Kavousi IIB Leslie Preston Day,Kevin T. Glowacki,2012-12-31 This is the second of three planned volumes in the final report on the cleaning and excavations at the Late Bronze Age site of Vronda near Kavousi in eastern Crete. It describes the excavation, stratigraphy, and architecture of the buildings on the slopes of the Vronda ridge: Building Complexes E, I-O-N, and L-M, Building F, and the pottery kiln, as well as areas excavated on the periphery that did not belong to any of these buildings. It also presents lists, catalogs, and images of artifacts and ecofacts that were uncovered at the site.

The Vanishing Languages of the Pacific Rim Osahito Miyaoka,Osamu Sakiyama,Michael E. Krauss,2007-04-12 This book presents the first comprehensive survey of the languages of the Pacific rim, a vast region containing the greatest typological and genetic diversity in the world. It includes the littoral regions of North and South America, Australasia, east and south-east Asia, and Japan, as well as the Pacific itself. As its languages decline and disappear, sometimes without trace, this rich linguistic heritage is rapidly eroding. In *The Vanishing Languages of the Pacific Rim* distinguished scholars report on the current state of the region's languages and provides a critical survey of the current state of the region's languages. They show what is currently known and recorded and what remains to be examined and documented. They consider which languages are the most vulnerable to extinction and what steps that can be taken to save them. Their analyses range from the regional to the local and focus on languages in a wide variety of social and ecological settings. Together they make a compelling case for research throughout the region, and show how and where this needs to be done.

Kom al-Ahmer – Kom Wasit II: Coin Finds 2012–2016 / Late Roman and Early Islamic Pottery from Kom al-Ahmer Michele Asolati,Cristina Crisafulli,Cristina Mondin,2019-12-19 This volume presents over 1070 coins (ca. 310 BC–AD 641) and 1320 examples of Late Roman and Early Islamic pottery. Kom al-Ahmer and Kom Wasit emerge as centers of an exchange network involving large-scale trade of raw materials to and from the central and eastern Mediterranean.

Studies in the Economic History of the Pacific Rim Dennis O. Flynn,A.J.H. Latham,Sally M. Miller,2002-09-11 Trade across the Pacific will be one of the dominant forces in the economy of the next century. This collection reflects

the birth of Pacific Rim history, until recently largely neglected. It addresses the development of the Pacific Rim over four centuries, combining broad historical syntheses with a range of essays on specific topics, from trade with Hong Kong to British overseas banking. It will form a major contribution to this rapidly expanding new field.

Networks, Markets, and the Pacific Rim W. Mark Fruin, 1998-11-19 Despite the negative press Asian economies have received in connection with the recent financial crisis, their record of spectacular growth over the past few decades remains irrefutable. In an effort to provide a rich, textured analysis of these economies, editor W. Mark Fruin presents a collection of essays that explores the wide range of network organizations that have been established in the Pacific Rim. Conventional studies of economic organization have tended to center on markets and hierarchies, the two forms of organization most common in the West. But today the world moves too quickly and too unpredictably for the idealized organizations of microeconomic theory to keep up. It is no accident that the region that has generated the world's most explosive economic growth is also the region where network organizations--sets of independent actors who cooperate frequently for mutual advantage--are most pervasive. Rapid economic, social, and technical changes favor the formation of network organizations, and vice versa. The contributors to this volume identify and elucidate four basic types of networks: naturally occurring networks, market replacing networks, hierarchy replacing networks, and market enhancing networks. They show how all of these have been shaped by the history, government, legal system, and culture of each country under consideration. These network organizations allow the authors to compare and contrast network forms in China, Japan, South Korea, Taiwan, and the United States according to features such as degrees of formalization, rule definition, and market conformance. The works collected here make an important contribution to a networks-markets- hierarchies framework that recognizes and emphasizes the diversity of organizational forms and behaviors. A unique resource for scholars and professionals in the fields of management and economics, this book enables a complex analysis of one of the world's fastest growing and most theoretically challenging regions.

Ceramics of Postclassic Cholula, Mexico Geoffrey G. McCafferty,2001-12-31

As the center for the religious cult of Quetzalcoatl, Cholula played a prominent role in shaping events of central Mexico's Postclassic period. Yet confusion over historical events in Cholula itself have limited its place in recent archaeological considerations of Mesoamerica. Since ceramic sequences are the backbone of archaeological chronologies, this confusion ultimately relates to problems in previous attempts to order archaeological time with ceramics. This book provides an innovative new classification of Cholula ceramics, based on artifact assemblages from primary depositional contexts recovered from the UA-1 excavations. A detailed and well-illustrated description of ceramic types is provided to construct a new classification system. These types are then seriated using collections from house floors and trash middens to suggest a new sequence spanning the Tlachiualtepetl

(700-1200 CE) and Cholollan (1200-1550 CE) periods. The polychrome ceramics of Cholula have been described as among the most beautiful of Mesoamerica, employing vibrant colors to represent complex religious iconography of the Mixteca-Puebla stylistic tradition. By defining type and subtype variations in the polychrome ceramics, a foundation is created for a refined chronology as well as for recognizing intra-societal variability.
