Watership Down Richard Adams, 2012-11-27 40th anniversary edition of Richard Adams' picaresque saga about a motley band of rabbits - Watership Down is one of the most beloved novels of our time. Sandleford Warren is in danger. Hazel's younger brother Fiver is convinced that a great evil is about to befall the land, but no one will listen. And why would they when it is Spring and the grass is fat and succulent? So together Hazel and Fiver and a few other brave rabbits secretly leave behind the safety and strictures of the warren and hop tentatively out into a vast and strange world. Chased by their former friends, hunted by dogs and foxes, avoiding farms and other human threats, but making new friends, Hazel and his fellow rabbits dream of a new life in the emerald embrace of Watership Down . . . 'A gripping story of rebellion in a rabbit warren and the subsequent adventures of the rebels. Adams has a poetic eye and a gift for storytelling which will speak to readers of all ages for many years to come' Sunday Times 'A masterpiece. The best story about wild animals since The Wind in the Willows. Very funny, exciting, often moving' Evening Standard 'A great book. A whole world is created, perfectly real in itself, yet constituting a deep incidental comment on human affairs' Guardian Richard Adams grew up in Berkshire, the son of a country doctor. After an education at Oxford, he spent six years in the army and then went into the Civil Service. He originally began telling the story of Watership Down to his two daughters and they insisted he publish it as a book. It quickly became a huge success with both children and adults, and won the Guardian Children's Fiction Award and the Carnegie Medal in 1972. Richard Adams has written many novels and short stories, including Shardik and

The Plague Dogs.

Godzilla Legends Matt Frank, Jeff Prezenkowski, Jonathan Vankin, Mike Raicht, Chris Mowry, 2012 In a world where monsters roam freely, some stories have been lost to time... until NOW! This collection also includes an incredible cover gallery by legendary Godzilla artists Chris Scalf, Bob Eggleton, and Art Adams.

The Dragon and the Dazzle Marco Pellitteri, Jean-Marie Bouissou, Gianluca Di Fratta, Cristiano Martorella, Bounthavy Suvilay, 2010 In the worldwide circulation of the products of cultural industries, an important role is played by Japanese popular culture in European contexts.

Marco Pellitteri shows that the contact between Japanese pop culture and European youth publics occurred during two phases. By use of metaphor, the author calls them the Dragon and the Dazzle. The first took place between 1975 and 1995, the second from 1996 to today. They can be distinguished by the modalities of circulation and consumption/re-elaboration of Japanese themes and products in the most receptive countries: Italy, France, Spain, Germany and, across the ocean, the United States. During these two phases, several themes have been perceived, in Europe, as rising from Japan's social and mediatic systems. Among them, this book examines the most apparent from a European point of view: the author names them machine, infant, and mutation, visible mostly through manga, anime, videogames, and toys. Together with France, Italy is the European country that in this respect has had the most central role. There, Japanese imagination has been acknowledged not only by young people, but also by politicians, television programmers, the general public, educators, comics and cartoons authors. The growing influence of Japanese pop culture, connected to the appreciation of its manga, anime, toys, and videogames, also urges political and mediologic questions linked to the identity/ies of Japan as they are understood--wrongly or rightly--in Europe and the West, and to the increasingly important role of Japan in international relations.--Back cover

How to Read a Poem Terry Eagleton, 2024-01-17
Lucid, entertaining and full of insight, *How To Read A Poem* is designed to banish the intimidation that too often attends the subject of poetry, and in doing so to bring it into the personal possession of the students and the general reader. Offers a detailed examination of poetic form and its relation to content. Takes a wide range of poems from the Renaissance to the present day and submits them to brilliantly illuminating close analysis. Discusses the work of major poets, including John Milton, Alexander Pope, John Keats, Christina Rossetti, Emily Dickinson, W.B. Yeats, Robert Frost, W.H. Auden, Seamus Heaney, Derek Mahon, and many more. Includes a helpful glossary of poetic terms.

Robotics and Automation in Construction Carlos Balaguer, Mohamed Abderrahim, 2008-10-01 This book addresses several issues related to the introduction of automaton and robotics in the construction industry in a collection of 23 chapters. The chapters are grouped in 3 main sections according to the theme or the type of technology they treat. Section I is dedicated to describe and analyse the main research challenges of Robotics and Automation in Construction (RAC). The second section consists of 12 chapters and is dedicated to the technologies and new developments employed to automate processes in the construction industry. Among these we have examples of ICT technologies used for purposes such as construction visualisation systems, added value management systems, construction materials and elements tracking using multiple IDs devices. This section also deals with Sensorial Systems and software used in the construction to improve the performances of machines such as cranes, and in improving Human-Machine Interfaces (MMI). Authors adopted Mixed and Augmented Reality in the MMI to ease the construction operations. Section III is

dedicated to describe case studies of RAC and comprises 8 chapters. Among the eight chapters the section presents a robotic excavator and a semi-automated façade cleaning system. The section also presents work dedicated to enhancing the force of the workers in construction through the use of Robotic-powered exoskeletons and body joint-adapted assistive units, which allow the handling of greater loads.

Bolo: Annals of the Dinochrome Brigade Keith Laumer, 2021-10-12 This collection of stories lets the Bolo war machines (intelligent fighting machines) speak for themselves as they hunt and destroy all who stands in their way. Achtung-Panzer! Heinz Guderian, 1995 This is one of the most significant military books of the twentieth century. By an outstanding soldier of independent mind, it pushed forward the evolution of land warfare and was directly responsible for German armoured supremacy in the early years of the Second World War. Published in 1937, the result of 15 years of careful study since his days on the German General Staff in the First World War, Guderian's book argued, quite clearly, how vital the proper use of tanks and supporting armoured vehicles would be in the conduct of a future war. When that war came, just two years later, he proved it, leading his Panzers with distinction in the Polish, French and Russian campaigns. Panzer warfare had come of age, exactly as he had forecast. This first English translation

of Heinz Guderian's classic book - used as a textbook by Panzer officers in the war - has an introduction and extensive background notes by the modern English historian Paul Harris.

It does not need human instruction and performs many useful tasks on its own. Once you get used to an intelligent house, you will wonder how you ever got along without one. Even though devices featured in The Apple House can be purchased, the author shows how you can save money by building some from scratch. He also points out that you can substitute equipment you already own because of the system's modularity. Although written with an Apple II computer in mind, the principles discussed can easily be transferred to other computer systems.
