The History and Description of Rotterdam and Its Environs Thomas Marshall (of Rotterdam.),1844

The Port of Rotterdam H. A. van Ysselsteijn,1908

The Port of Rotterdam Marinke Steenhuis,2015 The Port of Rotterdam' presents the past, present and future of this port, which for many is unknown territory. The work on the port is never done. From the standpoints of economics, landscape and logistics, the port is described and displayed in all its diversity. The book navigates along the places where impressive feats of port engineering are designed, where trends become visible and where the new landscape takes shape. An international comparison places Rotterdam alongside nine other world ports. The book also shows how Rotterdam's tough image was carefully constructed. From Maasvlakte II to the Fruithavens, from the floating bird sanctuary at De Slufter to the RDM, and from the Botlek to the Kop van Zuid neighbourhood, we are presented with portraits of more than 40 special places, many interviews and port stories; photographs by Jannes Linders and Siebe Swart show the unique and often mesmerizing facets of the harbour landscape.

Coming to Terms with Superdiversity Peter Scholten,Maurice Crul,Paul van de Laar,2018-11-26 This open access book discusses Rotterdam as clear example of a superdiverse city that is only reluctantly coming to terms with this new reality. Rotterdam, as is true for many post-industrial cities, has seen a considerable backlash against migration and diversity: the populist party Leefbaar Rotterdam of the late Pim Fortuyn is already for many years the largest party in the city. At the same time Rotterdam has become a majority minority city where the people of Dutch descent have become a numerical minority themselves. The book explores how Rotterdam is coming to terms with superdiversity, by an analysis of its migration history of the city, the composition of the migrant population and the Dutch working class population, local politics and by a comparison with Amsterdam and other cities. As such it contributes to a better understanding not just of how and why super-diverse cities emerge but also how and why the reaction to a super-diverse reality can be so different. By focusing on different aspects of superdiversity, coming from different angles and various disciplinary backgrounds, this book will be of interest to students and scholars in migration, policy sciences, urban studies and urban sociology, as well as policymakers and the broader public.

Rotterdam. Architectural Guide Anneke Bokern,2021-07-15 Rotterdam is the second largest city in the Netherlands and prides itself on being its architecture capital. The first thing that most visitors notice is the many high-rises, which give the city its billing as 'Manhattan on the Maas'. But there is much more to Rotterdam than glossy prestige projects. World-famous for its harbour, which is currently the biggest in Europe, Rotterdam is a very dynamic metropolis: experimental, slightly rough around the edges, and studded with hidden gems. This architecture guide presents more than 150 selected buildings in Rotterdam, ranging from the few remaining from the Golden Age to modern classics and contemporary projects. It covers famous highlights, but also lesser-known interventions, such as small infill and self-build projects. The buildings are arranged in six tours through

different areas of the city - ideal for discovering by bike. In addition to an introduction to the historical development of the city, the guide also includes a chapter on the most momentous event in the history of Rotterdam: the bombing of the city centre during the Second World War and its subsequent reconstruction. An interview with renowned Rotterdam-based architect Kees Christiaanse provides an insider's view on recent developments.

The Declining Birth Rate in Rotterdam J. Sanders,2013-03-09 In the years after the war the problem of population and especially the birth-rate movements excited general interest in all countries. In the Netherlands also all kinds of scientific men occupied themselves with this subject; not only economists, sociologists and theologians but also medical men studied the population problem in all its various aspects. It has appeared that it is only possible to obtain a complete analysis of the population problem by making a careful scientific investigation of every part of it. Evidently this was also the author's conception of the problem. By examining 25000 families he submitted the birth-rate movement of a large town to a scientific investigation. Neither political nor religious or other than scientific motives prompted him in undertaking this work; the examination was begun and ended quite objectively which lends this book its value. For only an objective examination of such a complex phenomenon like the birth-rate movement is of importance for science. The examination was inspired by the working program of the International Union for the scientific Investigation of Population Problems. It produces surprising results and shows in figures how natality presented itself in a metropolis like Rotterdam during the last fifty years. It is to be hoped that this study may be followed by many similar investigations, also for the country.

