**Assessment Strategies for Online Learning** Dianne Conrad, Jason Openo, 2018-07-15  
Assessment has provided educational institutions with information about student learning outcomes and the quality of education for many decades. But has it informed practice and been fully incorporated into the learning cycle? Conrad and Openo argue that the potential inherent in many of the new learning environments being explored by educators and students has not been fully realized. In this investigation of a variety of assessment methods and learning approaches, the authors aim to discover the tools that engage learners and authentically evaluate education. They insist that moving to new learning environments, specifically those online and at a distance, afford opportunities for educators to adopt only the best practices of traditional face-to-face assessment while exploring evaluation tools made available by a digital learning environment in the hopes of arriving at methods that capture the widest set of learner skills and attributes.

**Social Work, Mental Health, and Public Policy in Diverse Contexts** Sheying Chen, 2023-09-30 The discipline of social policy, oftentimes deemed a part of social work as a profession, was born in the West. Unlike social policy that started with the post-war idea of a welfare state in the mid-20th century, social work traces its roots to individual casework pioneered by the Charity Organization Society (COS), early social administration including state-wide poverty relief (an advocacy effort of the COS but with deep roots in the English Poor Laws of the 17th century), and social action emphasizing political activities to improve social conditions (originating from the Settlement House Movement which began in the 1880s). The development of social work is historically intertwined with that of public welfare, philanthropy, and charity and is an inherently international subject. This conception is broader than “international social work” as a discrete field of professional practice, which crosses geopolitical borders and all levels of social and economic organizations with a focus on development. However, each nation has a story of its own in terms of professionalization of social work in the evolution of public welfare and philanthropic/charitable undertaking within its particular economic, political, social, and cultural settings. A wide-ranging and in-depth study of various (especially non-Western) country cases is essential to an adequate, comprehensive understanding of the social work profession, which is also a basic requirement of its value of diversity. China is undoubtedly an important case with the largest population on earth. It’s also unique in view of so-called Chinese characteristics which are sometimes fundamentally different from other (particularly Western) societies. It’s even intriguing given the country’s lengthy, complex

history and its recent, rapid rise to a global superpower with a claim of national goals and core values that seem to be rather considerable to social work as a helping profession. Therefore, any significant lessons learned from the Chinese experiences would help with a better international understanding and further advancement of social work and public welfare at a global scale.

**Designing Intersectional Online Education** Xeturah M. Woodley, Mary F. Rice, 2022-02-14 Designing Intersectional Online Education provides expansive yet accessible examples and discussion about the intentional creation of online teaching and learning experiences that critically center identity, social systems, and other important ideas in design and pedagogy. Instructors are increasingly tasked with designing their own online courses, curricula, and activities but lack information to support their attention to the ever-shifting, overlapping contexts and constructs that inform students' positions within knowledge and schooling. This book infuses today's technology-enhanced education environments with practices derived from critical race theory, culturally responsive pedagogy, disability studies, feminist/womanist studies, queer theory, and other essential foundations for humanized and socially just education. Faculty, scholars, technologists, and other experts across higher education, K-12, and teacher training offer fresh, robust insights into how actively engaging with intersectionality can inspire designs for online teaching and learning that are inclusive, intergenerational, anti-oppressive, and emancipatory.

*Carnivorous Cupid* Stephanie Rose,2020-03-03 Eros. Also known as Cupid. Greek god of love and sexual desire. He's all grown up now. And he's on a mission to provoke chaos, starting with humans. Instead of producing love, his arrows now produce hunger. Actual hunger. Cannibalistic, beastly, monstrous hunger. Carnivorous. Is the world ready for a raging Eros? Who can stop the angry god of love from eradicating the human race, two soulmates at a time?\*\*\*Magnificent cover by Stacey Willis
