The Importance of Being Interested Robin Ince, 2022-09

Robin Ince's Bad Book Club Robin Ince, 2010 Is hideous prose and ghastly poetry more fabulous than great literature? Determined to find out, award-winning comedian Robin Ince has spent most of the 21st century rummaging through charity shops, jumble sales, and even the odd skip to compile the defining collection of the world's worst ? inadvertently hilarious ? books. Among the many genres it explores, the book will guide you through the hinterland of celebrity autobiography, unearthing underappreciated classics such as those by It Ain't Half Hot Mum's Don Estelle and the brother of a former PM (MAJOR MAJOR). It offers a detailed study of romance sub-genres, from the equine (DIAMOND STUD) to the gynaecological (SIGN OF THE SPECULUM). And it will prove invaluable to anyone who wants to know THE SECRETS OF PICKING UP SEXY GIRLS. Above all, the Book Club is a manual - almost a life guide - training you up for membership of the Grand Order of Curators of Books That Should Never Have Been. Join the club.

Rutherford and Fry's Complete Guide to Absolutely Everything (Abridged) Adam Rutherford, Hannah Fry, 2022-10-13 In Rutherford and Fry's comprehensive guidebook, they tell the complete story of the universe and absolutely everything in it - skipping over some of the boring parts. This is a celebration of the weirdness of the cosmos, the strangeness of humans and the fact that amid all the mess, we can somehow make sense of life. Our brains have evolved to tell us all sorts of things that feel intuitively right but just aren't true- the world looks flat, the stars seem fixed in the heavenly firmament, a day is 24 hours... This book is crammed full of tales of how stuff really works. With the power of science, Rutherford and Fry show us how to bypass our monkey-brains, taking us on a journey from the origin of time and space, via planets, galaxies, evolution, the dinosaurs, all the way into our minds, and wrestling with some truly head-scratching questions that only science can answer- What is time, and where does it come from? Why are animals the size and shape they are? What is a thought? How horoscopes work (Spoiler- they don't, but you think they do) Does my dog love me? Why nothing is truly round Do you need your eyes to see?

Bibliomaniac Robin Ince, 2023-10 In this warm and witty celebration of the written word, the popular comedian and presenter takes the reader on a journey across Britain as he explores his lifelong love of books and bookshops.

I'm a Joke and So Are You Robin Ince, Stewart Lee, 2018-10-04 Robin Ince has a good life. As a successful comedian, presenter, and writer, he's got a job that you are probably jealous of. So, why did he find himself stuck on a train platform in rural Northumberland, swearing maniacally, punching his own leg, vowing never to do stand-up again? Was he having an existential crisis? He didn't know. But he wanted to find out. Insightful, witty, and often just plain weird, this book charts his journey to

discover why he's made the choices he did in life, and what makes us who we are. Why did Robin become a comedian? Why did you become an accountant (sorry)? Why are we like we are? Informed by interviews with a bevy of neuroscientists, comedians, psychologists and doctors, Robin looks back on his life and turns his comedic observational skills on himself - exploring the key psychological we all ask ourselves. How does our childhood shape our life choices? Do we all have a need to perform? Are we more than our brains? Is failing good for us? Did our parents f* & k us up? A primer to psychology and neuroscience without the textbooks, this fascinating book will amuse, inform, and give you an invaluable insight into yourself (and Robin), while also treating you to his hilarious musings on the human condition--Publisher description

Your Friend Forever Zena Barrie, 2021-04-29 Preston, 1981. Maud, who is twelve and lives with her dysfunctional parents and her elder brother, spends a lot of her time in her bedroom writing letters to her favourite popstar, Tom Harding, the lead singer of a punk band called Horsefly. No one really understands her or tries to - and she thinks Tom just might have some answers to her many, many questions...

The Trouble with Science Robin Ian MacDonald Dunbar, 1995 Robin Dunbar asks whether science really is unique to Western culture, even to humankind. He suggests that our trouble with science may lie in the fact that evolution has left our minds better able to cope with day-to-day social interaction than with the complexities of the external world.

Stranger Than We Can Imagine John Higgs, 2015-11-10 "An illuminating work of massive insight" on the complex ideas and events that initiated the historical shift between the 19th and 20th centuries (Alan Moore, author of *V for Vendetta* and *Watchmen*). "An always-provocative view of an era that many people would just as soon forget . . . an absorbing tour of the 20th century." —Kirkus Reviews In *Stranger Than We Can Imagine*, John Higgs argues that before 1900, history seemed to make sense. We can understand innovations like electricity, agriculture, and democracy. The twentieth century, in contrast, gave us relativity, cubism, quantum mechanics, the id, existentialism, Stalin, psychedelics, chaos mathematics, climate change and postmodernism. In order to understand such a disorienting barrage of unfamiliar and knotty ideas, Higgs shows us, we need to shift the framework of our interpretation and view these concepts within the context of a new kind of historical narrative. Instead of looking at it as another step forward in a stable path, we need to look at the twentieth century as a chaotic seismic shift, upending all linear narratives. Higgs invites us along as he journeys across a century "about which we know too much" in order to grant us a new perspective on it. He brings a refreshingly non-academic, eclectic and infectiously energetic approach to his subjects as well as a unique ability to explain how complex ideas connect and intersect—whether he's discussing Einstein's theories of relativity, the Beat poets' interest in Eastern thought or the bright spots and pitfalls of the American Dream.

