*The Story of Saiunkoku, Vol. 1* Sai Yukino,2010-11-02 A period fantasy in which a palace consort must guide a feckless emporer to assume the throne. Shurei Hong, destitute but of noble birth, has always dreamed of working as a civil servant in the imperial court of Saiunkoku, but women are barred from holding office. The emperor Ryuki, however, refuses to take command, leaving everything to his advisors. Shurei is asked to become a consort to the emperor to persuade the ne'er-do-well ruler to govern. Shurei enters the palace as Ryuki's consort, but he has yet to seek her out. It is rumored that men, not women, share the emperor's bedchamber. Shurei must think of a way to stop the emperor from shirking his responsibilities, but she has to find him first!

**The Animated Movie Guide** Jerry Beck,2005-10-28 Going beyond the box-office hits of Disney and Dreamworks, this guide to every animated movie ever released in the United States covers more than 300 films over the course of nearly 80 years of film history. Well-known films such as Finding Nemo and Shrek are profiled and hundreds of other films, many of them rarely discussed, are analyzed, compared, and catalogued. The origin of the genre and what it takes to make a great animated feature are discussed, and the influence of Japanese animation, computer graphics, and stop-motion puppet techniques are brought into perspective. Every film analysis includes reviews, four-star ratings, background information, plot synopses, accurate running times, consumer tips, and MPAA ratings. Brief guides to made-for-TV movies, direct-to-video releases, foreign films that were never theatrically released in the U.S., and live-action films with significant animation round out the volume.

**NATURAL LANGUAGE PROCESSING** VINEET CHAITANYA,RAJEEV SANGAL,1996 This book presents a Paninian perspective towards natural language processing. It has three objectives: (1) to introduce the reader to NLP, (2) to introduce the reader to Paninian Grammar (PG) which is the application of the original Paninian framework to the processing of modern Indian languages using the computer, (3) to compare Paninian Grammar (PG) framework with modern Western computational grammar frameworks.Indian languages like many other languages of the world have relatively free word order. They also have a rich system of case-endings and post-positions. In contrast to this, the majority of grammar frameworks are designed for English and other positional languages. The unique aspect of the computational grammar described here is that it is designed for free word order languages and makes special use of case-endings and post-positions. Efficient parsers for the grammar are also described. The computational grammar is likely to be suitable for other free word order languages of the world.Second half of the book presents a comparison of Paninian Grammar (PG) with existing modern western computational grammars. It introduces three western grammar frameworks using examples from English: Lexical Functional Grammar (LFG), Tree Adjoining Grammar (TAG), and Government and Binding (GB). The presentation does not assume any background on part of the reader regarding these frameworks. Each presentation is followed by either a discussion on applicability of the framework to free word order languages, or a comparison with PG framework.

**Men Are Better Than Women** Dick Masterson,2008-04-08 Through a process of exhaustive man research he calls keeping his eyes open, Dick Masterson has compiled a Magnum-size list of the ways men are better than women. It is an infallible compendium of man's greatness, filled with the most egregiously fallacious arguments ever put to words, but with some kind of miraculous, rock-solid man logic dripping like motor oil from every sentence. It is a manifesto more memorable than bullshit like High Fidelity or which Axe baby powder Maxim thinks you should slap on your nuts before clubbing, more chock-full of devastating man quotes than Oscar Wilde with two wangs. Most important, it is the only one of its kind. In Men Are Better Than Women, Dick Masterson dispenses logic from his man mouth into the eyes of his male readers like some kind of mighty mother man eagle with nutrient-rich word vomit. It's a book that makes you feel like driving a train into a dynamite factory and then tearing a telephone book apart with your bare hands, just because that's the way men have always done it. Masterson's chapters are simple and self-contained, demand no commitments from readers, and have an immediate payoff. Men Are Better Than Women is a dangerous work of satire -- not dangerous in a revolutionary sense, but dangerous in that it walks the razor-thin line between cruelty and absurdity. That line is called hilarious.

What Animals Teach Us about Politics Brian Massumi,2014-08-13 In What Animals Teach Us about Politics, Brian Massumi takes up the question of the animal. By treating the human as animal, he develops a concept of an animal politics. His is not a human politics of the animal, but an integrally animal politics, freed from connotations of the primitive state of nature and the accompanying presuppositions about instinct permeating modern thought. Massumi integrates notions marginalized by the dominant currents in evolutionary biology, animal behavior, and philosophy— notions such as play, sympathy, and creativity—into the concept of nature. As he does so, his inquiry necessarily expands, encompassing not only animal behavior but also animal thought and its distance from, or proximity to, those capacities over which human animals claim a monopoly: language and reflexive consciousness. For Massumi, humans and animals exist on a continuum. Understanding that continuum, while accounting for difference, requires a new logic of mutual inclusion. Massumi finds the conceptual resources for this logic in the work of thinkers including Gregory Bateson, Henri Bergson, Gilbert Simondon, and Raymond Ruyer. This concise book intervenes in Deleuze studies, posthumanism, and animal studies, as well as areas of study as wide-ranging as affect theory, aesthetics, embodied cognition, political theory, process philosophy, the theory of play, and the thought of Alfred North Whitehead.

**Man Made Language** Dale Spender,1980-01-01

Laboratory Phonology 10 Cécile Fougeron,Barbara Kuehnert,Mariapaola Imperio,Nathalie Vallee,2010-08-31 The present volume contains a selection of the papers and commentaries which were originally presented at the Tenth Conference of Laboratory Phonology (LabPhon10) held in Paris from June 29 to July 1, 2006. The theme of the volume is Variation, Phonetic Detail and Phonological Representation. It brings together specialists of different fields of speech research with the goal to discuss the relevance of patterns of variation and phonetic details on phonological representations and theories. The topic is addressed from the angles of speech production, perception, acquisition, speech disorders, and language universals. The contributions are grouped thematically in five sections, each of which is commented by invited discussants. Section I contains the contributions to the special '10th anniversary session' of the conference which represent in a prototypical way some of the different research questions that have been at the core of important debates over the last 20 years in the laboratory phonology community. Issues of phonological universals and language typology are addressed in section II. In section III, the notions of variation and phonetic detail are examined with regard to how they are acquired and dealt with in the formation of phonological representation in emerging systems. Section IV focuses on recent work at the crossroad between normal and disordered speech.
