Japan's Comfort Women Yuki Tanaka,2003-08-29 Japan's Comfort Women tells the harrowing story of the comfort women who were forced to enter prostitution to serve the Japanese Imperial army, often living in appalling conditions of sexual slavery. Using a wide range of primary sources, the author for the first time links military controlled prostitution with enforced prostitution. He uncovers new and controversial information about the role of the US' occupation forces in military controlled prostitution, as well as the subsequent cover-up of the existence of such a policy. This groundbreaking book asks why US occupation forces did little to help the women, and argues that military authorities organised prostitution to prevent the widespread incidence of GI rape of Japanese women, and to control the spread of sexually transmitted diseases.

Japan's Comfort Women Toshiyuki Tanaka,Yuki Tanaka,2002 This groundbreaking book will have a deep impact on the ongoing international debate which surrounds this highly controversial and emotive issue.

Crystallization of Polymers: Volume 1, Equilibrium Concepts Leo Mandelkern,2002-09-19 First published in 2002, from an original 1964 edition, in the Crystallization of Polymers, 2nd edition Leo Mandelkern provides a self-contained treatment of polymer crystallization. All classes of macromolecules are included and the approach is through the basic disciplines of chemistry and physics. The book discusses the thermodynamics and physical properties that accompany the morphological and structural changes that occur when a collection of molecules of very high molecular weight are

transformed from one state to another. Volume 1 is a presentation of the equilibrium concepts that serve as a basis for the subsequent volumes. In this volume the author shows that knowledge of the equilibrium requirements is vital to understanding all aspects of the polymer crystallization process, and the final state that eventually evolves. This book will be an invaluable reference work for all chemists, physicists and materials scientists who work in the area of polymer crystallization.
