The Red Sea Scrolls: How Ancient Papyri Reveal the Secrets of the Pyramids Mark Lehner, Pierre Tallet, 2022-01-11 The inside story, told by excavators of the extraordinary discovery of the world's oldest papyri, revealing how Egyptian King Khufu's men built the Great Pyramid at Giza. Pierre Tallet's discovery of the Red Sea Scrolls—the world's oldest surviving written documents—in 2013 was one of the most remarkable moments in the history of Egyptology. These papyri, written some 4,600 years ago, and combined with Mark Lehner's research, changed what we thought we knew about the building of the Great Pyramid at Giza. Here, for the first time, the world-renowned Egyptologists Tallet and Lehner give us the definitive account of this astounding discovery. The story begins with Tallet's hunt for hieroglyphic rock inscriptions in the Sinai Peninsula and leads up to the discovery of the papyri, the diary of Inspector Merer, who oversaw workers in the reign of Pharaoh Khufu in Wadi el-Jarf, the site of an ancient harbor on the Red Sea. The translation of the papyri reveals how the stones of the Great Pyramid ended up in Giza. Combined with Lehner's excavations of the harbor at the pyramid construction site the Red Sea Papyri have greatly advanced our understanding of how the ancient Egyptians were able to build monuments that survive to this day. Tallet and Lehner narrate this thrilling discovery and explore how the building of the pyramids helped create a unified state, propelling Egyptian civilization forward. This lavishly illustrated book captures the excitement and significance of these seminal findings, conveying above all how astonishing it is to discover a

contemporary eyewitness testimony to the creation of the only remaining Wonder of the Ancient World.

Pyramids of the Giza Plateau Charles Rigano, 2014-12-19 The most remarkable piece of ground in the World as Flinders Petrie described the Giza Plateau. Here the Pyramid Complexes of Khufu, Khafre, and Menkaure have stood for 4,600 years. The Giza pyramids have been scientifically studied for the last 300 years; now for the first time all three are brought together in one book. Virtually all contemporary pyramid books address only Khufu's Great Pyramid. This book provides a complete detailed look at all three Giza pyramids and their complexes: the Sphinx, subsidiary pyramids, temples, boat pits, and enclosures. The descriptions are supplemented by almost 300 photos and drawings to provide the reader a detail look which can only be surpassed by being there in person with a very knowledgeable guide. But it is not just descriptions as the complexes are today, but how the early explorers entered the pyramids and what they found. In addition Charles Rigano provides new ideas on: * How Khufu was interred in his Great Pyramid. * How the first robbers gained entry and robbed Khufu's pyramid. * How Caliph Al Mamun in 820AD really penetrated the Great Pyramid. * Why Heterpheres tomb is at Giza. * Why there is a field of stone bases near Khafre's Pyramid. * The initial smaller plan for Khafre's Pyramid. * Conclusive evidence that ties the Sphinx to Khafre. * How Menkaure's Burial Chamber and Inclined Passage were built. In this book Charles Rigano combines both his on-site examinations and study of more than 200 references from the early explorers to the recent Egyptologists to form a complete picture of the Pyramid Complexes. This material is available nowhere else in a single volume.
