The Raspberry Man Janalee Tobias, 2013-12-12 One lazy summer day in the summer of 1968, a young girl discovers an enchanting backyard teeming with fruit trees, flowers, roses, and a fairy-tale castle birdhouse clustered between pine trees and a mysterious old white cottage. Nestled in the back of this secret garden is a magnificent raspberry patch. Row upon row of bright-red raspberries dot the green leaves of the raspberry plants and light up the raspberry patch like lights on a Christmas tree. There the young girl meets the raspberry man, the seventy-seven-year-old owner of this hidden wonderland, a Danish immigrant who came to United States to live the American dream. He sends her home with a bouquet of roses and a bowl of raspberries. Soon after this visit, she adopts him as her grandpa and they form a lifetime friendship. Charming illustrations help to tell this heartwarming tale, inspired by a true story, about the love that can be shared between the elderly and the young. This book also reminds us of the importance of kindness and respecting every generation and culture.

Raspberry Julie Graham,Rex Brennan,2018-11-12 Raspberry is a globally-significant soft fruit crop, with increasing interest to consumers due to its versatility and health-related constituents. In this background context, it is therefore timely to consider the present and future status of the raspberry crop, particularly with the advances in the use of molecular tools and plant phenotyping to improve our understanding of improving crop quality and fruit yields. Since the 1980s a wealth of fundamental genomics and metabolomics resources have been developed for soft fruits including linkage maps, physical maps, QTLs and expression tools. However, a number of serious and emerging challenges exist for the raspberry industry, including the plants' ability to resist major pest and disease burdens and the impact of climate change on crop production, specifically water use and water availability for soft fruit crops. This book aims to address some of these challenges by updating the information known about this important crop, its health value, the major pest and diseases which affect raspberry and approaches for their control, and the speed and precision offered by selective breeding programs by the deployment of molecular tools and linkage maps for germplasm assessment. Understanding the genetic control of commercially and nutritionally important traits and the linkage of these characteristics to molecular markers on chromosomes is the future basis of plant breeding. We will also introduce the opportunity to fast track breeding by improving the speed of phenotypic selection by utilizing imaging sensor technologies, thereby reducing the cost of years of field assessment through developing this knowledge into markers linked to key fruit traits. The chapters of this book will span the knowledge gained from the collaborations between growers, plant breeders, plant physiologists, soil scientists, geneticists, agronomists and physicists which is essential to achieve progress in improving productivity and a sustainable industry.

Visit us online at www.1stWorldLibrary.ORG - - You may contradict me as flat as a flounder, Eunice, but that won't alter the facts. There is something in telepathy - there is something in mind-reading - If you could read my mind, Aunt Abby, you'd drop that subject. For if you keep on, I may say what I think, and - Oh, that won't bother me in the least. I know what you think, but your thoughts are so chaotic - so ignorant of the whole matter - that they are worthless. Now, listen to this from the paper: 'Hanlon will walk blindfolded - blindfolded, mind you - through the streets of Newark, and will find an article hidden by a representative of The Free Press.' Of course, you know, Eunice, the newspaper people are on the square - why, there'd be no sense to the whole thing otherwise! I saw an exhibition once, you were a little girl then; I remember you flew into such a rage because you couldn't go. Well, where was I? Let me see - oh, yes - 'Hanlon - ' H'm - h'm - why, my goodness! it's to-morrow! How I do want to go! Do you suppose Sanford would take us?
