Insights in Functional Plant Ecology 2022 Boris Rewald, Jianshuang Wu, Antonio Antonello Montagnoli, 2023-10-27 The goal of this special edition Research Topic is to shed light on the progress made in the past decade in the Functional Plant Ecology field, and on its future challenges to provide a thorough overview of the field. This article collection will inspire, inform and provide direction and guidance to researchers in the field.

Tropical Cloud Forest Ecology in Hainan Island Wenxing Long, 2022-09-19 This book introduces ecology of tropical cloud forests in China, a high-altitudinal tropical forest. The findings are novel in revealing environmental characteristics, community features, diversity patterns, plant strategies, community assembly mechanisms, and diversity-ecosystem functions of tropical cloud forests in China. The knowledge of this book will bridge the gaps of our understanding on the tropical forest in China and the world-wide, and will enrich the theory of tropical forest community ecology. Written by experts in the field, this book will serve as an invaluable reference for tropical forest ecology researchers.

Impacts of Invasive Species on Coastal Environments Christopher Makowski, Charles W. Finkl, 2018-07-24 This book focuses on the global threats to coastal environments from invasive, non-native species and examines how these alien

biological species adversely alter landscapes and socioeconomic conditions as well as the psychological attitudes and perceptions of local inhabitants and tourists. Designed for the professional or specialist in marine science, coastal zone management, biology, and related disciplines, this volume appeals to those not only working directly with invasive flora and fauna species, but also those individuals involved in a wide array of coastal related fields. Examples and case studies of coastal invasive species are drawn from many different geographic areas worldwide, including North and South America, Europe, Oceania, the Caribbean, Southeast Asia, and Africa.

Forests under pressure: The need for interdisciplinary approaches to address forest vulnerability to tree mortality in response to drought Angelo Rita, Francesco Ripullone, Jesús Julio Camarero, Giovanna Battipaglia, Veronica De Micco, 2023-03-14

Key Determinants of Biodiversity, Ecosystem Functioning and Restoration in Climate Change Sensitive Ecosystems Hui Zhang, Xiang Liu, Robert John, 2023-11-27 Human activities such as agriculture and mining have led to serious negative effects on biodiversity and important ecosystem services including biodiversity loss and climate change. Thus, it is important to quantify the key determinants of biodiversity, ecosystem functioning and ecological restoration of degraded plant communities in climate change sensitive ecosystems (i.e. subalpine and alpine meadow communities in Qinghai, tropical rainforests and tropical mountains). In this way, effective management, policy and methods can be developed to reduce the influence of climate change on these climate change sensitive ecosystems. The aforementioned human activities continue to destroy and degrade plant communities and

ecosystem functioning. Climatic changes further exacerbate negative impacts and may trigger rapid loss of species, precipitate decline and changes in the flows of ecosystem goods and services. As the collective anthropogenic influence intensifies, some ecosystems may be more sensitive than others to these changes. Ecosystems that contribute greatly to human well-being through the delivery of biodiversity and ecosystem benefits should be the focus of particular concern. There are key knowledge gaps on the specific nature of anthropogenic impacts, species and ecosystem responses, and possible management and mitigation measures. Comprehensive documentation of these aspects from highly sensitive regions and ecosystems is urgently needed, particularly at fine scales, which is relevant for developing management and mitigation measures. Pathways such as ecological restoration can offset some of the impacts, but even quantifying the impacts of observed and anticipated changes is far from adequate and other mitigation measures must be considered.

Komodo Jilis A.J. Verheijen, 2014-10-02 With the entrance of the European Union into the field of International Investment Law and Arbitration, a new specialist field of law, namely 'European Investment Law and Arbitration' is in the making. This new field of law draws on EU Law, Public International Law, International Investment Law, International Arbitration Law and Practice and International Economic Law, while others fields of law such as Energy Law are also relevant. The European Investment Law and Arbitration Review is the first law periodical specifically dedicated to the field of 'European Investment Law and Arbitration'. The timing could not be better. The

first EU integrated investment treaties with Canada (CETA), US (TTIP) and Singapore (EU-SING) are either negotiated or about to be signed and ratified by the EU and its Member States. These are “integrated” investment treaties in that they combine free trade agreement provisions with international investment agreement norms.

Moreover, the Court of Justice of the EU (CJEU) is about to deliver its first judgments and Opinions directly relating to intra-EU BITs and the EU-SING FTA. More generally, the public debate and discussions within academic and practitioner circles about the pros and cons of investor-state dispute settlement (ISDS) and investment treaties in general is intensifying almost on a daily basis. The Review will cover all these issues, but also goes beyond that by offering space for more innovative approaches and themes.

Bastos-Filho, Juan Pablo Salgado-Guerrero, 2023-05-20 This book constitutes the refereed proceedings of the 3rd International Conference on Smart Technologies, Systems and Applications, SmartTech-IC 2022, held in Cuenca, Ecuador, in November 16-18, 2022. The 37 full papers included in this book were carefully reviewed and selected from 121 submissions. They were organized in topical sections as follows: Smart Technologies, Smart Systems, Smart Trends and Applications.

Reading Greek Joint Association of Classical Teachers, 2007-07-30 First published in 1978, *Reading Greek* has become a best-selling one-year introductory course in ancient Greek for students and adults. It combines the best of modern and traditional language-learning techniques and is used widely in schools, summer schools and universities across the world. It has also been translated into several foreign languages. This volume contains a narrative adapted entirely from ancient authors, including Herodotus, Euripides, Aristophanes and Demosthenes, in order to encourage students rapidly to develop their reading skills. Generous support is provided with vocabulary. At the same time, through the texts and numerous illustrations, students will receive a good introduction to Greek culture, and especially that of Classical Athens. The accompanying *Grammar and Exercises* volume provides full grammatical support together with numerous exercises at different levels, Greek-English and English-Greek vocabularies, a substantial reference grammar and language surveys.

The Puppet Masters Emile van der Does de Willebois, J.C. Sharman, Robert Harrison, Ji Won Park, Emily Halter, 2011-11-01 This report examines the use of these entities in nearly all cases of corruption. It builds upon case law, interviews with investigators, corporate registries and

financial institutions and a 'mystery shopping' exercise to provide evidence of this criminal practice.

Studies in Political Humour Villy Tsakona, Diana Elena Popa, 2011-11-15 If politics is a serious matter and humour a funny one, this volume investigates how and why the boundaries between the two are blurred: politics can be represented in a humorous manner and humour can have a serious intent. Political humour conveys criticism against the political status quo and/or recycles and reinforces dominant views on politics. The data analysed comes from European states with different sociopolitical histories and traditions and the methodologies adopted originate in different fields (discourse analysis, folklore and cultural studies, media studies, sociolinguistics, sociology, theatre semiotics). The first part of the volume is dedicated to politicians' humour as a means of public positioning, deliberation, and eventually attack against political adversaries, while the second one involves political satire as realised in different genres: animation, impersonation, and cartoons. Last but not least, the third part shows how political humour can be manipulated in public debates or become an integral part of postmodern art.
