**Significant Objects** Joshua Glenn,Rob Walker,2012-08-06 100 EXTRAORDINARY STORIES ABOUT ORDINARY THINGS SIGNIFICANT OBJECTS: A Literary and Economic Experiment Can a great story transform a worthless trinket into a significant object? The Significant Objects project set out to answer that question once and for all, by recruiting a highly impressive crew of creative writers to invent stories about an unimpressive menagerie of items rescued from thrift stores and yard sales. That secondhand flotsam definitely becomes more valuable: sold on eBay, objects originally picked up for a buck or so sold for thousands of dollars in total — making the project a sensation in the literary blogosphere along the way. But something else happened, too: The stories created were astonishing, a cavalcade of surprising responses to the challenge of manufacturing significance. Who would have believed that random junk could inspire so much imagination? The founders of the Significant Objects project, that's who. This book collects 100 of the finest tales from this unprecedented creative experiment; you'll never look at a thrift-store curiosity the same way again. **The Emergence of Daoism** Gil Raz,2012-03-15 At the core of Daoism are ancient ideas concerning the Way, the fundamental process of existence (the Dao). Humans, as individuals and as a society, should be aligned with the Dao in order to attain the fullness of life and its potential. This book presents the history of early Daoism, tracing the development of the tradition between the first and the fifth centuries CE. This book discusses the emergence of several Daoist movements during this period, including the relatively well-known Way of the Celestial Master that appeared in the second century, and the Upper Clarity and the Numinous Treasure lineages that appeared in the fourth century. These labels are very difficult to determine socially, and they obscure the social reality of early medieval China, that included many more lineages. This book argues that these lineages should be understood as narrowly defined associations of masters and disciples, and it goes on to describe these diverse social groupings as 'communities of practice'. Shedding new light on a complex and multifaceted phenomenon, the formation of Daoism as a new religion in early medieval China, this book presents a major step forward in Daoist Studies.

Nature Loves to Hide: An Alternative History of Philosophy Paul S. MacDonald,2019-04-05 An alternative history of philosophy has endured as a shadowy parallel to standard histories, although it shares many of the same themes. It has its own founding texts in the late ancient Hermetica, from whence flowed three broad streams of thought: alchemy, astrology, and magic. These thinkers' attitude toward philosophy is not one of detached speculation but of active engagement, even intervention. It appeared again in the European Middle Ages, in the Renaissance with Rabelais, Paracelsus, Agrippa, Ficino, and Bruno; and in the early modern period with John Dee, Robert Fludd, Jacob Böhme, Thomas Browne, Kenelm Digby, van Helmont, and Isaac Newton. In the 18th-19th centuries, this book considers Lichtenberg's Fragments, Berkeley's Siris, Swedenborg, Hegel, von Baader, and great Romantics such as Novalis, Goethe, S. T. Coleridge, and E. A. Poe, as well as Nietzsche; and in the 20th century it turns to the great modernist literature of Fernando Pessoa, Robert Musil, Ernst Bloch, and P. K. Dick.
