Unicornis, the Great Indian One-horned

Rhinoceros Arup Kumar Dutta,1991 This Volume Is A Comprehensive Account Of The Great Indian One-Horned Rhinoceros, Its Past History And Present Status, Generic Characteristics, Temperament, Behaviour And Habits As Well As Its Position In The Scheme Of Nature.

The Return of the Unicorns Eric

Dinerstein,2003-07-02 Beginning in 1984, Eric Dinerstein led a team directly responsible for the recovery of the greater one-horned rhinoceros in the Royal Chitwan National Park in Nepal, where the population had once declined to as few as 100 rhinos. The Return of the Unicorns is an account of what it takes to save endangered large mammals. In its pages, Dinerstein outlines the multifaceted recovery program—structured around targeted fieldwork and scientific research, effective protective measures, habitat planning and management, public-awareness campaigns, economic incentives to promote local guardianship, and bold, uncompromising leadership—that brought these extraordinary animals back from the brink of extinction. In an age when scientists must also become politicians, educators, fund-raisers, and activists to safeguard the subjects that they study, Dinerstein's inspiring story offers a successful model for large-mammal conservation that can be applied throughout Asia and across the globe.

Indian Rhinoceroses Bethany Baxter,2013-07-15 With their thick skin and pointy horns, Indian rhinoceroses are not to be messed with. They can weigh almost 5,000 pounds and are the second largest land mammal in Asia. Indian rhinoceroses look like modern day dinosaurs. These animals and their awesome armor provide a hook to introduce young readers to important concepts drawn

directly from the Life Science curriculum.

Profiles of the Greater One-horned Rhinoceros (Rhinoceros Unicornis) of Bardia National Park and Shuklaphanta Wild Reserve, Nepal Naresh Subedi, 2014

Soul of the Rhino Hemanta Mishra, 2009-09-01 This new release is a spirited yet humble account of one man's scientific career and personal journey to save the endangered rhinoceros in his native Nepal. For more info go to souloftherhino.com

Indian Rhinos and Their Babies Marianne Johnston, 1999-01-15 Describes the characteristics of the Indian rhinoceros and how mother Indian rhinos living in zoos are taught to care for their babies

The Rhinoceros and the Megatherium Juan Pimentel, 2017-01-09 How did Europeans three centuries apart respond to two mysterious beasts—a living rhinoceros previously known only from ancient texts and a nameless monster's massive bones? Juan Pimentel shows that their reactions reflect deep cultural changes but also the enduring power of image and imagination to shape our understanding of the natural world.

Asian Rhinos Mohd. Khan bin Momin Khan, Nico J. van Strien, IUCN/SSC Asian Rhino Specialist Group, 1997 There are currently three species of Asian rhino: the Indian or greater one-horned Asian rhino, the Javan or lesser one-horned Asian rhino and the Sumatran or Asian two-horned rhino. Today, all three are threatened with extinction and two, the Sumatran rhino and Javan rhino, critically so. Although the Indian rhino is to be found in greater numbers than the other two, the threats to this species nevertheless remain significant. As in the case of the African rhinos, the threats to the Asian rhinos stem from poaching for the horn, the primary demand for which is in traditional Chinese medicine but which is also a speculator's commodity in

several consumer nations. However, a further threat to these animals is also posed by the destruction of their habitat. Indeed, two of these species inhabit the tropical rainforest which is being destroyed. This action plan describes the major requirements for rhino conservation and describes some of the programmes which can and are being implemented to stem the threats to these species such as managed breeding and the in situ conservation of their habitats.

Asian Rhinos, 1989

The Asiatic One-horned Rhinoceros (Rhinoceros Unicornis) Satya Priya Sinha, Bitapi C Sinha, Qamar Qureshi, 2011-02 Shorttitle The Asiatic one-horned Rhinoceros/ Greater Indian One-horned Rhinoceros (Rhinoceros unicornis) is endangered species of Indian mega fauna. Once Indian One-horned rhinoceros (Rhinoceros unicornis) roamed over the Indus, Gangetic to Brahmaputra flood plains of the Indian sub- continent. At present the Great Indian One Horned Rhinoceros has total population of about 2800 animals in India and Nepal. In India, currently its population is restricted to four natural populations in Assam viz Kaziranga, Manas, Orang (Rajiv Gandhi WLS) and Pobitora, two natural populations in West Bengal viz Jaldapara and Gorumara and one re- introduced population in Dudhwa NP and one migratory population in Katarniaghat UP. In Nepal, the three rhino populations are in Royal Chitwan NP, Royal Bardia N.P and Sulkhaphanta WLS. The Rhino of Royal Chitwan N.P. is a natural population while Royal Bardia NP and Sukhlaphanta WLS have the re- introduced population. The Kaziranga National Park in Assam (India) has the highest population of Rhino (2084) and Pobitora WLS (84 rhinos in 16 sq km area) followed by

Royal Chitwan N.P. in Nepal (408 rhinos) in 2010.

The Rhinoceros of South Asia Kees

Rookmaaker,2024-06-12 Encyclopaedic in scope - textually, geographically, historically and visually, this is a comprehensive review of the human interactions of the three species of rhinoceros in the South Asian region. Based on over 3000 sources, records of their occurrence from prehistoric times to the present culminate in new maps of their historical distribution areas.

The Story of India's Unicorns Divyabhanusinh,Asok Kumar Das,Shibani Bose,2018 - This interdisciplinary volume traces and records the history of the One-horned Rhinoceros from prehistoric times to the present- Through rock carvings and ancient manuscripts, Mughal hunting scenes and Portuguese quilts, British illustrations and photographs of shikar, we get glimpses of India's unicorn- The Greater One-horned Rhinoceros is endemic to the Indian subcontinent and it is entirely up to India, Nepal and possibly Bhutan to ensure that this species survives for all time- While the rhino at present enjoys a 'return' of sorts in

its remaining strongholds, it is hoped that this book will generate awareness among a wider audience of the need for continuing and proactive protection of the animal and its habitat. India is blessed with a unique variety of fauna, not to mention other forms of life. If one were to look at its mega fauna alone, the country boasts of lion, tiger, leopard, elephant, bison, wild buffalo and rhinoceros - more specifically the Greater One-horned Rhinoceros, India's unicorn. Two books have preceded this one in The Story series: one on Asia's lions and the other on Asia's elephants. The Story of India's Unicorn, written by three multidisciplinary experts in the fields of natural history, art history and archaeology, is an attempt at recording the history of the animal from prehistoric times to the present, as was done in the other two books. Lucidly written and aptly illustrated, it will be of interest to the historian, the art historian, the wildlife enthusiast and the general reader. The natural habitats of all species of fauna and flora are under threat as a result of the present and ever-increasing pressure of the growing human population which stands today at 1.32 billion in India. The Greater One-horned Rhinoceros is endemic to the Indian subcontinent and it is entirely up to India, Nepal and possibly Bhutan to ensure that this species survives for all time. While the rhino at present enjoys a 'return' of sorts in its remaining strongholds, it is hoped that this book will generate awareness among a wider audience of the need for continuing and proactive protection of the animal and its habitat.
