The Future of the Red-legged Partridge Fabián Casas,Jesús T. García,2022-09-01 There has been a recent upsurge of red-legged partridge research in most countries where the species is distributed, but no comprehensive review of that fresh and relevant multidisciplinary and international knowledge is available. In fact, this is probably the first scientific book on this important species, apart from Dick Potts' excellent works on British-introduced population, or ONCFS's (Office Nationale de la Chasse et le Faune Sauvage, France) older technical reports. This is in strong contrast with a plethora of literature in hunting magazines or non-academic books, not often precise, realistic, or well informed. Thus, the book fills a great bibliography gap that could have important social impact. The common thread of the book is the prominent role a species like this may play for research, from basic physiological or ecological knowledge to socio-economics of hunting and the rural world. The general framework of the book [11] is the important role that hunting and game management may play in both rural economies and biodiversity conservation, with the partridge as flag species, and also in identifying the "dark drift" that industrial, incorrectly deployed management, or hunting vision may have on both sustainability of resources and nature conservation at large. The final aim of the book is identifying the best future scenario, both for partridge hunters and managers as well as the general public.

Collins New Naturalist Library (121) - Partridges G R (Dick) Potts,2012-09-01 Globally, there are at least 45 species of game bird that have the word partridge in their name, but in this book G. R. Potts devotes himself to the Grey, Red-legged and Chukar Partridges, with particular emphasis on the Grey Partridge due to its well-known decline in Britain.

Partridges G. R. Potts,2012 Globally, there are at least 45 species of game bird that have the word partridge in their name, but in this book G. R. Potts devotes himself to the Grey, Red-legged and Chukar Partridges, with particular emphasis on the Grey Partridge due to its well-known decline in Britain.In this groundbreaking addition to the New Naturalist series, Potts explores how mankind and partridges have evolved together, both ultimately dependent on grasslands rather than forests. For thousands of years, both ate grass seeds and this continued until cereals largely replaced them. Hundreds of species of plant and insect that partridges and other birds eat thrived on farms for thousands of years until the dawn of the pesticides era. Since then the long decline in partridge abundance has been a barometer for biodiversity over vast swathes of the Northern Hemisphere.Highlighting the positive example of the Norfolk Estate in the Sussex Study area, Potts investigates how both Grey and Red-legged Partridge numbers have been increased, flourishing in a highly productive and profitable system of farming and an oasis in what has often looked and sounded like a desert. In a small corner of England farmland wildlife is able to thrive much as it did before pesticides were introduced.This is a complex and fascinating story, with a heady mix of hunting, farming, predation, parasites, disease and climate change. The way these factors have interacted tells us a lot

about how lesser known species have fared and how they can be conserved for the future. Potts stresses the importance of these conservation efforts, as farmers respond to the needs of an extra three billion people worldwide, not just for food but for bio-fuels. Additionally, the pressures on farmland wildlife will further intensify in the coming years.

Poultry Behaviour and Welfare Michael C. Appleby, Joy A. Mench, Barry O. Hughes, 2004 This authoritative textbook provides an introduction and guide to poultry behavior and welfare. It describes the origin and biology of the various species of bird that are of agricultural importance, as well as giving a succinct overview of their key behavior patterns. There is careful discussion of the many factors that influence their welfare, and detailed consideration of the ways in which legislation and commercial interests interact in an attempt to satisfy the many needs involved. The final chapters discuss possible future developments within the subject. The book is in part an update of a previous work, *Poultry Production Systems: Behaviour, Management and Welfare* (CABI, 1992), completely rewritten and with much new material added.

