A Conspiracy of Whispers Ada Harper,2018-01-01 Desires and loyalties clash when a sensual assassin and an intriguing enemy agent must fight together in this exciting debut by Ada Harper. For Olivia Shaw, the danger of her assignments as a deadly Whisper agent is matched only by that of her hidden status: Liv is one of the caricae, extremely rare women capable of bearing children and therefore controlled by the Syndicate's government. When her handler sends her into the Quillian Empire, her mission is complicated by stumbling upon a kidnapping in progress. Liv is drawn deep into political upheaval when her hostage is revealed to be the infamous Red Wolf, Galen De Corvus, brother of the Quillian Empress. Worse yet, he is an altus, more sensitive than most to the pheromones of caricae. If he realizes what she is, he could expose her secret to either government and doom her to a life as breeding stock. Quillian nobleman turned operative Galen never planned to involve himself with a citizen of the cold, cruel Syn, but Olivia entices him more than she should. As they work together to protect his royal sister from a violent coup, the passionate bond between them proves to be more than mere biology. And Liv must decide if that bond is worth dropping her guard for both an enemy and an altus. This book is approximately 122,000 words One-click with confidence. STEM and the Social Good Tesha Sengupta-Irving,Maxine McKinney de Royston,2020-12-17 This compilation of empirical studies interrogates the global high-speed train of STEM education, particularly as a promise of social, economic, and political enfranchisement for marginalized communities. In this book, scholars of race, education, and learning offer a range of analyses from which to consider the who, what, and toward ends of STEM education. Together with scholarly commentaries, the studies frame STEM learning as a personal and political enterprise worthy of closer examination in the lives of children, the work of adults, and the making of nations. Thus, the studies vary in scope and scale, but coalesce in surfacing the ideologies and values underlying the rapid ingestion of STEM in schools and communities as a social good for all. Readers will journey through a Latinx student's reflections on social justice mathematics, African American primary school students studying water and justice, Indigenous families engaged in storytelling with

robotics, college STEM mentors' work with youth, an online portal created for youth in Singapore to envision a STEM-infused future; and finally, frameworks for teaching and research that engage marginalized children's histories, cultural practices and sensemaking. The socio-political grounding and visioning of these works makes this a must-read for researchers, teachers, teacher educators and policy makers in STEM. The chapters in this book were originally published in a special issue of the journal, *Cognition and Instruction*.
