The Art of Return James Meyer, More than any other decade, the sixties capture our collective cultural imagination. And while many Americans can immediately imagine the sound of Martin Luther King Jr. declaring "I have a dream!" or envision hippies placing flowers in gun barrels, the revolutionary sixties resonates around the world: China's communist government inaugurated a new cultural era, African nations won independence from colonial rule, and students across Europe took to the streets, calling for an end to capitalism, imperialism, and the Vietnam War. In this innovative work, James Meyer turns to art criticism, theory, memoir, and fiction to examine the fascination with the long sixties and contemporary expressions of these cultural memories across the globe. Meyer draws on a diverse range of cultural objects that reimagine this revolutionary era stretching from the 1950s to the 1970s, including reenactments of civil rights, antiwar, and feminist marches, paintings, sculptures, photographs, novels, and films. Many of these works were created by artists and writers born during the long Sixties who were driven to understand a monumental era that they missed. These cases show us that the past becomes significant only in relation to our present, and our remembered history never perfectly replicates time past. This, Meyer argues, is precisely what makes our contemporary attachment to the past so important: it provides us a critical opportunity to examine our own relationship to history, memory, and nostalgia.

The Returning Hero Simon Hornblower, Giulia Biffis, 2018-09-04 A recurring and significant theme in ancient Greek literature is that of returns and returning, chiefly - but by no means only - of mythical Greek heroes from Troy. One main, and certainly the most 'marked', ancient Greek word for 'return' is nostos (plural nostoi), from which is derived the English 'nostalgia'. Nostos-related traditions were important ingredients of colonial foundation myths and the theme runs through both ancient Greek prose and poetry from Homer's *Odyssey* to Lykophron's *Alexandra*, also leaving traces in the historical record through the archaeological and epigraphical commemoration of nostoi, which played a central part in defining Greek ethnicity and crystallizing personal and communal identities. This volume offers a truly interdisciplinary exploration of the concept of nostos in ancient Greek culture, which draws on its contributors' expertise in ancient Greek (and Roman) history, literature, archaeology, and religion. The chapters examine both literary and material evidence in order to achieve a better understanding of the nature of Greek settlement in the Mediterranean zone, and of sometimes equivocal Greek and Roman perceptions of home, displacement, and returning. The special problems and vocabulary of exile are explored in the long Introduction, which offers an incisive yet accessible overview of the volume's key themes and sets its range of contributions clearly in context: while two chapters are concerned in different ways with emotions and personal identity, making use of the theoretical tool of place-attachment, another demonstrates that failed nostoi can be more interesting than successful examples. Evidential absence can be as important and illuminating as presence, and mythical women, underrepresented in this regard, feature extensively in several chapters, which open up a range of new perspectives on nostos.

Being a book about the production process, you learn about key issues found in the academic literature on the theory of the firm. In this case, the focus is on the global financial services industry, where the building blocks underpinning the study of industrial corporations are less relevant. You gain an understanding of how and why the production of investment returns differs from that of manufactured goods. You are provided with an analytical framework that situates financial institutions within the complex web of the intermediaries that dominate developed financial markets.
