The Lagacy of Canaan the Ras Shamra Texts and Their Relavance to the Old Testament John GRAY (M.A., B.D., Ph.D.),

A Commentary on Horace: Odes Book III R. G. M. Nisbet,Niall Rudd,2004-05-27 This book is a successor to the commentaries by Nisbet and Hubbard on Odes I and II, but it takes critical note of the abundant recent writing on Horace. It starts from the precise interpretation of the Latin; attention is paid to the nuances implied by the word-order; parallel passages are quoted, not to depreciate the poet's originality but to elucidate his meaning and to show how he adapted his predecessors; sometimes major English poets are cited to exemplify his influence on the tradition. In expounding the so-called Roman Odes the editors reject not only uncritical acceptance of Augustan ideology but also more recent attempts to find subversion in a court-poet. They show how Greek moralizing, particularly by the Epicureans, is applied to contemporary social situations. Poems on country festivals are treated sympathetically in the belief that the tolerant and inclusive religion of the Romans can easily be misunderstood. The poet's wit is emphasized in his addresses both to eminent Romans and to women with Greek names; the latter poems are taken as reflecting his general experience rather than particular occasions. Though Horace's ironic self-presentation must not be understood too literally, the editors reject the modern tendency to treat the author as unknowable. Although the text of the Odes is not printed separately, the headings to the notes provide a continuous text. The editors put forward a number of conjectures, most of them necessarily tentative, and in the few cases where they disagree, both opinions are summarized.

POLAR NIGHT Marine Ecology Jørgen Berge,Geir Johnsen,Jonathan H. Cohen,2020-04-08 Until recently, the prevailing view of marine life at high latitudes has been that organisms enter a general resting state during the dark Polar Night and that the system only awakens with the return of the sun. Recent research, however, with coordinated,

multidisciplinary field campaigns based on the high Arctic Archipelago of Svalbard, have provided a radical new perspective. Instead of a system in dormancy, a new perspective of a system in full operation and with high levels of activity across all major phyla is emerging. Examples of such activities and processes include: Active marine organisms at sea surface, water column and the sea-floor. At surface we find active foraging in seabirds and fish, in the water column we find a high biodiversity and activity of zooplankton and larvae such as active light induced synchronized diurnal vertical migration, and at seafloor there is a high biodiversity in benthic animals and macroalgae. The Polar Night is a period for reproduction in many benthic and pelagic taxa, mass occurrence of ghost shrimps (Caprellides), high abundance of Ctenophores, physiological evidence of micro- and macroalgal cells that are ready to utilize the first rays of light when they appear, deep water fishes found at water surface in the Polar night, and continuous growth of bivalves throughout the winter. These findings not only begin to shape a new paradigm for marine winter ecology in the high Arctic, but also provide conclusive evidence for a top-down controlled system in which primary production levels are close to zero. In an era of environmental change that is accelerated at high latitudes, we believe that this new insight is likely to strongly impact how the scientific community views the high latitude marine ecosystem. Despite the overwhelming darkness, the main environmental variable affecting marine organisms in the Polar Night is in fact light. The light regime during the Polar Night is unique with respect to light intensity, spectral composition of light and photoperiod.

Enthalpy and Internal Energy: Emmerich Wilhelm,Trevor Letcher,2017-09-12 Containing the very latest information on all aspects of enthalpy and internal energy as related to fluids, this book brings all the information into one authoritative survey in this well-defined field of chemical thermodynamics. Written by acknowledged experts in their respective fields, each of the 26 chapters covers theory, experimental methods and techniques and results for all types of liquids and vapours. These properties are important in all branches of pure and applied thermodynamics and this vital source is an important contribution to the subject hopefully also providing key pointers for cross-fertilization between sub-areas.

The Brothel of Pompeii Sarah Levin-Richardson,2019-05-23 Offers an in-depth exploration of the only assured brothel from the Greco-Roman world, illuminating the lives of both prostitutes and clients.

Arae Lindsay Watson,1991 A fundamental study of curses from a literary point of view. First the author differentiates the various types of curses found in ancient poetry; this is followed by a chronological examination of the curses, from archaic and classical Greece to Hellenistic and Roman times. The rich Hellenistic material is treated in particular detail, by placing it in its literary context and in relation to defixiones .

Virgil in the Renaissance David Scott Wilson-Okamura,2010-08-12 The disciplines of classical scholarship were established in their modern form between 1300 and 1600, and Virgil was a test case for many of them. This book is concerned with what became of Virgil in this period, how he was understood, and how his poems were recycled. What did readers assume about Virgil in the long decades between Dante and Sidney, Petrarch and Spenser, Boccaccio and

Ariosto? Which commentators had the most influence? What story, if any, was Virgil's Eclogues supposed to tell? What was the status of his Georgics? Which parts of his epic attracted the most imitators? Building on specialized scholarship of the last hundred years, this book provides a panoramic synthesis of what scholars and poets from across Europe believed they could know about Virgil's life and poetry.

Banished Voices Gareth D. Williams, 1994-10-20 This study examines the literary complexities of the poetry which Ovid wrote in Tomis, his place of exile on the coast of the Black Sea after he was banished from Rome by the emperor Augustus in A.D. 8 because of the alleged salaciousness of the *Ars Amatoria* and a mysterious misdemeanour which is nowhere explained. Exile transforms Ovid into a melancholic poet of despair who claims that his creative faculties are in terminal decline. But recent research has exposed the ironic disjunction between many of the poet's claims and the latent artistry which belies them. Through a series of close readings which offer a new analytical contribution to the scholarly evaluation of the exile poetry, Dr Williams examines the nature and the extent of Ovidian irony in Tomis and demonstrates the complex literary designs which are consistently disguised under a veil of dissimulation. Gareth Williams aims to counteract traditional scholarly antipathy to the exile poetry, which could be said to represent the last frontier in modern Ovidian studies. Scholars working in the field will welcome his insights.
