The Army of the Roman Republic Mike
Dobson,2007-02-08 The main source of archaeological evidence for Late Roman Republican camps is a complex of installations around the Iberian city of Numantia in Spain, excavated by Adolf Schulten in the early 1900s. This book reassesses Schulten and concludes that much of his interpretation is questionable. Radically different alternative reconstructions making use of recent fieldwork are presented for several of the sites. A discussion of dating evidence leads to alternative dates being offered for some of the camps. To aid interpreting the sites, army organisation and art of encampment for the period of the Numantine Wars is discussed. This study gives added importance to the sites at Numantia,

for they not only form the main source of archaeological evidence for Late Republican camps, but provide evidence for the form of camp for both the late manipular army and the early cohort one.

Beric the Briton G. A. Henty, 2019-11-21 *Beric the Briton* is an adventure and historical fiction novel dedicated to the topic of the Roman invasion of Britain. It tells the story of the courageous resistance of the British people to the Romans. The story is a great example of the narrational talent of A. Henty. Traditionally, it contains the past era's romantics, many unexpected turns, and exciting twists.

A Companion to the Archaeology of the Roman Republic Jane DeRose Evans, 2013-03-29 *A Companion to the Archaeology of the Roman Republic* offers a diversity of perspectives to explore how differing approaches and methodologies can contribute to a greater understanding of the formation of the Roman Republic. Brings together the experiences and ideas of archaeologists from around the world, with multiple backgrounds and areas of interest. Offers a vibrant exploration of the ways in which archaeological methods can be used to explore different elements of the Roman Republican period. Demonstrates that the Republic was not formed in a vacuum, but was influenced by non-Latin-speaking cultures from throughout the Mediterranean region. Enables archaeological thinking in this area to be made accessible both to a more general audience and as a valuable addition to existing discourse. Investigates the archaeology of the Roman Republican period with reference to material culture, landscape, technology,
