DAVID FLETCHER

- 🔖 **The Rolls-Royce Armoured Car** David Fletcher,2012-04-20 The first Rolls-Royce armoured car was a privately owned vehicle fitted with a machine-gun and a limited amount of armour plate, used by the Royal Naval Air Service in Flanders in 1914. By 1915, nearly 100 had been built and turned over to the Army. From then on, as Sir Albert Stern said ‘They searched the world for war’, operating as far apart as the northwest frontier of India, the Middle East and southern Africa. The cars were fast, quiet and reliable but above all powerful. ‘A Rolls in the desert is above rubies,’ said Lawrence of Arabia. After World War I, the War Office continued to produce the Rolls-Royce while tinkering with the design. These further cars served all across the Empire, including in Ireland and even later Shanghai, returning for a final brief appearance in the early stages of World War II.This book tells the complete story of the Rolls-Royce Armoured Car, following its design and development as it fought from theatre to theatre during World War I and the turbulent inter-war years.

- 🔖 **Rolls-Royce Armoured Car** David Fletcher,2017-03-01 The Rolls-Royce Armoured Car is almost a legend: introduced by the Royal Naval Air Service in 1914 for shore patrols, modified versions were still in service with the British Army’s 11th Hussars in the North African desert in 1940-41. Between the wars they were used for policing duties by the Royal Air Force in Iraq, Egypt and India.

- 🔖 **British Armoured Car Operations in World War I** Bryan Perrett,2023-08-17 Readers have come to expect a level of detail and critical rigour from the established military historian and author Bryan Perrett. They will not be disappointed at all here by this new publication. Focussing predominantly on the British armoured car units of World War One, it also untangles many fascinating strands forming the history of modern warfare. Full of detail, it acquaints the reader with the complete history of the armoured car, from invention onwards, setting the history of its Great War service career firmly in context. Well written in an accessible style, this publication serves as an impressive tribute to the armoured car, one of the most effective weapons utilised by the allies during the course of the Great War.

- 🔖 **Masters of Mayhem** James Stejskal,2018-07-19 “Written with great accuracy, detail, enthusiasm, and insight . . . a new perspective on the well-trodden story of the Arab Revolt” (Military History Matters on its Book of the Year, Silver Award-winner). Striking where the enemy is weakest and melting away into the darkness before he can react. Never confronting a stronger force directly, but using audacity and surprise to confound and demoralize an opponent. Operations driven by good intelligence, area knowledge, mobility, speed, firepower, and detailed planning, and executed by a few specialists with indigenous warriors—this is unconventional warfare. T. E. Lawrence was one of the earliest practitioners of modern unconventional warfare. His tactics and strategies were used by men like Mao and Giap in their wars of liberation. Both kept Lawrence’s Seven Pillars of Wisdom close at hand. This book examines the creation of the “Hedgehog” force, looks at the formation of armored car sections and other units, and focuses on the Hejaz Operations Staff, the Allied officers and men who took Lawrence’s idea and prosecuted it against the Ottoman Turkish army, assisting Field Marshal Allenby to achieve victory in 1918. Stejskal concludes with an examination of how Hedgehog influenced special operations and unconventional warfare, including Field Marshal Wavell, the Long Range Desert Group, and David Stirling’s SAS. “Makes a convincing case that the roots of modern special operations, particularly effective guerrilla warfare, are to be found in British participation in the Arab Revolt against Ottoman Turkish rule during WWI.” —Publishers Weekly

The knot of us, officers and men, English, Arabs and Turks, crowded round him and watched his face anxiously. As he realised that he, a private, commanded in this emergency, even the stubble on his jaw seemed to harden in sullen determination.’ T.E. Lawrence - The Seven Pillars of Wisdom
- 🔖 **The Magic of a Name: The Rolls-Royce Story, Part 1** Peter Pugh,2015-04-02 The Magic of a Name tells the story of the first 40 years of Britain’s most prestigious manufacturer - Rolls-Royce. Beginning with the historic meeting in 1904 of Henry Royce and the Honourable C.S. Rolls, and the birth in 1906 of the legendary Silver Ghost, Peter Pugh tells a story of genius, skill, hard work and dedication which gave the world cars and aero engines unrivalled in their excellence. In 1915, 100 years ago, the pair produced their first aero engine, the Eagle which along with the Hawk, Falcon and Condor proved themselves in battle in the First World War. In the second the totemic Merlin was installed in the Spitfire and built in a race against time in 1940 to help win the Battle of Britain. With unrivalled access to the company’s archives, Peter Pugh’s history is a unique portrait of both an iconic name and of British industry at its best.
- 🔖 **Dry Wolf** Wilbur Smith,2018-01-01 An action-packed adventure set in 1930s Africa from global bestseller Wilbur Smith “They recognised in each other that same restlessness that was always driving them on to new adventure, never staying long enough in one place or at one job to grow roots, unfettered by offspring or possessions, by spouse or responsibilities, taking up each new adventure eagerly and discarding it again with our qualms or regrets. Always moving onwards — never looking backwards.” The wartime race to save a country... When Jake Barton, American engineer, teams up with English gentleman and hustler Gareth Swales to sell five battered old Bentleys in 1930s East Africa, neither of them could have imagined that they’d soon be attempting to smuggle the vehicles into Ethiopia to support the war effort, in return for a huge reward. But to do this, they’ll have to manoeuvre past several extremely hostile European forces, as well as managing their feelings for Vicky Camberwell, the beautiful journalist who has been sent with them to report on the brutal violence of the Italian invasion of Ethiopia. The three adventurers are about to discover that some battles are more than they can handle...

- 🔖 **Through Mobility We Conquer** George Hofmann,2006-07-03 The U.S. Cavalry, which began in the nineteenth century as little more than a mounted reconnaissance and harrying force, underwent intense growing pains with the rapid technological developments of the twentieth century. From its tentative beginnings during World War I, the eventual conversion of the traditional horse cavalry to a mechanized branch is arguably one of the greatest military transformations in history. Through Mobility We Conquer recounts the evolution and development of the U.S. Army’s modern mechanized cavalry and the doctrine necessary to use it effectively. The book also explores the debates over how best to use cavalry and how these discussions evolved during the first half of the century. During World War I, the first cavalry theorist proposed combining arms coordination with a mechanized force as an answer to the stalemate on the Western Front. Hofmann brings the story through the next fifty years, when a new breed of cavalrymen became cold war warriors as the U.S. Constabulary was established as an occupation security-police force. Having reviewed thousands of official records and manuals, military journals, personal papers, memoirs, and oral histories—many of which were only recently declassified—George F. Hofmann now presents a detailed study of the doctrine, equipment, structure, organization, tactics, and strategy of U.S. mechanized cavalry during the changing international dynamics of the first half of the twentieth century. Illustrated with dozens of photographs, maps, and charts, Through Mobility We Conquer examines how technology revolutionized U.S. forces in the twentieth century and demonstrates how perhaps no other branch of the military underwent greater changes during this time than the cavalry.
