Women and Religion in Zimbabwe Ezra

Chitando, Sophia Chirongoma, Kudzai Biri, 2022-07-07

This volume reaffirms the fact that religion and culture often serve as a double-edged sword, that is, they can either obstruct or enrich African women's flourishing. Drawing insights from African women's experiences of religion and culture, the authors proffer gender sensitive and life-giving applications of African religio-cultural traditions.

Women, Religion and Leadership in Zimbabwe, Volume 2 Molly Manyonganise, Ezra Chitando, Sophia Chirongoma, 2023-04-12 Zimbabwe has invested in women's emancipation and leadership while articulating a strong Pan-Africanist ideology, providing a valuable entry point into understanding the dynamics relating to women's leadership in Africa. It is also characterised by radical religious pluralism, thereby facilitating an appreciation of the impact of religion on women's leadership in Africa more generally. This volume reflects on the role of Zimbabwean women in religio-cultural leadership, with a specific focus on roles within religious organizations. It begins by examining Zimbabwean church women's leadership roles in long established faith communities. The chapters then hone in on the emergence of churches or ministries founded by women in Zimbabwe, starting from the pre-colonial era and advancing through the last forty years of independence. Hence, the book offers a comprehensive assessment of the challenges and opportunities women in leadership face in religious institutions in the

country, before exploring the impact of the pandemic on the ability of women to lead. It will make a major contribution to the advancement of scholarship of gender and leadership in emerging markets.

Renewal of Authorization to Use Pinecastle Range, Ocala National Forest ,2002

New Zealand Journal of Crop and Horticultural Science/Experimental Agriculture ,1992

Law, Religion, Health and Healing in Africa M. Christian Green, Faith Kabata, Fortune Sibanda, 2022-12-31 The Covid-19 pandemic was global in its spread and reach, as well as in its medical, social and economic effects. In many respects, the global effort to “flatten the curve” produced a flattening of experience around the world and a striking coincidence of similar experiences in countries the world over. The identity, simultaneity and uniformity of experience were also manifest in common concerns at the intersection of law and religion in many nations around the world, including Africa. The lockdowns and closure of religious worship centres – churches, mosques and religious organisations of all sorts – raised questions of freedom of religion and the related concern for freedom of assembly, along with concerns about the relation of religion to science and public health, religious channels of communication and religious provision of social services. After all, health, communications and social services are all areas in which African religious organisations play key roles. Potential tensions around these issues raised further considerations about the nature of

religion-state relations, the status of religious authority and whether religious and state actors would work together or at odds in addressing the Covid-19 pandemic.

Sexual Reformation? Manitza Kotzé, Nadia Marais, Nina Müller van Velden, 2022-02-28 Inasmuch as sex and sexuality are not words often spoken from pulpits and in academic theological circles, a vast number of utterances have been made in the name of so-called Christian values and biblical views on sex and sexuality. These are often given from moral-ethical perspectives, and seemingly very prescriptive: who should have sex with whom, when sex should take place, which purposes sex should serve--and especially, when sex is wrong. Moreover, often there is little or no recognition of the complexities surrounding human sexuality, resulting in what appears to be a blueprint for sexuality, applicable to all persons. This volume contains fourteen theological and ethical reflections by South African scholars on human sexuality, with the aim of exploring what a sexual reformation within Christian dialogue might entail. Presented in three sections--namely, systematic theological reflections, biblical reflections, and ethical reflections--the essays represent a range of topics from a variety of perspectives: Luther and marriage; sexual abuse in the Catholic Church; body theology and the sexual revolution; reproductive technologies, sexuality and reproduction; reproductive loss; hermeneutical choices and gender reformation in (South) Africa; queer engagements with bra Joseph; explorations on Paul and sex; rape culture and violent deities;

the church's moral authority and sexual ethics; practical-theological considerations regarding infertility; empirical research on masculinities in Zambia; and the lived experience of transgender people in African Independent Churches.

