Marketing business to business Philippe Malaval, Christophe Bénaroya, 2005 Best-seller sur le sujet, Marketing Business to Business aborde tous les thèmes classiques du marketing appliqués aux entreprises fournissant d'autres entreprises ou collectivités locales (segmentation, positionnement, plan marketing, politique de produit, de prix, de distribution et de communication). Il développe également des sujets peu abordés en marketing mais essentiels dans un contexte B to B comme la maintenance, la veille, les normes et la qualité, le marketing vert ou la formation des clients. Cette nouvelle édition prend résolument en compte les deux visages du marketing B to B : d'un côté le marketing qualifié de récurrent, entre fournisseurs et clients réguliers pour des contrats durables et portant sur de grosses quantités, de l'autre le marketing de projet ou d'affaires, aujourd'hui en plein essor, développé pour une vente unique et portant souvent sur un projet d'envergure. La nouvelle structure en parties souligne la nécessaire continuité entre marketing études , marketing stratégique et marketing opérationnel . Le développement des partenariats public-privé et des techniques de lobbying leur vaut désormais de constituer des chapitres à part entière. Enfin, sont introduits un chapitre sur les stratégies d'alliance et un chapitre sur l'éthique et le développement durable. Les nombreux exemples ont été actualisés et complétés, notamment avec des analyses sur Areva, Club Med, Dell, Eiffage, Lafarge, Suez, Total, Valeo ou Vinci Energies. La pédagogie de l'ouvrage a été tout particulièrement soignée et les illustrations, encadrés, résumés, bibliographies complémentaires, exercices et études de cas achèvent de faire de Marketing Business to Business un manuel vivant, attractif et efficace. Cet ouvrage s'adresse aux enseignants et étudiants des universités et des écoles de gestion et d'ingénieurs désireux de maîtriser le marketing dans le contexte B to B, ainsi qu'aux responsables d'entreprises du secteur industriel et des services (directeurs marketing ou commerciaux, chefs de produits ou de projets, ingénieurs d'affaires, responsables des achats

This user-friendly text and CD-ROM package will help you to develop strong skills in presenting and interpreting statistical information in a business or management environment. Based entirely on using Microsoft Excel rather than more complicated applications, it includes a clear guide to using Excel with the key functions employed in the book, a glossary of terms and equations, plus a section specifically for those readers who feel rusty in basic maths. Each chapter has worked examples and explanations to illustrate the use of statistics in real life scenarios, with databases for the worked examples, cases and answers on the accompanying CD-ROM.

Discursive Geographies / Géographies discursives ,2005-01-01 The present collection of essays follows in the wake of recent work in cultural geography challenging the idea that maps are scientifically neutral entities, or that space, unlike time, is immobile. In defining space, place and geography as forms of textuality, the essays collected in this volume examine the ways in which postcolonial and metropolitan literary and filmic texts in French can at once inscribe and produce place and space, and thereby participate in forms of "discursive geographies." Contributors: François Bon; Alexandre Dauge-Roth; Habiba Deming; Zakaria Fatih; Jeanne Garane; Patricia Geesey; Greg Hainge; Sirène Harb; Jean-Luc Joly; Chantal Kalisa; Michel Laronde; Valérie Loichot; Mary McCullough; Michael O'Riley; Pascale Perraudin; Walter Putnam; Antoine Stéphan; Abdourahman A. Design for Transport Mike Tovey,2016-04-15 The central premise of Design for Transport is that the designer's role is to approach design for transport from the point of view of the user. People have a collection of wants and needs and a significant proportion of them are to do with their requirements for mobility. The authors show how creative designers can take a user-focused approach for a wide range of types of transport products and systems. In so doing their starting point is one of creative dissatisfaction with what is currently available, and their specialist capability is in imagining and developing new solutions which respond to that opportunity. How this is tackled varies depending on the context, and the variety of solutions produced reflects the different aspirations and needs of the people they are designing for. The chapters cover user needs and transport, design and the transport system, transport design case studies, and the case for the automobile. A conclusion briefly signals what the future for transport design might be. Lavishly illustrated throughout in four-colour, Design for Transport, is an imaginative and rigorous guide to how designers can take a user-centred and socially responsible approach to tackling a range of types

of transport, from systems to products and from bicycles to automobiles, demonstrating a rich array of solutions through case studies.

ERF B C, CP & E-Series at Work Patrick W. Dyer,2015-09-03 Patrick Dyer's eighth book in the 'at work' series takes the reader on a journey with ERF, England's last independent truck manufacturer, between the years 1975 and 1993 with the B, C, CP and E-series trucks that the Sandbach based company produced in the face of overwhelming competition from foreign manufacturers. Apart from the renowned economy, reliability and longevity of the products, the B, C, CP and E-series truck ranges were all linked by the remarkable SP cab, which combined a steel cage with bolt on SMC panels. The system was so revolutionary that ERF patented it. The low cost of design and manufacture allowed it to update and improve its cabs with each series. ERF B, C, CP & E-series at Work draws on over 200 fine photographs from the manufacturer and trucking enthusiasts, which combine with the informative text to tell the remarkable story of these ERF products through some of the most turbulent years of the company's existence.
