Rachael Ray 50 Rachael Ray, 2019-10-15 NEW YORK TIMES BESTSELLER • America's favorite self-taught cook opens up about the most memorable moments of her life in this candid memoir-inspired cookbook featuring 125 all-new recipes. NAMED ONE OF THE BEST COOKBOOKS OF THE YEAR BY BUZZFEED AND FOOD NETWORK "No matter the recipe, each of us changes a dish by our own preparation of it. It's the same with stories—once you put them out there, readers get to interpret them and be affected by them as they will. Ultimately, it's my hope that this book leaves the reader with that quiet smile we all get after we eat a favorite comfort food. Basically, I'm going for the afterglow of a big bowl of spaghetti."—from the Introduction As her fiftieth birthday approached, the woman who taught America how to get dinner on the table, fast, started thinking not just about what to cook that night, but how her passion for food and feeding people had developed over her first fifty years. Filled with twenty-five thoughtful essays and 125 delicious recipes, Rachael Ray 50 reads like a memoir and a cookbook at once. Captured here are the moments and dishes Rachael finds most special, the ones she makes in her own home and that you won't find on her television shows or in her magazine. Here are the memories that made her laugh out loud, or made her teary. The result is a collection that offers the perfect blend of kitchen and life wisdom, including thoughts on how we can all better serve the world and one another. Also featured within these pages are gorgeous food photography, personal photos, and Rachael's own hand-drawn illustrations, offering a revealing and intimate glimpse into her world and her every day inspiration.

Ray Marianna Coppo, 2020-05-26 A humorous picture book about the adventures of a light bulb who embarks on an enlightening journey, from the acclaimed author-illustrator of Petra. At the end of the hall, near the staircase, is a closet. In that closet lives Ray, who is a light bulb. Ray spends most of his time in darkness, which is pretty boring if you don't know how to fill it. So boring that Ray usually slips into a dreamless sleep . . . Everything changes one day when Ray is migrated into a portable lantern and taken on the trip of a lifetime. He wakes up in a much larger closet (the outside), surrounded by incredible things - too many to count! Everything is super big, and Ray has never felt so small. And in the morning, Ray makes an incredible discovery which will change his life forever. Meet Ray, a charming new character from the imaginative mind of Marianna Coppo, the creator of Petra!

Ray by Ray Nicca Ray, 2020-04-28 An essential new perspective on Nicholas Ray--legendary Hollywood director of Rebel Without a Cause--by his daughter and namesake Nicca, who examines her father's genius and demons, unraveling myths to illuminate who he really was, what drove him to create, and who, now, is Nicca Ray?

Ray Barry Hannah, 2007-12-01 "A shorthand epic of extraordinary power . . . A novel of brilliant particulars and dizzying juxtapositions" from the acclaimed southern author of Geronimo Rex (Newsweek). Nominated for the American Book Award, Ray is the bizarre, hilarious, and consistently adventurous story of a life on the edge. Dr. Ray—a womanizer, small-town drunk, vigilante, poet, adoring husband—is a man trying to make sense of life in the twentieth century. In flight from the death he dealt flying over Vietnam, Dr. Ray struggles with those bound to him by need, sickness, lunacy, by blood and by love. "This novel hangs in the memory like a fishhook. It will haunt you long after you have finally put it down. Barry Hannah is a talent to reckon with, and I can only hope that Ray finds an audience it deserves." —Harry Crews, The Washington Post Book World

Ray Charles Ruth Turk, 1996 A biography of the popular singer, who became blind as a young boy.

Nicholas Ray Patrick McGilligan, 2011-07-12 Award-winning film historian Patrick McGilligan follows his acclaimed biographies of Alfred Hitchcock and Oscar Micheaux with a revelatory look at the life of Nicholas Ray, the troubled director of In a Lonely Place, We Can't Go Home Again, and Rebel Without a Cause. McGilligan charts the cerebral struggles, astonishing adventures, and artistic triumphs that defined Ray's life, including his Hollywood collaborations with Humphrey Bogart, Robert Mitchum, James Cagney, and James Dean; his love affairs with Marilyn Monroe, Jayne Mansfield, Zsa Zsa Gabor, and Gloria Grahame; his partnerships with activist Abbie Hoffman, pornography starlet Marilyn Chambers, photographer Wim Wenders; and more. Celebrating, contextualizing, and examining Ray's life and work, McGilligan delivers a milestone of film history and offers a captivating look at one of classic cinema's most colorful figures.

Gamma-Ray Bursts Gilbert Vedrenne, Jean-Luc Atteia, 2009-03-20 Since their discovery was first announced in 1973, gamma-ray bursts (GRBs) have been among the most fascination objects in the universe. While the initial mystery has gone, the fascination continues, sustained by the close connection linking GRBs with some of the most fundamental topics in modern astrophysics and cosmology. Both authors have been active in GRB observations for over two decades and have produced an outstanding account on both the history and the perspectives of GRB research.