From Sex Differences in Neuroscience to a Neuroscience of Sex Differences: New Directions and Perspectives Belinda Pletzer, 2015

This research topic aims to integrate scattered findings on sex differences in neuroscience into a broader theory of how the human brain is shaped by sex and sex hormones in order to cause the great variety of sex differences that are commonly observed. It can be assumed that these differences didn't occur arbitrarily, but that they rather determined and still determine evolutionary success of individuals and were shaped by the processes of natural and in particular sexual selection. Therefore, sex differences are not negligible and sex difference research cannot be discriminating against one sex or the other. In fact a better understanding of the underlying causes of sex differences has great advantages for both men and women and society as a whole, not only in terms of health care, but in every aspect of life. Gender equality can only work out if it is equally well understood for men and women what their individual resources and needs are.

Therefore, it is of great importance to pave the way for identifying the underlying principles of structural and functional brain organization that cause men and women to act, think and feel differently. To this end it is of particular interest to identify possible similarities and

interrelations between sex differences that did so far stand separately, in order to investigate whether they share a common source. To understand, where a specific sex difference comes from and whether or not it is caused by the same principle as other sex differences, it is necessary to explicitly link sex differences in behavior to their neuronal correlates and vice versa link sex differences in brain structure and function to their behavioral outcomes. In particular a new understanding of male and female brain functioning may arise from findings on how sex hormones interact with various neurotransmitter systems. In the past few years several findings demonstrated that women's behavior is influenced by the sex hormone fluctuations they experience naturally during their menstrual cycle to the extent that sex differences may only be detectable in one cycle phase but not another. The study of menstrual cycle dependent effects gives important hints about which sex differences are activational and which are organizational. Additionally it only recently came to attention, that hormonal contraception may alter a women's mood, cognition and behavior as a consequence of changes in brain structure and function. The underlying mechanisms are so poorly understood that it is even hard to predict, whether hormonal contraception will mask or amplify sex differences in a given task. Since the oral hormonal contraceptive pill is meanwhile used by 100 million women worldwide and even by teenagers whose brains are not yet fully developed, the question of how the synthetic steroids contained in hormonal contraceptives act

on the brain is to be studied hand in hand with naturally occurring sex differences. This topic summarizes the current state of the art in sex difference research and gives new perspectives in terms of hypothesis generation and methodology. Both are necessary to gain a complete picture of what it is that makes a brain male or female and move towards a neuroscience of sex differences.

Advances in Dynamic Games David M. Ramsey, Jérôme Renault, 2020-11-09 This contributed volume collects talks originally given at the 18th International Symposium on Dynamic Games and Applications, held in Grenoble, France from July 9-12, 2018. Chapters present state-of-the-art research in the field of dynamic games and are written by leading experts in this active area. Featuring a broad overview of recent advances as well as a wide range of applications, this book is organized into four sections: games of conflict, evolutionary games, economic games, and games involving common interest. Within these sections, specific topics covered include: Pursuit-evasion games Partnership formation games Replicator dynamics Load balancing congestion games Equilibrium coalition structures *Advances in Dynamic Games* will be of particular interest to researchers and doctoral students studying game theory.

Solar Neutrino Physics Lothar Oberauer, Aldo Ianni, Aldo Serenelli, 2020-06-02 A guide to the fascinating interplay between particle physics and astrophysics that highlights the discovery of neutrino oscillations Written by three international experts on the topic, *Solar Neutrino*

Physics offers a review of the status of solar physics with its strong link to neutrino physics. The book explores constitutive physics and the governing equations of standard solar models. The authors also review the theory of neutrinos in the Standard Model and the related detector experiments. The book contains a summary of the results from various experiments and develops a coherent view of the current state-of-the-art of solar neutrino physics. Solar Neutrino Physics shows how solar models can be calibrated with the observational constraints of the age, mass, radius, and luminosity of the sun. The authors present general evolutionary properties of the sun as a star, past and future. They also discuss the solar neutrino production via the pp-chains and CNO-cycle, including the important role of the chemical composition of the sun. A very important source of information about the solar interior is offered by helioseismology, the study of solar oscillations. This important book: Presents a high-level overview of the field of solar neutrino physics Brings together data and their interpretation of results obtained at various solar neutrino observatories Combines the theory of nuclear reactions with solar neutrino experiments Contains a review of SNO+, JUNO, LENA, Hyper-Kamiokande, and DUNE. Written for astronomers, physicists, and high energy physicists, Solar Neutrino Physics contains a review of the field of neutrino physics, the relevant equations, and the impact of matter on the behavior of neutrino oscillations.