Colonialism and Slavery Geert Oostindie,2022-01-19 A surprising look at the history and legacy of imperialist Rotterdam. Dutch imperialism transformed Rotterdam, Netherlands from a murky wetland into Europe's largest seaport. Today, as the so-called New Rotterdammers flock to the urban center from former colonies, the city's complex ties to slavery around the world demand increased scrutiny. Gathering insights from an interdisciplinary group of scholars, *Colonialism and Slavery* confronts the lasting impact of colonization on contemporary Rotterdam's economy, politics, architecture, and art.

Rotterdam Architecture City Paul Groenendijk,Piet Vollaard,2015 Rotterdam ranks among the top international architectural destinations. And with good

reason: the Markthal, the new Central Station and De Rotterdam, along with such established icons as the Kunsthal and the Van Nelle Factory are just some of the architectural magnets drawing international architecture lovers to the city on the Maas. In addition to the 100 best buildings, this architecture guide also directs visitors to the city's most interesting locales, including entertainment and dining out in an architectural setting and the cultural haunt of Witte de Withstraat.

Erasmus of Rotterdam William Barker, 2021-09-16 The first English-language popular biography of widely influential northern Renaissance scholar Erasmus of Rotterdam in twenty years. Erasmus of Rotterdam came from an obscure background but, through remarkable perseverance, skill, and independent vision, became a powerful and controversial intellectual figure in Europe in the early sixteenth century. He was known for his vigorous opposition to war, intolerance, and hypocrisy, and at the same time for irony and subtlety that could confuse his friends as well as his opponents. His ideas about language, society, scholarship, and religion influenced the rise of the Reformation and had a huge impact on the humanities, and that influence continues today. This book shows how an independent textual scholar was able, by the power of the printing press and his wits, to attain both fame and notoriety. Drawing on the immense wealth of recent scholarship devoted to Erasmus, Erasmus of Rotterdam is the first English-language popular biography of this crucial thinker in twenty years.

Struggling for Leadership: Antwerp-Rotterdam Port Competition between 1870–2000 Reginald Loyen, Erik Buyst, Greta Devos, 2002-10-07 The present volume contains the proceedings of an international conference on the economic history of the seaports of Antwerp and Rotterdam (1870-2000). This venue was held at Antwerp on 10-11 May 2001 and was hosted by the Antwerp Port Authority. This international conference aimed at confronting the development of both ports. In the course of the last century and a half, economic growth in the ports of Antwerp and Rotterdam has been staggering. Maritime economic historians, economists and geographers alike have investigated the development of both ports extensively, but separately. So far, only a limited number of attempts have been made to analyse Rotterdam-Antwerp port history from a comparative perspective. The papers presented at the conference provide a challenging starting point to - certain how and why both ports reacted differently to virtually the same economic and political stimuli. By bringing together both historians, economists and lawyers with different fields of interest, we have attempted to put the history of the ports of Antwerp and Rotterdam in a broader international and comparative perspective.

Strategy as Force Tom Daamen, 2010 In European urban development practices throughout Europe, there is a recurring need for new perspectives that provide insight into the complexity involved in the realization of projects. This need exists particularly around prestigious projects, where the tension between planning ambitions on the one hand, and the reality of conflicting interests and tight budgets on the other reaches its highest point. In the Netherlands, it is also likely that this tension will not decrease in the coming years. Reason enough for an investigation into strategies for urban development projects. This thesis combines several existing scientific insights around the phenomenon 'strategy'. Here, strategy is recognized as force. The term force emphasizes that a strategy, as opposed to a plan, provides those involved with the capacity to respond to the continuously

changing reality of an urban development project. Thus, an effective strategy not only consists of making plans, but also includes three other strategic activities: venturing, learning, and visioning. These insights are then specified on the basis of the remarkable case of Rotterdam CityPorts - a project between city and port in which political and economic forces are especially amplified. This leads the thesis to develop a comprehensible theoretical model that reflects the complexity occurring in the realization of contemporary urban development projects. This strategy-as-force model is useful for both scientists and practitioners
