*Multicomponent Polymeric Materials* Jin Kuk Kim,Sabu Thomas,Prosenjit Saha,2016-08-26 The book offers an in-depth review of the materials design and manufacturing processes employed in the development of multi-component or multiphase polymer material systems. This field has seen rapid growth in both academic and industrial research, as multiphase materials are increasingly replacing traditional single-component materials in commercial applications. Many obstacles can be overcome by processing and using multiphase materials in automobile, construction, aerospace, food processing, and other chemical industry applications. The comprehensive description of the processing, characterization, and application of multiphase materials presented in this book offers a world of new ideas and potential technological advantages for academics, researchers, students, and industrial manufacturers from diverse fields including rubber engineering, polymer chemistry, materials processing and chemical science. From the commercial point of view it will be of great value to those involved in processing, optimizing and manufacturing new materials for novel end-use applications. The book takes a detailed approach to the description of process parameters, process optimization, mold design, and other core manufacturing information. Details of injection, extrusion, and compression molding processes have been provided based on the most recent advances in the field. *Richard Tregaskis* Ray E. Boomhower,2021 In the late summer of 1942, more than ten thousand members of the First Marine Division held a tenuous toehold on the Pacific island of Guadalcanal. As American marines battled Japanese forces for control of the island, they were joined by war correspondent Richard Tregaskis. Tregaskis was one of only two civilian reporters to land and stay with the marines, and in his notebook he captured the daily and nightly terrors faced by American forces in one of World War II's most legendary battles--and it served as the premise for his bestselling book, Guadalcanal Diary. One of the most distinguished combat reporters to cover World War II, Tregaskis later reported on Cold War conflicts in Korea and Vietnam. In 1964 the Overseas Press Club recognized his first-person reporting under hazardous circumstances by awarding him its George Polk Award for his book Vietnam Diary. Boomhower's riveting book is the first to tell Tregaskis's gripping life story, concentrating on his intrepid reporting experiences during World War II and his fascination with war and its effect on the men who fought it.

*The Holy Fire* Nehemia Polen,1999-06-01 The Holy Fire: The Teachings of Rabbi Kalonymus Kalman Shapira, the Rebbe of the Warsaw Ghetto is a journey into the mind and spirit of a sublime hasidic master in his moments of joy and tranquillity, and later, in his time of personal and communal catastrophe. The reader takes a voyage into the rich and variegated world of twentieth-century Hasidism in Poland, a world destroyed by the Holocaust. This is a volume inspired by a deeply sensitive and poetic individual of faith who is grappling with an unfolding disaster. While the Holocaust has engendered a voluminous body of religious and philosophical writings attempting to probe the issues this unfathomable period raises in all their enormity, virtually all were written after the war, when a modicum of distance and reflection is possible. Contemporaneous diaries and chronicles written as the events were happening concentrate on the descriptive accounts of the horrors. The Holy Fire, however, engages a sustained theological reflection and stands alone as an extended religious response from within the heart of darkness itself while the catastrophe takes place, and is, for this reason, an extraordinary document and an astonishing personal achievement.

**Respiratory Contagion** Mieczyslaw Pokorski,2016-05-18 The book focuses on the contagion nature of respiratory ailments, the ways a pulmonary disease is spread. Respiratory infections are surrounded by interrelated circumstances that act upon individual and community and eventually underlie morbidity. Patient's age, vulnerability to infections, immune function and responses, comorbidities, but also medical care and the agility in coping with stress, are just a few basic determinants of a diseased state. Modern medication, like newfangled antibiotics and their unrestrained use, may not guarantee the best solution to patient's condition. A valuable asset of this book is a blend of personal experience and expertise of contributors in pursuit of finding new solutions to old clinical problems. The book will be of interest to clinicians, researchers, health care providers, and other health care professionals, particularly those dealing with contagious diseases.

People Who Eat Darkness Richard Lloyd Parry,2012-05-22 Lucie Blackman—tall, blond, twenty-one years old—stepped out into the vastness of Tokyo in the summer of 2000, and disappeared forever. The following winter, her dismembered remains were found buried in a seaside cave. Richard Lloyd Parry, an award-winning foreign correspondent, covered Lucie's disappearance and followed the massive search for her, the long investigation, and the even longer trial. Over ten years, he earned the trust of her family and friends, won unique access to the Japanese detectives and Japan's convoluted legal system, and delved deep into the mind of the man accused of the crime, Joji Obara, described by the judge as unprecedented and extremely evil. The result is a book at once thrilling and revelatory, In Cold Blood for our times (Chris Cleave, author of Incendiary and Little Bee). The People Who Eat Darkness is one of Publishers Weekly's Top 10 Best Books of 2012
