*CCTV for Security Professionals* Alan Matchett,2002-12-23 CCTV for Security Professionals provides the information necessary to design the ideal CCTV system. The chapters are stand-alone sources of information on their subjects and are presented in logical sequence to guide the reader from basic principles to more complex for a complete system understanding. In his straight-forward and informative text, Alan Matchett approaches the camera systems from the user's point of view, providing the security manager with the knowledge to discuss the system, its desired features, and the areas of design concern within the context of an organization's business model. This can prove to be invaluable when evaluating an existing system, the use and components of a given system, or in evaluating a system design proposed by a vendor. Installers and service personnel will benefit from the functions and possibilities that are available with the various components and by gaining an understanding of their customers' needs. Newer technicians will learn how to set up the system properly, and can familiarize themselves with the technologies that go into a CCTV system. Security equipment sales personnel will also gain a better knowledge of the customer's needs as well as learn to determine exactly what questions they should be asking the customer and what the customer's responses mean. In this manner, the book will offer invaluable tips to ensure customers get exactly what they expect in a system. \* Provides a detailed explanation of CCTV components and the technology behind analog and digital CCTV systems. \* Establishes a common language for security professionals, CCTV system designers and sales personnel to use as a basis for system design. \* Provides a clear explanation of the design process and design principles.

**Strangers on the Western Front** Guoqi Xu,2011-02-18 These laborers, mostly illiterate peasants from north China, came voluntarily and worked in Europe longer than any other group. Xu explores China's reasons for sending its citizens to help the British and French (and, later, the Americans), the backgrounds of the workers, their difficult transit to Europe---across the Pacific, through Canada, and over the Atlantic---and their experiences with the Allied armies. It was the first encounter with Westerners for most of these Chinese peasants, and Xu also considers the story from their perspective: how they understood this distant war, the racism and suspicion they faced, and their attempts to hold on to their culture so far from home. --

**The Art of Midwifery** Hilary Marland,2005-09-26 The Art of Midwifery is the first book to examine midwives' lives and work across Europe in the early modern period. Drawing on a vast range of archival material from England, Holland, Germany, France, Italy and Spain, the contributors show the diversity in midwives' practices, competence, socio-economic background and education, as well as their public function and image. The Art of Midwifery is an excellent resource for students of women's history, social history and medical history.

**Embattled Ecumenism** Jill Gill,2011-09-01 The Vietnam War and its polarizing era challenged, splintered, and changed The National Council of the Churches of Christ in the U.S.A. (NCC), which was motivated by its ecumenical Christian vision to oppose that war and unify people. The NCC's efforts on the war exposed its strengths and imploded its weaknesses in ways instructive for religious institutions that bring their faith into politics. Embattled Ecumenism explores the ecumenical vision, anti-Vietnam War efforts, and legacy of the NCC. Gill's monumental study serves as a window into the mainline Protestant manner of engaging political issues at a unique time of national crisis and religious transformation. In vibrant prose, Gill illuminates an ecumenical institution, vision, and

movement that has been largely misrepresented by the religious right, dismissed by the secular left, misunderstood by laity, and ignored by scholars outside of ecumenical circles. At a time when the majority of scholarly work is committed to looking at the religious right, Gill's groundbreaking study of the Protestant Left is a welcome addition. *Embattled Ecumenism* will appeal to scholars of U.S. religion, politics, and culture, as well as historians of evangelicalism and general readers interested in U.S. history and religion.

**North American Churches and the Cold War** Paul B. Mojzes,2018-08-23 History textbooks typically list 1945–1990 as the Cold War years, but it is clear that tensions from that period are still influencing world politics today. While much attention is given to political and social responses to those first nuclear threats, none has been given to the reactions of Christian churches. *North American Churches and the Cold War* offers the first systematic reflection on the diverse responses of Canadian and American churches to potential nuclear disaster. A mix of scholars and church leaders, the contributors analyze the anxieties, dilemmas, and hopes that Christian churches felt as World War II gave way to the nuclear age. As they faced either nuclear annihilation or peaceful reconciliation, Christians were forced to take stands on such issues as war, communism, and their relationship to Christians in Eastern Europe. As we continue to navigate the nuclear era, this book provides insight into Christian responses to future adversities and conflicts.

**Everyday Zionism in East-Central Europe** Jan Rybak,2021-08-05 *Everyday Zionism* examines Zionist activism in East-Central Europe during the years of war, occupation, revolution, the collapse of empires, and the formation of nation states in the years 1914 to 1920. Against the backdrop of the Great War—its brutal aftermath and consequent violence—the day-to-day encounters between Zionist activists and the Jewish communities in the region gave the movement credibility, allowed it to win support and to establish itself as a leading force in Jewish political and social life for decades to come. Through activists' efforts, Zionism came to mean something new: Rather than being concerned with debates over Jewish nationhood and pioneering efforts in Palestine, it came to be about aiding starving populations, organizing soup-kitchens, establishing orphanages, schools, kindergartens, and hospitals, negotiating with the authorities, and leading self-defence against pogroms. Through this engagement Zionism evolved into a mass movement that attracted and inspired tens of thousands of Jews throughout the region. *Everyday Zionism* approaches the major European events of the period from the dual perspectives of Jewish communities and the Zionist activists on the ground, demonstrating how war, revolution, empire, and nation held very different meanings for people, depending on their local circumstances. Based on extensive archival research, the study shows how during the war and its aftermath East-Central Europe saw a large-scale nation-building project by Zionist activists who fought for and led their communities to shape for them a national future.