Investigations in the theory of reflected ray-surfaces George Frederick Childe, 1857

Ray vs. the Toons Tyrone and Jere Watson, 2012-01-19 Inhibition resides inside of us, somewhere between our desires and fears. We all have prejudices and habits that we subconsciously act out but are unaware of the reason why. These habits become second nature, and before you realize it you will be operating inside a safe zone. No one has to lock you in this place if they can convince you to never turn the knob. But who determines our safe zones? Why is there a boundary on our desires? Ray vs. the Toons is a journey outside the gates, not a physical gate but a mental gate, which each of us build as we journey through life. We are inhibited by things that we unconsciously construct, not from our own experiences but from the experiences of others. As fears and prejudices of others are projected upon us, we begin constructing this mental gate. The gate protects us from what's on the other side and gives us comfort. But there are times when our desires overtake our fears; that is the moment when we reach for the knob and turn it. There will come a time when you have to tear down the walls of prejudice and rebuild them with walls of confidence.

X-Ray Astronomy in the Exosat Era A. Peacock, 2012-12-06 Algol is a triple system containing a 70 hr eclipsing binary (K IV and B8 V) in a 694 day orbit with an A V star. The X-ray emission from this system (Schnopper et al 1976) is thought to be associated with a corona surrounding the lobe filling and synchronously rotating K IV star. This is based on the similarity of the X-ray spectrum and luminosity of this system to that of the RS CVn binaries which also contain K sub-giants with similar rotation periods and the fact that the luminosity of any coronae surrounding the B8 V and AV companion stars should not be enhanced by rapid rotation (Pallavicini et al 1980, White et al 1980). The Einstein SSS measurement showed the X-ray spectrum to be two component with 6.7 temperatures of 7.10 K and 3.10 K (White et al. 1980). As discussed by Swank et al. (1981), the problem in understanding stellar coronae in general is how to scale up the solar model to account for the enhanced

luminosities. The close to 90° inclination and similar sizes for the Band K stars of 3.6 and 3.8 R₀ respectively make Algol an ideal candidate for an X-ray eclipse measurement wherein the size of the X-ray emitting coronal structures can be directly measured. In this paper we report a continuous observation through the secondary eclipse of Algol using the EXOSAT Observatory. 2.

Ray Tracing and Beyond E. R. Tracy, A. J. Brizard, A. S. Richardson, A. N. Kaufman, 2014-02-27 This complete introduction to the use of modern ray tracing techniques in plasma physics describes the powerful mathematical methods generally applicable to vector wave equations in non-uniform media, and clearly demonstrates the application of these methods to simplify and solve important problems in plasma wave theory. Key analytical concepts are carefully introduced as needed, encouraging the development of a visual intuition for the underlying methodology, with more advanced mathematical concepts succinctly explained in the appendices, and supporting Matlab and Raycon code available online. Covering variational principles, covariant formulations, caustics, tunnelling, mode conversion, weak dissipation, wave emission from coherent sources, incoherent wave fields, and collective wave absorption and emission, all within an accessible framework using standard plasma physics notation, this is an invaluable resource for graduate students and researchers in plasma physics.

Ray & Joan Lisa Napoli, 2016-11-15 The movie *The Founder*, starring Michael Keaton, focused the spotlight on Ray Kroc, the man who amassed a fortune as the chairman of McDonald's. But what about his wife Joan, the woman who became famous for giving away his fortune? Lisa Napoli tells the fascinating story behind the historic couple. *Ray & Joan* is a quintessentially American tale of corporate intrigue and private passion: a struggling Mad Men-era salesman with a vision for a fast-food franchise that would become one of the world's most enduring brands, and a beautiful woman willing to risk her marriage and her reputation to promote controversial causes that touched her deeply. Ray Kroc was peddling franchises around the country for a fledgling hamburger stand in the 1950s—McDonald's, it was called—when he entered a St. Paul supper club and encountered a beautiful young piano player who would change his life forever. The attraction between Ray and Joan was instantaneous and instantly problematic. Yet even the fact that both were married to other people couldn't derail their roller coaster of a romance. To the outside world, Ray and Joan were happy, enormously rich, and giving. But privately, Joan was growing troubled over Ray's temper and dark secret, something she was reluctant to publicly reveal. Those close to them compared their relationship to that of Elizabeth Taylor and Richard Burton. And yet, this volatility paved the way for Joan's transformation into one of the greatest philanthropists of our time. A force in the peace movement, she produced activist films, books, and music and ultimately gave away billions of dollars, including landmark gifts to the Salvation Army and NPR. Together, the two stories form a compelling portrait of the twentieth century: a story of big business, big love, and big giving.

Laboratory Micro-X-Ray Fluorescence Spectroscopy Michael Haschke, 2014-05-08 Micro-X-ray fluorescence offers the possibility for a position-sensitive and non-destructive analysis that can be used for the analysis of non-homogeneous materials and layer systems. This analytical technique has shown a dynamic development in the last 15 years and is used for the analysis of small particles, inclusions, of elemental distributions for a wide range of different applications both in research and quality control. The first experiments were performed on synchrotrons but there is a requirement for laboratory instruments which offers a fast and immediate access for analytical results. The book discusses the main components of a μ -XRF instrument and the different measurement modes, it gives an overview about the various instruments types, considers the special requirements for quantification of non-homogeneous materials and presents a wide range of application for single point and multi-point analysis as well as for distribution analysis in one, two and three dimensions.