The Return of the Grey Partridge Roger Morgan-Grenville, Edward Norfolk, 2024-02-22 The Return of the Grey Partridge tells the extraordinary story of how wildlife is restored to the Arundel Estate in West Sussex. Prompted by the collapse in numbers of one species, the grey partridge of the title, the managers of the estate woke up to the devastating effect modern farming methods were having on wildlife. Following the estate through the seasons of one year, the book shows how the farm of Peppering is gradually renatured: fields are divided up with hedgerows and trees, beetle banks are built across fields, the land is manured rather than fed with artificial fertilisers, and much of it is returned to pasture. Detailed descriptions of nature give a sense of this large estate coming back to life - still very much farmland, but with a rapid increase in wildlife and biodiversity. And the partridges return. Written in collaboration with the Duke of Norfolk, owner of the Arundel Estate, this moving and hopeful account shows how modern farming can work in partnership with nature to restore not only birdlife but to benefit the whole ecosystem.

Rearing Game Birds and Gamekeeping Beth Williams, 2013 A comprehensive guide for the amateur gamekeeper, *Rearing Game Birds and Gamekeeping* provides practical step-by-step advice on how to raise pheasants and red-leg partridges, with a particular emphasis on the health and welfare of the birds. Beth Williams provides an insight into each species and covers a range of topics from choosing breeding stock and incubating eggs to rearing chicks and nurturing game. This hands-on guide draws on a wide range of accepted best practices, including experiences of overseas successes, and advises on rearing game in a low-cost and effective manner, without compromising on quality.

The Changing Status of Arable Habitats in Europe Clive Hurford, Phil Wilson, Jonathan Storkey, 2021-01-29 This edited volume

documents the current nature conservation status of arable habitats in Europe. Arable farming systems have evolved in the European landscape over more than ten thousand years and now occupy nearly 30% of the European land area. They support species that have life cycles closely synchronised with traditional cereal growing, many of which have experienced massive declines throughout Europe. For example, in Britain, of the 100 plant species exhibiting the greatest declines in the latter half of the 20th century, 47 were typical of arable land. Despite this the habitat and many of the species associated with it remains unprotected across much of Europe. The 22 chapters cover a range of topics, including: · Regional accounts describing the impact of changing agricultural practices on the arable flora; · The results of research and surveillance projects on the soil organisms, bryophyte flora, invertebrate fauna and pollinators of arable habitats; · The potential for designing multifunctional and resilient agricultural landscapes; The use of ex situ conservation to aid the reintroduction of rare arable plants; · Case studies illustrating how changing agricultural practices have impacted on bird populations in Europe; · The roles of remote sensing in monitoring agricultural systems; · How agri-environment schemes can help restore the biodiversity in arable habitats; and · A look forward at ways to help ensure the future security of the species associated with arable habitats. It is clear that the biodiversity of arable land throughout Europe has undergone major changes, particularly during the second half of the 20th century, and that these changes are continuing into the 21st century. We need to develop a deeper appreciation of farmland wildlife and its integration into farming systems to ensure its future security in a world where value is increasingly expressed in terms of material profit. This book is particularly relevant to practitioners, policy-makers and managers working in the fields of nature conservation, agri-environment schemes and land management, and to researchers working in the fields of conservation biology, terrestrial ecology, nature conservation, applied ecology, biodiversity, agriculture, agricultural ethics and environmental studies.

Suzanne and Gertrude Jeb Loy Nichols, 2019-12-10 A rare story about Suzanne, a human and Gertrude, a donkey "I write because there are things I can't sing. There are ways of writing that can't be sung. I write because I watch," says Jeb Loy Nichols, an internationally acclaimed musician and artist, about his literary art. In this unforgettable novel, Suzanne has arranged her life to suit her solitariness, living quietly on her untended hill farm. Her days are a word-shy negotiation, caught between indifference and uncertainty. Into this world comes Gertrude, a wandering donkey. Together they form an unlikely alliance; each protecting the solitude of the other. Suzanne and Gertrude is a tale of intermittent griefs and wonderments. How do we live, not just with each other, but with memories, with impermanence, with the inevitable melancholy of being? Suzanne and Gertrude is a spare novel with a profound impact.