The Quest for Gender Equity in Leadership KeumJu

Jewel Hyun,Diphus Chosefu Chemorion,2016-07-29 The call for gender equity in leadership has become a global concern. From a Christian perspective, all forms of gender prejudice are sinful because they violate God's intention for creating both men and women in God's image. Although many Christian authors have published books and journal articles to address gender-based injustice, very few publications have approached the subject from an African perspective. This book is meant to fill the existing gap. With a specific reference to the African context, this book explores the phenomenon of equity in leadership from various dimensions, such as African culture and traditional religion, church tradition, biblical interpretation, as well as from the perspective of contemporary socio-economic and political realities in Africa. By giving vivid examples of success stories of men and women working together, the authors have demythologized the view that women cannot be leaders. In addition, this book is intended for general readership by Christian men and women throughout the globe. For universities and colleges that teach gender studies as a subject, the book can serve as a class text or reference resource. Seminaries and theological institutions will also find it handy for training and mentoring Christians to promote equity in the church, ministry, business, and family.

Names Fashioned by Gender Thenjiwe Meyiwa,Madoda Cekiso,2023-12-01 Names are very powerful and significant, especially in the African context. Across societies, there is a universal, albeit taken-for-granted fact that all human beings have

names. *Names Fashioned by Gender* is a collection of essays on onomastics—a linguistics field of study focusing on the origin, form, history and use of proper names. The study of naming potentially provides significant evidence about the role of gender in the assimilation and/or enculturation processes as personal names evoke insight into the construction of gender and personhood in African societies. The book takes intellectual course from the idea that how names are viewed and used is heavily context-dependent and gendered. It demonstrates that personal names are narratives derived from different contexts within various cultures and circumstances subsequently imposing different identities on name bearers. Through persuasive essays, this book elucidates that naming is an activity that needs to be conducted cautiously because names tend to determine the destiny and character of an individual. Print editions not for sale in Sub-Saharan Africa.

Applications of Continuous and Steady-State Methods to Root Biology John G. Torrey, Lawrence J.

Winship,2012-12-06 This book provides an excellent illustration of the interrelationship between progress in scientific methodology and conceptual advances, and its publication should contribute to further advances. It is well known that major advances in understanding often follow the development of new methods. The development of the acetylene reduction assay for nitrogenase activity provides a good example of this interrelationship between theory and methods. Theoretical knowledge led to a search for substrates for nitrogenase that could be assayed for more easily than ammonium, the normal product of the enzyme. The discovery of the reduction of acetylene to ethylene by nitrogenase provided the ideal answer to the problem by providing a rapid, specific, nondestructive, and inexpensive assay for nitrogenase activity. This assay is now used by almost every laboratory doing research on nitrogen fixation. However, further use and development of the acetylene reduction assay has shown that it can underestimate nitrogenase activity and can even give incorrect relative values under some circumstances. The major problem is that exposure of legume nodules to acetylene can cause a large increase in the resistance to oxygen diffusion into the nodule. This reduced supply of oxygen decreases the rate of nitrogenase activity within a few minutes.

Materials Processing Fundamentals Lifeng Zhang, Antoine Allanore, Cong Wang, James Yurko, Justin Crapps, 2016-12-01 This collection provides researchers and industry professionals with complete guidance on the synthesis, analysis, design, monitoring, and control of metals, materials, and metallurgical processes and phenomena. Along with the fundamentals, it covers modeling of diverse phenomena in processes involving iron, steel, non-ferrous metals, and composites. It also goes on to examine second phase particles in metals, novel sensors for hostile-environment materials processes, online sampling and analysis techniques, and models for real-time process control and quality monitoring systems.
