; expanded coverage of writing online and document design; the most up-to-date MLA, APA, CMS, CBE, and CGOS guidelines; integrated ESL resources; and an expanded section on argument. New! A new Part 5, Technology: For Communication, Document Design, and Work, presents the latest information on writing for online readers, e-mail discussion lists, and chatrooms. Ample illustrations--including a sample student web site and an online scannable resume--and easy-to-understand explanations address web site and document design as well

as work-related documents. New! The new full-color design highlights important information and clearly depicts web graphics, charts, and other visuals. New! Completely up-to-date documentation coverage features the latest MLA and APA styles, as updated on their respective web sites, the Columbia Guide to Online Style, many new student examples, and a new student paper. Two rows of color-coded divider tabs aid students in finding information quickly. Red tabs (Parts 1-5) cover whole paper issues: the writing process, research and documentation, online and business writing, and document design. Gold tabs (Parts 6-10) cover sentence-level issues such as usage, grammar, punctuation, and mechanics. Color-coded Key to the Book, an initial menu page, aligns the table of contents with the divider tabs to help students flip directly to the part they need. Its colors correspond to those of the divider tabs. Unique moveable KeyTabs serve as bookmarks, extended margins, or note cards, and enable students to customize the book for quick access to the information they decide they need most. Key Points boxes present concise summaries and checklists to highlight vital information and encourage the development of editing and critical-thinking skills. New! Updated and expanded information includes a new section on evaluating sources, a new source list for 24 disciplines, compiled in consultation with 19 college librarians, and a thoroughly revised section on the process of writing a research paper. New! The expanded Writing an Argument section includes a sample student argument paper on telemarketing. Students learn to formulate an argument, support it with evidence, and address opposing views. New! Content changes and additions include integrated ESL coverage throughout, and increased emphasis on style, critical thinking, and writing across the curriculum.