**Computational Techniques for Process Simulation and Analysis Using MATLAB®** Niket S. Kaisare,2017-09-18 MATLAB®

has become one of the prominent languages used in research and industry and often described as the language of technical computing. The focus of this book will be to highlight the use of MATLAB® in technical computing; or more specifically, in solving problems in Process Simulations. This book aims to bring a practical approach to expounding theories: both numerical aspects of stability and convergence, as well as linear and nonlinear analysis of systems. The book is divided into three parts which are laid out with a Process Analysis viewpoint. First part covers system dynamics followed by solution of linear and nonlinear equations, including Differential Algebraic Equations (DAE) while the last part covers function approximation and optimization. Intended to be an advanced level textbook for numerical methods, simulation and analysis of process systems and computational programming lab, it covers following key points • Comprehensive coverage of numerical analyses based on MATLAB for chemical process examples. • Includes analysis of transient behavior of chemical processes. • Discusses coding hygiene, process animation and GUI exclusively. • Treatment of process dynamics, linear stability, nonlinear analysis and function approximation through contemporary examples. • Focus on simulation using MATLAB to solve ODEs and PDEs that are frequently encountered in process systems.

**Truman and MacArthur** Michael D. Pearlman, 2008-03-12 Truman and MacArthur offers an objective and comprehensive account of the very public confrontation between a sitting president and a well-known general over the military's role in the conduct of foreign policy. In November 1950, with the army of the Democratic Peoples Republic of Korea mostly destroyed, Chinese military forces crossed the Yalu River. They routed the combined United Nations forces and pushed them on a long retreat down the Korean peninsula. Hoping to strike a decisive blow that would collapse the Chinese communist regime in Beijing, General Douglas MacArthur, the commander of the Far East Theater, pressed the administration of President Harry S. Truman for authorization to launch an invasion of China across the Taiwan straits. Truman refused; MacArthur began to argue his case in the press, a challenge to the tradition of civilian control of the military. He moved his protest into the partisan political arena by supporting the Republican opposition to Truman in Congress. This violated the President's fundamental tenet that war and warriors should be kept separate from politicians and electioneering. On April 11, 1951 he finally removed MacArthur from command. Viewing these events through the eyes of the participants, this book explores partisan politics in Washington and addresses the issues of the political power of military officers in an administration too weak to carry national policy on its own accord. It also discusses America's relations with European allies and its position toward Formosa (Taiwan), the long-standing root of the dispute between Truman and MacArthur.

**Church People in the Struggle** James F. Findlay, 1993 In the 1960s, the mainstream Protestant churches responded to an urgent need by becoming deeply involved with the national black community in its struggle for racial justice. The National Council of Churches (NCC), as the principal ecumenical organization of the national Protestant religious establishment, initiated an active new role by establishing a Commission on Religion and Race in 1963. Focusing primarily on the efforts of the NCC, this is the first study by an historian to examine the relationship of the predominantly white, mainstream Protestant Churches to the Civil Rights movement. Drawing on hitherto little-used and unknown archival resources and extensive interviews with participants, Findlay documents the churches' committed involvement in the March on Washington in 1963, the massive lobbying effort to secure passage of the Civil Rights Act of 1964, their powerful support of the struggle to end legal segregation in Mississippi, and their efforts to respond to the Black

Manifesto and the rise of black militancy before and during 1969. Findlay chronicles initial successes, then growing frustration as the events of the 1960s unfolded and the national liberal coalition, of which the churches were a part, disintegrated. While never losing sight of the central, indispensable role of the African-American community, Findlay's study for the first time makes clear the highly significant contribution made by liberal religious groups in the turbulent, exciting, moving, and historic decade of the 1960s.

'*A Justifiable Obsession*' Penny Bryden, 2013-04-28 'A Justifiable Obsession' traces the evolution of Ontario's relationship with the federal government in the years following the Second World War. Through extensive archival research in both national and provincial sources, P.E. Bryden demonstrates that the province's successive Conservative governments played a crucial role in framing the national agenda - although this central relationship has received little attention compared to those that have been more volatile. As such, Bryden's study sheds light on an important but largely ignored chapter in Canadian political history. Bryden focuses on the politicians and strategists who guided the province through the negotiation of intergovernmental economic, social, and constitutional issues, including tax policies, the design of the new social welfare net, and efforts to patriate the constitution. Written in a lucid, engaging style that captures the spirit of the politics of postwar Canada, 'A Justifiable Obsession' is a significant contribution to our understanding of Ontario's politics and political culture.
