Soviet Armoured Cars 1936–45 Jamie

Prenatt,2020-10-29 The armoured car has an important place in the early history of Soviet armoured fighting vehicles (AFVs) – they were the most important AFV during the Russian Civil War and figured prominently in the mechanization of the Red Army that began in late 1929. The 1930s saw the development and production of a wide variety of armoured cars, which were used extensively in Soviet conflicts from then on. They saw service in the Spanish Civil War, in the 1939 Manchurian conflict with Japan, and in the occupation of the Baltic states and the invasion of Poland and Finland. Although many of its armoured cars were lost in the early months following the German invasion in June 1941, Russia continued with its armoured car development program, and the final model, the BA-64, was accepted for service in 1942 with over 9,000 built before production ended in 1946. This detailed book provides a survey of Russian armoured cars from 1936 to 1945, focusing on the history, design, and specifications of the wheeled armoured cars that entered series production, including the rail variants and tracked BA-30. Packed with photographs, cross-sections, and stunning battleplates, this is a comprehensive guide to some of the Red Army's fastest AFVs.

Soviet Life ,1967

Russian and Soviet Tanks 1914-1941 Maximino

Argüelles Martinez,2014-02-17 About the evolution

of the Soviet offensive doctrine during World War II. Where did this doctrine and armored formations that takes practice arise?. Why was the USSR as a nation which in 1940 developed a tank as advanced as the T-34?. 100 pages trying to answer these and other questions with a description of the principal armored vehicles and the formations in which were integrated from its beginnings in the Russian Empire until June 22, 1941.

AK273 WWI THE FIRST MECHANIZED WAR , This book provides a comprehensive and complete view of the crude beginnings and fast evolution of armored warfare during the Great War. It includes historical texts illustrated with period photographs, and detailed colour profiles of each

of the most outstanding models. Also included is a brief reference to the evolution of military aviation during the Great War, with colour profiles of the most important fighter planes used by all contenders. As a bonus, the book offers a worldwide exclusive; a fantastic collection of large format black & white photographs, never before published; surely, such an amazing photo collection will inspire modellers into making accurate dioramas and vignettes of the First World War; the first mechanized war.

Russian Motor Vehicles Maurice A. Kelly, 2009-07
There has been nothing published outside of Russia concerning the activities of its motor industry, by 1937 the Soviets had become the largest producers of motor vehicles in Europe, albeit with the help of Henry Ford. The author decided to concentrate on the work of the pioneers in Czarist Russia, for their efforts were more diverse than those of their counterparts in the Soviet era. However, one Soviet motor car which was an indigenous product has been included to illustrate how the industry might have evolved if Henry Ford had not been approached. This is a comprehensive overview of all facets of vehicle production from the early days to the final demise of the Soviet Union. All the manufacturers of motor vehicles, certain accessories, military machines, and even aero engines are recorded in this unique book.

A Daughter of the "Enemy of the People" Valery Dunaevsky, 2015-10-28
The title of my book *A Daughter of the 'Enemy of the People'* reflects a situation of the 1930's in the USSR when in the height of the Stalin purges millions of the

innocent people were arrested and labeled 'The Enemies of the people.' My maternal grandfather happened to be one of the hapless victims of that witch hunt. In the book I am addressing the related events of the Stalin repressions, WWII, Holocaust, emigration from the USSR and immigration to the USA. The book is dedicated to my late mother, 1920-2010, and her life is shown in connection with mine and some of my other relatives. Particularly I am outlining there my maternal grandmother who was a free lance playwright and poetess. Also, the book gave me an opportunity to highlight the image of my maternal uncle Vitold Shmulian. He was a mathematics doctor who served as an artillery officer in the Soviet Army, and despite the hardship of war he was able to continue his mathematical studies. And literally from the trenches of war he sent his treatises back into the USSR academy of science. He was killed at the liberation of Warsaw. He is still well known in the mathematical circles. His name could be found in the Internet. (His name can also be found under the title The theorem of Krein-Shmulian). My mother was from Odessa and father was from Rostov-on -Don where they lived before the war. In October of 1941 they were able to escape the approaching German army. Rostov was taken by the Germans on Nov. 21 but in few days it was recaptured by the Soviet Army. During their stay in Rostov, the Nazis immediately initiated anti-Jewish actions, but they were small in scale. In July of 1942 Rostov fell to Germans the second time. At that time the mass atrocities were committed against Jewish population and against

