**Russian and Soviet Tanks 1914-1941** Maximino Argüelles Martinez, 2014-02-17 About the evolution of the Soviet offensive doctrine during World War II. Where did this doctrine and armored formations that takes practice arise?. Why was the USSR as a nation which in 1940 developed a tank as advanced as the T-34?. 100 pages trying to answer these and other questions with a description of the principal armored vehicles and the formations in which were integrated from its beginnings in the Russian Empire until June 22, 1941.

**Armoured Trains** Paul Malmassari, 2016-11-14 A fully illustrated encyclopedia of military trains around the world, from the early 19th century to today, arranged alphabetically from Angola to Vietnam. European military forces were quick to put railways to use in warfare, whether for deploying soldiers or moving heavy artillery. Soon enough, the train became a potent weapon in its own right—a battleship on rails. Armed and armored, they became the first self-propelled war machines, which by the time of the American Civil War were able to make significant contributions to battlefield success. Thereafter, almost every belligerent nation with a railway system made some use of armored rolling stock, ranging from low-intensity colonial policing to the massive employment of armored trains during the Russian Civil War. And although they were somewhat eclipsed as frontline weapons by the development of the tank and other AFVs, armored trains were still in use as late as the civil wars of the former republic of Yugoslavia. This encyclopedic book covers, country by country, the huge range of fighting equipment that rode the rails over nearly two centuries. While it outlines the place of armored trains in the evolution of warfare, it concentrates on details of their design through photographs and meticulous drawings. Published in French in 1989, this highly regarded work has been completely revised and expanded for this English edition. It remains the last word on the subject.

Dietary Reference Intakes for Vitamin C, Vitamin E, Selenium, and Carotenoids Institute of Medicine, Food and Nutrition Board, Standing Committee on the Scientific Evaluation of Dietary Reference Intakes, Subcommittee on Interpretation and Uses of Dietary Reference Intakes, Subcommittee on Upper Reference Levels of Nutrients, Panel on Dietary Antioxidants and Related Compounds, 2000-08-27 This volume is the newest release in the authoritative series of quantitative estimates of nutrient intakes to be used for planning and assessing diets for healthy

people. Dietary Reference Intakes (DRIs) is the newest framework for an expanded approach developed by U.S. and Canadian scientists. This book discusses in detail the role of vitamin C, vitamin E, selenium, and the carotenoids in human physiology and health. For each nutrient the committee presents what is known about how it functions in the human body, which factors may affect how it works, and how the nutrient may be related to chronic disease. Dietary Reference Intakes provides reference intakes, such as Recommended Dietary Allowances (RDAs), for use in planning nutritionally adequate diets for different groups based on age and gender, along with a new reference intake, the Tolerable Upper Intake Level (UL), designed to assist an individual in knowing how much is too much of a nutrient.

**Soviet Armoured Cars 1936–45** Jamie Prenatt,2020-10-29 The armoured car has an important place in the early history of Soviet armoured fighting vehicles (AFVs) – they were the most important AFV during the Russian Civil War and figured prominently in the mechanization of the Red Army that began in late 1929. The 1930s saw the development and production of a wide variety of armoured cars, which were used extensively in Soviet conflicts from then on. They saw service in the Spanish Civil War, in the 1939 Manchurian conflict with Japan, and in the occupation of the Baltic states and the invasion of Poland and Finland. Although many of its armoured cars were lost in the early months following the German invasion in June 1941, Russia continued with its armoured car development program, and the final model, the BA-64, was accepted for service in 1942 with over 9,000 built before production ended in 1946. This detailed book provides a survey of Russian armoured cars from 1936 to 1945, focusing on the history, design, and specifications of the wheeled armoured cars that entered series production, including the rail variants and tracked BA-30. Packed with photographs, cross-sections, and stunning battleplates, this is a comprehensive guide to some of the Red Army's fastest AFVs.

The Tale of Hodja Nasreddin Leonid Solov'ev,2010-01-04 Returning to Bukhara after a prolonged exile, Hodja Nasreddin finds his family gone, his home destroyed, and his city in the grasp of corrupt and greedy rulers who have brought pain and suffering upon the common folk. But Hodja Nasreddin is not one to bow to oppression or abandon the downtrodden. Though he is armed only with his quick wits and his donkey, all the swords, walls, and dungeons in the land cannot stop him! Leaning on his own experiences and travels during the first half of the 20th century, Leonid Solovyov weaves the many stories and anecdotes about Hodja Nasreddin - a legendary folk character in the Middle East and Central Asia - into a masterful tale brimming with passionate love for life, liberty, and happiness.

**100 Interesting Case Studies in Neurointervention: Tips and Tricks** Vipul Gupta,Ajit S. Puri,Rajsrinivas Parthasarathy,2019-04-10 Neurointervention is a fast-growing subspecialty, and recent trials have demonstrated its role in ischaemic and haemorrhagic stroke. This has generated tremendous interest among interventional neuroradiology, neurology and neurosurgery communities. Nevertheless, formal teaching programmes that provide the required experience are limited, and many early career practitioners are not exposed to the crucial technical

details essential to safely performing the procedure before they start practising independently. The book presents 100 characteristic case studies to illustrate the salient technical and clinical issues in decision-making and problem solving during the procedure. This book conveys the "real-world" issues and solutions that are not addressed in detail in most books. As such it is a practical teaching book with useful "tips and tricks" on how to handle specific challenging situations, and is particularly useful for fellows in neurointervention training programmes..

*The End and the Beginning* Hermynia Zur Mühlen, 2010 First published in Germany in 1929, *The End and the Beginning* is a lively personal memoir of a vanished world and of a rebellious, high-spirited young woman's struggle to achieve independence. Born in 1883 into a distinguished and wealthy aristocratic family of the old Austro-Hungarian Empire, Hermynia Zur Mühlen spent much of her childhood travelling in Europe and North Africa with her diplomat father. After five years on her German husband's estate in czarist Russia she broke with both her family and her husband and set out on a precarious career as a professional writer committed to socialism. Besides translating many leading contemporary authors, notably Upton Sinclair, into German, she herself published an impressive number of politically engaged novels, detective stories, short stories, and children's fairy tales. Because of her outspoken opposition to National Socialism, she had to flee her native Austria in 1938 and seek refuge in England, where she died, virtually penniless, in 1951. This revised and corrected translation of Zur Mühlen's memoir - with extensive notes and an essay on the author by Lionel Gossman - will appeal especially to readers interested in women's history, the Central European aristocratic world that came to an end with the First World War, and the culture and politics of the late nineteenth and early twentieth centuries.

**Russian Motor Vehicles** Maurice A. Kelly, 2009-07 There has been nothing published outside of Russia concerning the activities of its motor industry, by 1937 the Soviets had become the largest producers of motor vehicles in Europe, albeit with the help of Henry Ford The author decided to concentrate on the work of the pioneers in Czarist Russia, for their efforts were more diverse than those of their counterparts in the Soviet era. However, one Soviet motor car which was an indigenous product has been included to illustrate how the industry might have evolved if Henry Ford had not been approached. This is a comprehensive overview of all facets of vehicle production from the early days to the final demise of the Soviet Union. All the manufacturers of motor vehicles,

certain accessories, military machines, and even aero engines are recorded in this unique book.
