Chemical Bonding Richard Dronskowski, 2023-10-04 Modern DFT simulations of solids and molecules are typically based on the mighty plane-wave pseudopotential combination. Despite being numerically efficient, it does not allow for chemical conclusions unless the electronic structure is unitarily transformed into atomic orbitals. This primer for chemists and as well for physicists and engineers shows how to simply extract the chemistry and, hence, truly understand a plethora of real-world materials. The goal of this humorous primer entertaining to read is to truly serve but not repel the reader. Recent in-person and also virtual summer schools in Europe and Asia have demonstrated the need for such a primer, also to be used for self-training

Transitional Justice and Corporate Accountability from Below Leigh A. Payne, Gabriel Pereira, Laura Bernal-Bermúdez, 2020-04-30 Bruno Tesch was tried and executed for his company's Zyklon B gas used in Nazi Germany's extermination camps. This book examines this trial and the more than 300 other economic actors who faced prosecution for the Holocaust's crimes against

humanity. It further tracks and analyses similar transitional justice mechanisms for holding economic actors accountable for human rights violations in dictatorships and armed conflict: international, foreign, and domestic trials and truth commissions from the 1970s to the present in every region of the world. This book probes what these accountability efforts are, why they take place, and when, where, and how they unfold. Analysis of the authors' original database leads them to conclude that 'corporate accountability from below' is underway, particularly in Latin America. A kind of Archimedes' lever places the right tools in weak local actors' hands to lift weighty international human rights claims, overcoming the near absence of international pressure and the powerful veto power of business.

Before Jutland James V Goldrick,2015-05-15 Before Jutland is a definitive study of the naval engagements in northern European waters in 1914–15 when the German High Sea Fleet faced the Grand Fleet in the North Sea and the Russian Fleet in the Baltic. Author James Goldrick reexamines

one of the key periods of naval operations in the First World War, arguing that a focus on the campaign on the western front conceals the reality that the Great War was also a maritime conflict. Combining new historical information from primary sources with a comprehensive analysis of the operational issues, this book is an extensive revision of *The King's Ships Were at Sea*, Goldrick's earlier work on this naval campaign. In all, *Before Jutland* shows not only what happened, but how the various navies evolved to meet the challenges that they faced during the Great War and whether or not that evolution was successful.

Women, Business and the Law 2018 World Bank Group, 2018-04-11 How can governments ensure that women have the same employment and entrepreneurship opportunities as men? One important step is to level the legal playing field so that the rules for operating in the worlds of work and business apply equally regardless of gender. *Women, Business and the Law 2018*, the fifth edition in a series, examines laws affecting women's economic inclusion in 189 economies worldwide. It tracks progress that has been made over the past two years while identifying opportunities for reform to

ensure economic empowerment for all. The report updates all indicators as of June 1, 2017 and explores new areas of research, including financial inclusion.

Political Economy and Imperial Governance in Eighteenth-Century Britain Heather

Welland, 2021-06-15 This book examines the relationship between imperial governance and political economy in eighteenth-century Britain, particularly in Canada and Ireland. It is concerned with the way economic ideology and party politics were mutually constitutive; and with the way extra-parliamentary interests both facilitated, and were co-opted into, strategies of governance and commercial regulation. Rather than treat political economy as a pre-existing intellectual orthodoxy that shaped imperial policymaking, it focuses on the ways in which economic thought was generated in moments of imperial crisis – especially those where politicians, commercial interest groups, and pamphleteer economists

were forced to wrestle with the tensions between economic growth, political authority, and social stability. By rooting economic discourse and debate in specific problems of imperial commerce and administration, and by highlighting the many different actors and negotiations that produced economic policy, it argues that the transition from mercantilism to liberalism – the shift from protectionism to free trade – is a flawed description of eighteenth-century developments in economic thought.

Crossword Lists & Crossword Solver Anne Stibbs Kerr,2009-01-01 Anyone who regularly tackles challenging crossword puzzles will be familiar with the frustration of unanswered clues blocking the road to completion. Together in one bumper volume, Crossword Lists and Crossword Solver provide the ultimate aid for tracking down those final solutions. The Lists section contains more than 100,000 words and phrases, listed both alphabetically and by number of letters, under category headings such

as Volcanoes, Fungi, Gilbert & Sullivan, Clouds, Cheeses, Mottoes, and Archbishops of Canterbury. The lists are backed up with a comprehensive index, which also guides the puzzler to associated tables - e.g. Film Stars; try Stage and Screen Personalities. The Solver section contains more than 100,000 potential solutions, including plurals, comparative and superlative adjectives, and inflections of verbs. The list extends to first names, place names, technical terms, compound expressions, abbreviations, and euphemisms. Grouped according to number of letters - up to fifteen - this section is easy to use and suitable for all levels of crossword puzzle. At the end a further 3,000 words are listed by category, along with an index of unusual words.