many other segments of civil population and prisoners of war. My book captures some of these events. One of the main goals of the book is to show interesting and good people (who happened to be my relatives) and who could serve as role models for younger generation.

Lenin's Roller Coaster David Downing, 2017 Winter 1917: As a generation of Europe's young men perish on the fronts, British spy Jack McColl is assigned a dangerous sabotage mission deep in Central Asia where German influence is strong. Meanwhile, the woman he loves, Caitlin, is in Bolshevik Russia, thrilled to cover the Revolution. Caitlin knows Moscow is where she is meant to be - even if she is putting her life at risk. But years of bloody war have taken their toll on all of Europe, and Jack and Caitlin's relationship may become another casualty. Can a revolutionary love a spy? And if she does, will it cost one of them their lives?

Russian Aviation and Air Power in the Twentieth Century John Greenwood,Von Hardesty,Robin Higham,2014-06-11 In the light of new archival material the editors take a fresh look at Russian aviation in the twentieth century. Presenting a comprehensive view of Russian aviation, from its genesis in the late czarist period to the present era, the approach is essentially chronological with a major emphasis on the evolution of military

aviation. The contributions are diverse, with appropriate attention to civilian and institutional themes.

Dictatorship of the Air Scott W.

Palmer, 2006-07-31 Focusing on one of the last untold chapters in the history of human flight, this book explains the true story behind twentieth-century Russia's quest for aviation prominence.

Armored Units of the Russian Civil War David

Bullock, 2013-02-20 By 1920 the Red Army of Russia fielded an overwhelming array of armored cars, armored trains and tank detachments. These armored units played an important part in consolidating the newly won Bolshevik empire in the early 1920s; as a consequence of the fact that railways were the strategic arteries that essentially controlled Russia, armored trains have never played such a significant role in military history as they did in the Russian Civil War. This title details the management, construction, repair, personnel, training and combat of the Red Army's armored units on all fronts, including such famous vehicles as Trotsky's armored train.

A Writer's Companion Louis D. Rubin,

Jr., 1995-09-01 In *A Writer's Companion*, Louis D. Rubin, Jr., has drawn on his years of accumulated wisdom—as well as the advice of some fifty prominent writers from various fields—to put together in a single volume a vast array of information. Organized in such a way as to make it exceptionally easy to use, and enhanced by Rubin's graceful and witty prose, *A Writer's Companion* will merit a place on the desk of every serious

wordsmith. It is also a book that will bring endless hours of pleasure to anyone who enjoys reading simply for the sake of gaining new knowledge. As Casey Stengel said, "You could look it up."

Automobile Manufacturers Worldwide Registry
,2015-11-17 This one-of-a-kind reference work provides essential data on some 10,700 manufacturers of automobiles, beginning with the earliest vehicle that might be so termed (Frenchman Nicolas Cugnot's steam carriage, in 1770) and covering all nations in which automobiles have been built--67 in all. Not an encyclopedia or collection of histories, this is instead a very complete registry providing essential facts about the manufacturers: complete name, location, years active, type(s) of vehicles built, and other basic data. Compiled during more than 30 years of research, this reference even lists companies that produced just one car. Any builder of passenger-carrying vehicles on at least two but no more than eight wheels, of any design, either mass produced or built as one-off specials, experimental cars, prototypes, or kit cars, is included. Builders of internal combustion, steam and electric powered vehicles are all covered; companies that built only trucks, buses, racing cars, or motorcycles are not included. From A.A.A. to Zzipper and Argentina to Yugoslavia, this is an astonishingly comprehensive resource.
