Wild Swimming Frankreich Daniel Start,2018-03-28 Dieser sensationelle und vollkommen neuartige Reiseführer führt uns an wilde Seen, Flüsse und Wasserfälle in Frankreich und lässt uns das Land mit ganz neuen Augen sehen. Die Côte d'Azur zu überlaufen, der aufgewühlte Atlantik gut zum Surfen, jedoch weniger gut zum Schwimmen – aber das französische Binnenland bietet spektakuläre Badestellen, von deren Existenz wir gar nichts wussten. Ist das wirklich Frankreich und nicht Costa Rica? Drei Sommer lang bereiste der Traveler, Autor und Verleger Daniel Start mit seiner Frau das Land. Herausgekommen ist ein Brevier magischer Orte, genau solcher Orte, nach denen wir immer suchen, wenn wir auf Reisen sind. Denn in der Natur schwimmen ist eine der seltenen Dinge, die uns ein tiefes Gefühl der Verbundenheit mit der Natur – und mit uns selbst verschaffen.

Intelligent Information Processing and Web Mining Mieczyslaw A. Klopotek,2003-05-09 This edited book contains articles accepted for presentation during The Intelligent Information Processing and Web Mining Conference IIS:IIPWM'03 held in Zakopane, Poland, on June 2-5, 2003. A lot of attention is devoted to the newest developments in the area of Artificial Intelligence with special calls for contributions on artificial immune systems and search engines. This book will be a valuable source for further research in the fields of data mining, intelligent information processing, immunogenetics, machine learning, or language processing for search engines.

Anime Explosion! Patrick Drazen,2014-04-01 One of the best overviews of the anime phenomenon, its history and cultural significance, ideal for surveys and in-depth study.

A Gathering of Spirits: Japan's Ghost Story Tradition Patrick Drazen,2011-07-01 Prepare for a sampling of Japanese ghosts and spirits, from sources that include the worlds oldest novel, the urban legends of contemporary Japanese schoolchildren, movies both classic and modern, anime, manga, and more. For hundreds of years Japan has lived in a reality consisting of the real world and the spirit world; sometimes the wall between the two worlds gets thin enough for spirits to cross over. In such a reality, ghost stories have been popular for centuries. Patrick Drazen, author of *Anime Explosion*, looks at these stories: old and new, scary or funny or sad, looking at common themes and the reasons for their popularity. This book uses one Japanese ghost story tradition: the hyaku monogatari (hundred stories). In the old tradition, people tell each other one hundred ghost stories in one sitting. These hundred tales run from folklore to cartoons, but all are designed to send chills up the spine ...

Katherine Philips (1631/2-1664): Printed Poems 1667 Paula Loscocco,2017-03-02 Katherine Philips was a major seventeenth-century poet and playwright who became widely known for her innovative use of Donnean poetics to express passionate female friendship, her occasional verses on private friends and public figures, and her moral and political acuity. She had the mixed fortune of being enshrined in posthumous volumes that both celebrated and misrepresented her achievement. Fortunately recent research has clarified our understanding of who Philips was and how she conducted her literary career.

Pages from the Past M.B. Parkes,edited by P.R. Robinson,2018-02-06 In the present collection of articles by Malcolm Parkes two overarching concerns emerge: the palaeography of manuscript books in relation to what Parkes has previously called the 'grammar of legibility'; and the importance of considering the circumstances in which medieval books were produced, copied and read. The individual studies discuss the handwriting of individual scribes, and the evidence script can provide of the circumstances of a book's production, the effect of punctuation and layout of text on the reader's interpretation of a work, and the provision and production of books for communities of readers, both clerical and academic. From a discussion of the scribe of the Hereford Mappa Mundi to a comprehensive study of book provision in the medieval University of Oxford, a wealth of information is conveyed in these articles, now conveniently accessible in one volume, about books and their histories by one of the most knowledgeable of manuscript scholars today.

Web Corpus Construction Roland Schäfer,2022-05-31 The World Wide Web constitutes the largest existing source of texts written in a great variety of languages. A feasible and sound way of exploiting this data for linguistic research is to compile a static corpus for a given language. There are several advantages of this approach: (i) Working with such corpora obviates the problems encountered when using Internet search engines in quantitative linguistic research (such as non-transparent ranking algorithms). (ii) Creating a corpus from web data is virtually free. (iii) The size of corpora compiled from the WWW may exceed by several orders of magnitudes the size of language resources offered elsewhere. (iv) The data is locally available to the user, and it can be linguistically post-processed and queried with the tools preferred by her/him. This book addresses the main practical tasks in the creation of web corpora up to giga-token size. Among these tasks are the sampling process (i.e., web crawling) and the usual cleanups including boilerplate removal and removal of duplicated content. Linguistic processing and problems with linguistic processing coming from the different kinds of noise in web corpora are also covered. Finally, the authors show how web corpora can be evaluated and compared to other corpora (such as traditionally compiled corpora). For additional material please visit the companion website: sites.morganclaypool.com/wcc Table of Contents: Preface / Acknowledgments / Web Corpora / Data Collection / Post-Processing / Linguistic Processing / Corpus Evaluation and Comparison / Bibliography / Authors' Biographies