Leisure Activities in the Outdoors Mandi Baker, Neil Carr, Emma J. Stewart, 2021-10-13 The benefits of being outdoors in a leisure context are widely acknowledged across a range of disciplinary perspectives (including tourism, therapeutics, education and recreation). These benefits include the

development of: health and wellbeing; social skills; leadership and facilitation skills; personal, emotional and reflective abilities; confidence and identity creation. Drawing on a variety of perspectives, geographies and approaches, this book explores the opportunities that leisure in the outdoors provides for learning, developing and challenging. The authors in this collection challenge dominant discourses of outdoor leisure through their selection of outdoor activities, theoretical approaches and modes of representation. All offer fresh insights and thinking into how leisure in the outdoors can be understood. The book covers a range of outdoor conceptualisations that challenge the reader to think deeply and broadly about the common threads which bind the broad field of outdoor leisure together. The experiences explored in this book range from suburban outdoors to wild places, surfing to mindful reflection, and trail walking to Nordic skiing, and encompass a broad spectrum of people.

The Reckoning Jacob Soll, 2014-04-29 For centuries, the importance of financial accounting has been well understood. Essential to building businesses, states, and even empires, accounting has also helped leaders measure their power and craft their policies. When practiced poorly or neglected,

accounting has contributed to cycles of destruction, as the 2008 financial crisis has made all too clear. In *The Reckoning*, award-winning historian Jacob Soll shows how the use and misuse of financial bookkeeping has determined the fate of entire societies. In the right hands, accounting has created social stability, good governance, and economic prosperity. In the wrong hands, good accounting practices have often been subverted, with disastrous results ranging from financial losses and debt to complete economic collapse. From the Medici bankers to the director of finances under Louis XVI, from the Industrial Revolution to the Stock Market Crash of 1929 and the Great Recession, *The Reckoning* demonstrates that civilizations are only as strong as their bookkeepers.

Equity and Trusts Alastair Hudson, 2021-11-29 Alastair Hudson's *Equity and Trusts* is an ideal textbook for undergraduate courses on the law of trusts and equitable remedies. It provides a clear, current and comprehensive account of the subject. The author's enthusiasm and expertise shine through, helping to bring to life an area of the law which students often find challenging. The tenth edition of *Equity and Trusts* remains the most comprehensive and up-to-date coverage of the law of

Equity and Trusts, while still a lively and thoughtful account of the issues raised by it. This book has been cited as being authoritative in the courts of numerous countries. The tenth edition is supported by the author's website at www.alastairhudson.com with brand new resources including: • short podcasts discussing and clarifying key topics from within the book, which cover an entire course; • complete lecture recordings made specifically to accompany this book; • video documentaries bringing to life selected key topics; • a host of other online materials and study guides new for 2021.

News About the Von Boetticher Family Jurgen von Boetticher, 2016-06-30 Friedrich Boetticher, second son of Carl and Emilie Boetticher, moved from Riga, the capital of Latvia, to Germany in March 1849. Here he bought a farm, got married, and then sold the estate and moved back Latvia with his wife in September 1853 to live in his parents house during the winter months. Here his wife gave birth to their first child, Walter, in November 1853. In the spring, Friedrich moved back to Germany with his family to establish an art and book business. When he was an adult, Walter von Boetticher, a medical doctor, came to visit his place of birth and to meet his relatives in Courland (a region in Latvia, also

known as Kurland). Talking to his uncle Emil von Boetticher, he suggested that they research and write the first News about the von Boetticher Family. Walter wrote the first book about the history of the Courlandic branch of the von Boetticher family. Emil von Boetticher then wrote about his life and family with the help of numerous letters he had found that were written some 50 years earlier. This great work makes up the second book Both men did outstanding work for all the future generations of the von Boetticher family. The original books were printed in Bautzen, Germany, in 1891/92. These were then reprinted in Hannover, Germany, in 2012. The books were translated between 2013 and 2015 from the original German text in the reprinted edition.
