Ezekiel- Everyman's Bible Commentary Ralph Alexander,1976-06-01 The Old Testament book of Ezekiel is filled with visions and prophecies the Lord revealed to His prophet. Although these revelations were given to the people of Israel during their Babylonian captivity, many of them are yet to be fulfilled. Ezekiel gives warnings of punishment for evil practices and waywardness but also glorious promises to encourage those who seek to honor the Lord even in the midst of trials. Bible students are often puzzled by these difficult visions and fail to perceive God's central message--that He alone is Lord. Dr. Ralph Alexander discusses each section of the prophecy in summary and then treats the major themes, dealing with various questions and problems that arise.

Global Warming False Alarm Ralph B. Alexander,2012 This revised edition of Ralph Alexander's 2009 book features approximately 50% new or updated material, including an expanded chapter on alternative explanations to CO2 as the main source of global warming. Newly added sections in the 2nd edition cover temperature tampering by the three major custodians of the world's temperature data, so as to exaggerate the global warming rate; the Climategate scandal; the use of peer review as an alarmist weapon; the neglected influence of the sun on our climate, including the amplification of solar activity by the oceans; heat that is supposedly hiding in the deep ocean, but can't be found; and more. The new book also describes how the UN's IPCC and other alarmists manipulate climate data, discusses the lack of warming for more than a decade - about which alarmists are in denial, and explains the folly of carbon pricing schemes for regulating CO2. Finally, the author reflects on the reasons that so many people erroneously believe recent climate change comes from human activity, when there's ample evidence to the contrary.

Shadowing Ralph Ellison John S. Wright,2009-09-18 In 1952, Ralph Ellison (1914-1994) published his novel *Invisible Man*, which transformed the dynamics of American literature. The novel won the National Book Award, extended the themes of his early short stories, and dramatized in fictional form the cultural theories expressed in his later essay collections *Shadow & Act* and *Going to the Territory*. In *Shadowing Ralph Ellison*, John Wright traces Ellison's intellectual and aesthetic development and the evolution of his cultural philosophy throughout his long career. The book explores Ellison's published fiction, his criticism and correspondence, and his passionate exchanges with—and impact on—other literary intellectuals during the Cold War 1950s and during the culture wars of the 1960s, 1970s, and 1980s. Wright examines Ellison's body of work through the lens of Ellison's cosmopolitan philosophy of art and culture, which the writer began to construct during the late 1930s. Ellison, Wright argues, eschewed orthodoxy in both political and cultural discourse, maintaining that to achieve the highest cultural awareness and the greatest personal integrity, the individual must cultivate forms of thinking and acting that are fluid, improvisational, and vitalistic—like the blues and jazz. Accordingly, Ellison elaborated throughout his body of work the innumerable ways that rigid cultural labels, categories, and concepts—from racial stereotypes and fashionable academic theories to conventional political doctrines—fail to capture the full potential of human consciousness. Instead, Ellison advocated forms of consciousness and culture akin to what the blues and jazz reveal, and he portrayed those musical traditions as the best embodiment of the evolving American spirit.

Science Under Attack Ralph B. Alexander,2018-12-01 Evidence and logic are lacking in many areas of public debate today on hot-button issues ranging from dietary fat to vaccination. In *Science Under Attack*, Dr. Alexander shows how science is being abused, sidelined or ignored, making it difficult or impossible for the public to form a reasoned opinion about important issues. Readers will learn why science is becoming more corrupt, and also how it is being abused for political and economic gain, support of activism, or the propping up of religious beliefs. To illustrate how science is being ignored and abused, the author examines six different issues and the way they are currently discussed: evolution, dietary fat, climate change, vaccination, GMO crops and continental drift. In his research, he has gone back to the original source wherever possible rather than quoting second-hand sources, adding a degree of accuracy and nuance often missing. The controversial assertion that science does not support the conventional wisdom on climate change should be of particular interest. Alexander shows that the scientific evidence for a substantial human contribution to climate change is actually flimsy, and he demonstrates the fallacy of comparing the strong link between smoking and lung cancer to the much weaker connection between human activity and global warming.

Behold Your God Myrna Alexander,1978 Behold Your God is a Bible study workbook in which Myrna Alexander helps us study God's character and person. The author emphasizes that what once was appropriate for only the seminary student or theologian is essential to the faith of all believers. Behold Your God includes an introduction to Scripture verses and themes, questions with space for answers at the end of each chapter, and helps for study group leaders. To consistently lean on God alone, we must know Him, and To know Him, we must know what He is like. Each lesson in Behold Your God studies a particular truth about the character of God: - Love - Supreme and Sovereign - All-powerful - Good - Omniscient - All-wise - Omnipresent - Immutable - Faithful - Holy - Just - To be praised -- Behold Your God helps readers understand what God is really like and encourages practical application of this knowledge to daily living. Addressing contemporary and biblical issues, the Woman's Workshop series and the Workshop series for men and women are ideal for group or individual Bible study.

