The Automotive Industry and European Integration A. J. Jacobs, 2019-08-07

This book chronicles the divergent growth trends in car production in Belgium and Spain. It delves into how European integration, high wages, and the demise of GM and Ford led to plant closings in Belgium. Next, it investigates how lower wages and the expansion strategies of Western European automakers stimulated expansion in the Spanish auto industry. Finally, it offers three alternate scenarios regarding how further EU expansion and Brexit may potentially reshape the geographic footprint of European car production over the next ten years. In sum, this book utilizes history to help expand the knowledge of scholars and policymakers regarding how European integration and Brexit may impact future auto industry investment for all EU nations.

Fuzzy Logic for Planning and Decision Making Freerk A. Lootsma, 2013-03-14

This book starts with the basic concepts of Fuzzy Logic: the membership function, the intersection and the union of fuzzy sets, fuzzy numbers, and the extension principle underlying the algorithmic operations. Several chapters are devoted to applications of Fuzzy Logic in Operations Research: PERT planning with uncertain activity durations, Multi-Criteria Decision Analysis (MCDA) with vague preferential statements, and Multi-Objective Optimization (MOO) with weighted degrees of satisfaction. New items are: Fuzzy PERT using activity durations with triangular membership functions,

Fuzzy SMART with a sensitivity analysis based upon Fuzzy Logic, the Additive and the Multiplicative AHP with a similar feature, ELECTRE using the ideas of the AHP and SMART, and a comparative study of the ideal-point methods for MOO. Finally, earlier studies of colour perception illustrate the attempts to find a physiological basis for the set-theoretical and the algorithmic operations in Fuzzy Logic. The last chapter also discusses some key issues in linguistic categorization and the prospects of Fuzzy Logic as a multi-disciplinary research activity. Audience: Researchers and students working in applied mathematics, operations research, management science, business administration, econometrics, industrial engineering, information systems, artificial intelligence, mathematical psychology, and psycho-physics.

The Hanged Man's Tale Gerald Jay, 2021-12-07 In the shadowy back alleys and opulent homes of Paris, hard-nosed police inspector Paul Mazarelle of The Paris Directive sets out on the trail of a serial killer. A murdered man is discovered dangling inside the tunnels of a Paris canal--the only clue, the tarot card in his pockets: the Hanged Man. When an innocent suspect is railroaded into prison for the homicide, Mazarelle sets off on the hunt for the real killer. For the charming, hot-tempered, impulsive Frenchman--now back from the provinces and leading his own homicide unit out of Paris's famed Quai des Orfevres--it's an investigation that takes him far from the comforts of Beaujolais and bouillabaisse, and plunges him into an underworld of ruthless white supremacists looking for scapegoats in Paris's growing

immigrant community, corrupt cops eager to cover up a shady side business, and a conspiracy of secrets that threaten his own life. Meanwhile, Claire Girard, an irresistible and ambitious journalist at a popular tabloid, is wrapped up in the same story. On the trail of the Tarot Card killer, Mazarelle finds himself blindsided by their growing attraction. And when his team's case collides with Girard's latest scoop, and the body count keeps rising, Mazarelle himself becomes a prime suspect who must clear his own name. Gerald Jay's latest Mazarelle adventure is a riveting, fast-paced thriller about a classic French detective making his way through the dangerous streets of a very modern world.

Automotive Global Value Chain Wilson Kia Onn Wong, 2017-08-09 Today, some suppliers have grown increasingly powerful and in certain cases, earn revenues that rival or even exceed that of their automaker clients. In the pre-globalisation period, automakers wielded absolute power over their significantly smaller suppliers. This book reveals the upending of this relationship, with the gradual shift in the balance of power from automakers to their suppliers in this era of globalisation. The book examines how suppliers in the global tyres, seats, constant velocity joints (hereafter 'CVJs'), braking systems and automotive semiconductor industries have evolved into powerful oligopolies through a mix of acquisition and organic growth strategies. It also highlights how joint ventures could be strategically deployed as springboards to acquisition, as they enable firms to familiarise

themselves with their partners' markets and operations. Moreover, the book analyses the disruption stirred by the entry of well-resourced technology titans into this industry and their inevitable clash with the traditional incumbents. This book is an invaluable reference for anyone interested in learning more about the automakers' and now their suppliers' relentless quest to create market-dominating intelligent driving systems.

Strategic Corporate Negotiations Andrea Caputo, 2019-04-02 Exploring the concept of win-win agreements, this book analyses how they pose an important challenge for entrepreneurs, managers and advisors involved in complex negotiations among firms. Providing an overview and discussion of existing literature, the author further develops a theoretical framework for analysing corporate negotiations, and illustrates how this can be implemented in real-life situations. This book presents an empirical case study from the automotive industry and analyses the negotiation between Fiat Chrysler in 2009, offering practical strategies for those involved in corporate negotiations. Presenting how win-win agreements can improve competitive advantage, this book will be an invaluable read for practitioners and scholars alike.