In at the Deep End Kate Davies, 2019 A fresh, funny, audacious debut novel about a Bridget Jones-like twenty-something who discovers that she may have simply been looking for love -- and, ahem, pleasure -- in all the wrong places (aka: from men)--

The Infinite Lives of Maisie Day Christopher Edge, 2019-04-09 As in Madeleine L'Engle's *A Wrinkle in Time*, math and science inform this mind-bending mystery about a girl who must work with the laws of the universe and trust the love of her family if she is to set her world right. It's the morning of Maisie's tenth birthday, and she can't wait to open her presents. Maisie is not a typical kid. What she wants most for her birthday are the things she needs to build her own nuclear reactor. But she wakes to an empty house, and outside the front door is nothing but an unsettling, all-consuming blackness--a shifted reality. Even for super-smart Maisie, these puzzling circumstances seem out of her control . . . or are they? A CLIP Carnegie Medal Children's Book Award Nominee A heartbreaking, head-melting science fiction mystery from the superlative Christopher Edge.--The Guardian [Edge] . . . has a magical way of distilling difficult concepts [like] relativity, gravity, time and space, infinity. . . .He weaves these ideas into a high-energy thriller.--The Times (UK) Gripping, terrifying and eye-poppingly original. Grabs hold of your brain--then tugs at your heart. --Jonathan Stroud, author of the bestselling *Bartimaeus Trilogy*

Ask an Astronaut Tim Peake, 2017-10-19 The awe-inspiring Sunday Times Bestseller from astronaut Tim Peake Shortlisted for the British Book Award 2018 'Amazing . . . A brilliant book' Chris Evans, BBC Radio 2 Have you ever thought of becoming an astronaut? Ask an Astronaut is Tim Peake's personal guide to life in space, based on his historic Principia mission, and the thousands of questions he has been asked since his return to Earth. How does it feel to orbit the earth ten times faster than a speeding bullet? What's it like to eat, sleep and go to the toilet in space? And where to next - the moon, mars or beyond? From training to launch, historic spacewalk to re-entry, Tim has a fascinating answer to everything you ever wanted to know. He reveals for readers of all ages the extraordinary secrets, cutting-edge science, and everyday wonders of life onboard the International Space Station. 'Everything you ever wanted to know about life in space' Times

Supernormal Meg Jay, 2017-11-14 Clinical psychologist and author of The Defining Decade, Meg Jay takes us into the world of the supernormal: those who soar to unexpected heights after childhood adversity. Whether it is the loss of a parent to death or divorce; bullying; alcoholism or drug abuse in the home; mental illness in a parent or a sibling; neglect; emotional, physical or sexual abuse; having a parent in jail; or growing up alongside domestic violence, nearly 75% of us experience adversity by the age of 20. But these experiences are often kept secret, as are our courageous battles to overcome them. Drawing on nearly two decades of work with clients and students, Jay tells the tale of ordinary people made extraordinary by these all-too-common experiences, everyday superheroes who have made a life out of dodging bullets and leaping over obstacles, even as they hide in plain sight as doctors, artists, entrepreneurs, lawyers, parents, activists, teachers, students and readers. She gives a voice to the supernormals among us as they reveal not only How do they do it? but also How does it feel? These powerful stories, and those of public figures from Andre Agassi to Jay Z, will show supernormals they are not alone but are, in fact, in good company. Marvelously researched and compassionately written, this exceptional book narrates the continuing saga that is resilience as it challenges us to consider whether -- and how -- the good wins out in the end.

The Lonely Passion of Judith Hearne Brian Moore, 2011-08-17 The Lonely Passion of Judith Hearne is an unflinching and deeply sympathetic portrait of a woman destroyed by self and circumstance. First published in 1955, it marked Brian Moore as a major figure in English literature (he would go on to be short-listed three times for the Booker Prize) and established him as an astute chronicler of the human soul. Judith Hearne is an unmarried woman of a certain age who has come down in society. She has few skills and is full of the prejudices and pieties of her genteel Belfast upbringing. But Judith has a secret life. And she is just one heartbreak away from revealing it to the world.

Good Thinking David Robert Grimes, 2021-03-30 Good Thinking is our best defense against anti-vaccine paranoia, climate denial, and other dire threats of today In our ever-more-polarized society, there's at least one thing we still agree on: The world is overrun with misinformation, faulty logic, and the gullible followers who buy into it all. Of course, we're not among them—are we? Scientist David Robert Grimes is on a mission to expose the logical fallacies and cognitive biases that drive our discourse on a dizzying array of topics—from vaccination to abortion, 9/11 conspiracy theories to dictatorial doublespeak, astrology to alternative medicine, and wrongful convictions to racism. But his purpose in Good Thinking isn't to shame or place blame. Rather, it's to interrogate our own assumptions—to develop our eye for the glimmer of truth in a vast sea of dubious sources—in short, to think critically. Grimes's expert takedown of irrationality is required reading for anyone wondering why bad thinking persists and how we can defeat it. Ultimately, no one changes anyone else's mind; we can only change our own—and give others the tools to do the same.