The Jazz of Physics Stephon Alexander,2016-04-26 More than fifty years ago, John Coltrane drew the twelve musical notes in a circle and connected them by straight lines, forming a five-pointed star. Inspired by Einstein, Coltrane put physics and geometry at the core of his music. Physicist and jazz musician Stephon Alexander follows suit, using jazz to answer physics' most vexing questions about the past and future of the universe. Following the great minds that first drew the links between music and physics-a list including Pythagoras, Kepler, Newton, Einstein, and Rakim-The Jazz of Physics reveals that the ancient poetic idea of the Music of the Spheres, taken seriously, clarifies confounding issues in physics. The Jazz of Physics will fascinate and inspire anyone interested in the mysteries of our universe, music, and life itself.

The Letter of James Douglas J. Moo,2000-02-09 Few books in the New Testament are better known or more often quoted as the Letter of James. Because James is so concise, so intensely practical, and so filled with memorable metaphors and illustrations, it has become one of the two or three most popular New Testament books in the church. This highly original commentary seeks to make the Letter of James clear and applicable to Christian living today. Interacting with the latest views on James but keeping academic references to a minimum, Douglas Moo first introduces the Letter of James in its historical context and then provides verse-by-verse comments that explain the message of James both to its first readers and to today's church.

Phonographies Alexander G. Weheliye,2005-04-29 Phonographies explores the numerous links and relays between twentieth-century black cultural production and sound technologies from the phonograph to the

Walkman. Highlighting how black authors, filmmakers, and musicians have actively engaged with recorded sound in their work, Alexander G. Weheliye contends that the interplay between sound technologies and black music and speech enabled the emergence of modern black culture, of what he terms “sonic Afro-modernity.” He shows that by separating music and speech from their human sources, sound-recording technologies beginning with the phonograph generated new modes of thinking, being, and becoming. Black artists used these new possibilities to revamp key notions of modernity—among these, ideas of subjectivity, temporality, and community. *Phonographies* is a powerful argument that sound technologies are integral to black culture, which is, in turn, fundamental to Western modernity. Weheliye surveys literature, film, and music to focus on engagements with recorded sound. He offers substantial new readings of canonical texts by W. E. B. Du Bois and Ralph Ellison, establishing dialogues between these writers and popular music and film ranging from Louis Armstrong’s voice to DJ mixing techniques to Darnell Martin’s 1994 movie *I Like It Like That*. Looking at how questions of diasporic belonging are articulated in contemporary black musical practices, Weheliye analyzes three contemporary Afro-diasporic musical acts: the Haitian and African American rap group the Fugees, the Afro- and Italian-German rap collective Advanced Chemistry, and black British artist Tricky and his partner Martina. *Phonographies* imagines the African diaspora as a virtual sounding space, one that is marked, in the twentieth century and twenty-first, by the circulation of culture via technological reproductions—records and tapes, dubbing and mixing, and more.

Ralph Eugene Meatyard Alexander Nemerov, 2017 The legendary, mysterious photographer Ralph Eugene Meatyard (1925–72) lived in Lexington, Kentucky, working in a close-knit community of artists and writers while making his living as an optician. *Ralph Eugene Meatyard: American Mystic*, by esteemed art historian Alexander Nemerov, is a groundbreaking study of Meatyard’s work, creative thinking and sources of inspiration. Given rare access to the personal library in which Meatyard had tellingly annotated works of fiction, poetry and other pages of personal significance, Nemerov examines the artist’s process of creating characters and staging dreamlike scenes. *American Mystic* also considers the artists and writers whose work influenced Meatyard, such as William Blake, Ludwig Wittgenstein and Thomas Merton -- Publisher's website.

The Alchemy of Conquest Ralph Bauer, 2019-10-08 The Age of the Discovery of the Americas was concurrent with the Age of Discovery in science. In *The Alchemy of Conquest*, Ralph Bauer explores the historical relationship between the two, focusing on the connections between religion and science in the Spanish, English, and French literatures about the Americas during the early modern period. As sailors, conquerors, travelers, and missionaries were exploring new worlds, and claiming ownership of them, early modern men of science redefined what it means to discover something. Bauer explores the role that the verbal, conceptual, and visual language of alchemy played in the literature of the discovery of the Americas and in the rise of an early modern paradigm of discovery in both science and international law. The book traces the intellectual and spiritual legacies of late medieval alchemists such as Roger Bacon, Arnald of Villanova, and Ramon Llull in the early modern literature of the conquest of America in texts written by authors such as Christopher Columbus, Amerigo Vespucci, José de Acosta, Nicolás Monardes, Walter Raleigh, Thomas Harriot, Francis Bacon, and Alexander von Humboldt.

Ralph Ellison and Kenneth Burke Bryan Crable, 2012 *Ralph Ellison and Kenneth Burke* focuses on the little-known but important friendship between two canonical American writers. The story of this fifty-year friendship, however, is more than literary biography; Bryan Crable argues that the Burke-Ellison relationship can be interpreted as a microcosm of the American racial divide. Through examination of published writings and unpublished correspondence, he reconstructs the dialogue between Burke and Ellison about race that shaped some of their most important works, including Burke's *A Rhetoric of Motives* and Ellison's *Invisible Man*. In addition, the book connects this dialogue to changes in American discourse about race. Crable shows that these two men were deeply connected, intellectually and personally, but the social division between white and black Americans produced hesitation, embarrassment, mystery, and estrangement where Ellison and Burke might otherwise have found unity. By using Ellison’s nonfiction and Burke’s rhetorical theory to articulate a new vocabulary of race, the author concludes not with a simplistic healing of the divide but with a challenge to embrace the responsibility inherent to our social order.
