The Historiography of the First Russian Antarctic Expedition, 1819-21 Rip Bulkeley, 2021-04-26 This book looks at the different ways in which Russian historians and authors have thought about their country's first Antarctic expedition (1819-21) over the past 200 years. It considers the effects their discussions have had on Russia's Antarctic policy and may yet have on Antarctica itself. In particular, it examines the Soviet decision in 1949, in line with the cultural policies of late Stalinism, to revise the traditional view of the expedition in order to claim that it was Russian seamen that first sighted the Antarctic mainland in January 1820; this claim remains the official position in Russia today. The author illustrates, however, that the case for such a claim has never been established, and that attempts to make it damaged the work of successive Russian historians. Providing a timely assessment of Russian historiography of the Bellingshausen expedition and examining the connections between the priority claim and national policy goals, this book represents an important contribution to the history of the Antarctic.

*International Industrial Networks and Industrial Restructuring in Central and Eastern Europe* S. Radosevic, Bert M. Sadowski, 2004-08-03 International Industrial Networks and Industrial Restructuring in Central and Eastern Europe analyses the role of international industrial networks in industrial restructuring and corporate growth in central Europe, Russia and Ukraine. It shows that two distinct patterns of international industrial integration - domestic vs. foreign led modernisations - have developed in these two regions which have significant effects on patterns of growth and integration of these economies. International Industrial

Networks and Industrial Restructuring in Central and Eastern Europe is based on a number of industry and firm case studies which are analysed and interpreted within the current international business and political economy literature. The publication provides valuable insights to managers and policy-makers who are interested in understanding different strategic options for business activity in Central and East European countries. For the academic reader, it offers a new perspective on international, industrial networks in which theories on strategic management and on industry restructuring and corporate growth are merged into a new view of growth and transformation process.

**Russian Jews Between the Reds and the Whites, 1917-1920** Oleg Budnitskii,2012-07-24 In the years following the Russian Revolution, a bitter civil war was waged between the Bolsheviks, with their Red Army of Workers and Peasants on the one side, and the various groups that constituted the anti-Bolshevik movement on the other. The major anti-Bolshevik force was the White Army, whose leadership consisted of former officers of the Russian imperial army. In the received—and simplified—version of this history, those Jews who were drawn into the political and military conflict were overwhelmingly affiliated with the Reds, while from the start, the Whites orchestrated campaigns of anti-Jewish violence, leading to the deaths of thousands of Jews in pogroms in the Ukraine and elsewhere. In *Russian Jews Between the Reds and the Whites, 1917-1920*, Oleg Budnitskii provides the first comprehensive historical account of the role of Jews in the Russian Civil War. According to Budnitskii, Jews were both victims and executioners, and while they were among the founders of the Soviet state, they also played an important role in the

establishment of the anti-Bolshevik factions. He offers a far more nuanced picture of the policies of the White leadership toward the Jews than has been previously available, exploring such issues as the role of prominent Jewish politicians in the establishment of the White movement of southern Russia, the Jewish Question in the White ideology and its international aspects, and the attempts of the Russian Orthodox Church and White diplomacy to forestall the establishment of a Jewish state in Palestine. The relationship between the Jews and the Reds was no less complicated. Nearly all of the Jewish political parties severely disapproved of the Bolshevik coup, and the Red Army was hardly without sin when it came to pogroms against the Jews. Budnitskii offers a fresh assessment of the part played by Jews in the establishment of the Soviet state, of the turn in the policies of Jewish socialist parties after the first wave of mass pogroms and their efforts to attract Jews to the Red Army, of Bolshevik policies concerning the Jewish population, and of how these stances changed radically over the course of the Civil War.

The Politics of Space Eligar Sadeh, 2010-11 The pace of space exploration has long been dictated by political motivations. This book helps to explain why this is so in the post-Cold War era. Combining essays, a glossary of terms, tables and statistics, this new title from Routledge comes as a welcome addition to this increasingly popular topic. The book covers theories and concepts, as well as current issues gives a background to international and national space agencies contains essays that cover military, commercial and governmental actors in space politics.

Microsatellites as Research Tools F.-B. Hsiao, 1999-03-12 In order to reflect the increasing importance and interest of the microsatellites in high technology and scientific applications in space, the

Colloquium on Microsatellites as Research Tools was organized to promote its usage and technology development and to foster the international cooperation, especially in the area of the Asia Pacific region. Attended by 150 participants from 18 countries the colloquium was organized into five major themes: regional development, lessons learned, innovations, scientific applications, and education. A special session was organized as well by the organizing committee and supported by the National Space Program Office to present its development of the Taiwan's satellite program and the current status of ROCSAT-1 which is scheduled to be launched at the beginning of 1999. Two main conclusions were drawn from the material presented: microsatellite in general is a very good means for doing space research and technology development, and a suitable vehicle to promote international collaborations.

*The Soyuz Launch Vehicle* Christian Lardier, Stefan Barensky, 2013-03-12 "The Soyuz Launch Vehicle" tells the story, for the first time in a single English-language book, of the extremely successful Soyuz launch vehicle. Built as the world's first intercontinental ballistic missile (ICBM), Soyuz was adapted to launch not only Sputnik but also the first man to orbit Earth, and has been in service for over fifty years in a variety of forms. It has launched all Soviet manned spacecraft and is now the only means of reaching the International Space Station. It was also the workhorse for launching satellites and space probes and has recently been given a second life in French Guiana, fulfilling a commercial role in a joint venture with France. No other launch vehicle has had such a long and illustrious history. This remarkable book gives a complete and accurate description of the two lives of Soyuz, chronicling the recent

cooperative space endeavors of Europe and Russia. The book is presented in two parts: Christian Lardier chronicles the “first life” in Russia while Stefan Barensky explores its “second life,” covering Starsem, the Franco-Russian company and implementation of technology for the French Guiana Space Agency by ESA. Part One has been developed from Russian sources, providing a descriptive approach to very technical issues. The second part of the book tells the contemporary story of the second life of Soyuz, gathered from Western sources and interviews with key protagonists. “The Soyuz Launch Vehicle” is a detailed description of a formidable human adventure, with its political, technical, and commercial ramifications. At a time when a new order was taking shape in the space sector, the players being the United States, Russia, Europe and Asia, and when economic difficulties sometimes made it tempting to give up, this book reminds us that in the global sector, nothing is impossible.

**U. S.-Russian : cooperation in space** ,1995 The recent broad political rapprochement between the United States and the nations of the Former Soviet Union (FSU) has transformed the environment for cooperation on space projects, and led to cooperative programs in space with Russia and other FSU states that would have been unimaginable just a few years ago. Chief among these are the high-profile human spaceflight cooperative activities involving the Space Shuttle-Space Station Mir dockings and the International Space Station. This report surveys the potential benefits and drawbacks of expanded cooperation with Russia and other nations of the FSU in space activities, and examines the impacts of closer cooperation on U.S. industry and U.S. national security concerns. Such cooperation has begun to yield scientific, technological, political, and economic benefits to the

United States. However, the political and economic risks of cooperating with the Russians are higher than with the United States' traditional partners in space. Cooperation in robotic space science and earth remote sensing is proceeding well, within the stringent limits of current Russian (and U.S.) space budgets. Including Russia in the International Space Station program provides technical and political benefits to the space station partners, but placing the Russian contribution in the critical path to completion also poses programmatic and political risks.
