MacLeod, Bernard Mees, 2006 A fresh examination of one of the most contentious issues in runic scholarship - magical or not? The runic alphabet, in use for well over a thousand years, was employed by various Germanic groups in a variety of ways, including, inevitably, for superstitious and magical rites. Formulaic runic words were inscribed onto small items that could be carried for good luck; runic charms were carved on metal or wooden amulets to ensure peace or prosperity. There are invocations and allusions to pagan and Christian gods and heroes, to spirits of disease,

and even to potential lovers. Few such texts are completely unique to Germanic society, and in fact, most of the runic amulets considered in this book show wide-ranging parallels from a variety of European cultures. The question of whether runes were magical or not has divided scholarship in the area. Early criticism embraced fantastic notions of runic magic - leading not just to a healthy scepticism, but in some cases to a complete denial of any magical element whatsoever in the runic inscriptions. This book seeks to re-evaluate the whole question of runic sorcery, attested to not only in the medieval Norse literature dealing with runes but primarily in the fascinating magical texts of the runic inscriptions themselves. Dr MINDY MCLEOD teaches in the Department of Linguistics, Deakin University, Melbourne; Dr BERNARD MEES teaches in the Department of History at the University of Melbourne.

The Sword in the Age of Chivalry Ewart

Oakeshott, 1998 The Resplendent image of the medieval knight is concentrated in the symbolism of his sword. The straight, two-edged, cross-hilted knightly sword of the European middle ages was an object of vital importance, a lethal weapon on the battlefield and a badge of chivalry in that complex social code. Ewart Oakeshott draws on his extensive research and expert eye (and hand, for he has a special sense for the feel of a sword) to develop a typology for and recount the history of the sword, from the knightly successors of the Viking weapon to the emergence of the Renaissance sword - that is, roughly from 1050 to 1550. Within this time-span, two distinct groups of swords successively evolved. Problems of dating are acute, and evidence is adduced from literature and art as well as from

archaeology, for a sword (or some parts of a sword) could have been in use several generations after it first saw battle. To deal with such overlap, Ewart Oakeshott develops, refines and illustrates a detailed typology of swords which takes in entire swords, pommel-forms, cross-guards, and the grip and scabbard.
