Baling Out Robert Jackson, 2006-09-18 To bale out of a stricken airplane is a pilot's or aircrew's final chance to escape death. It is a traumatic and hazardous exercise that is only practiced in extremis and is in itself full of danger with no guarantee of survival. Many struggled free of a flaming and spinning aircraft only to see their parachute alight above them, some were machine gunned to death by their opponents as they drifted to earth, some landed in mine-fields and were blown apart and many landed in forests and died suspended from the treetops. And yet many survived, some to fight again and some to become prisoners of war. This book relates the experiences of many airmen who survived to tell the tale, some quite remarkable because of pure good luck, some because of ingenuity and some through pure determination to survive at all costs. This book includes escapes from crippled German, British and US aircraft; stories of the first pilots to use parachutes in WW1; amazing escapes from aircraft in the inter-war years.

It represents one of the most advanced fighters in production today, and follows a distinctive line of Swedish jets including the Viggen and Draken. The Gripen is now raising particular interest in enthusiasts, as the program has now become a joint SAAB/BAE Systems venture, and sales have now been made to the air forces of South Africa, and more recently to Hungary and the Czech Republic, with prospects of further sales including Poland.

Early Jet Fighters 1944-1954: The Soviet Union and Europe Leo Marriott, 2020-03-30 In his previous book on early jet fighters Leo Marriott traced the history of the revolutionary aircraft produced by the British and Americans immediately after the Second World War; in this companion volume he describes jet fighter development on the continent of Europe and in the Soviet Union during the same remarkable period. Using over 200 archive photographs he covers the pioneering German designs, then the

range of experimental and operational fighters constructed by the Soviets, the French and the Swedes. The sheer variety of the designs that manufacturers came up with during this short, intense period of innovation mean that the book is fascinating reading. Several of the most famous jet fighters feature prominently in the rare photographs and are analysed in the expert text, including the Messerschmitt Me 262, the Heinkel He 162, the MiGs 15, 17 and 19, the Dassault Ouragan and the Saab J29. But perhaps the most rewarding aspect of the book is its record of experimental projects which tested new concepts that rapidly became established elements of jet aircraft design. The photographs of these largely forgotten aircraft give us an insight into the extraordinary technical challenges and the ambition and inventiveness of the designers and manufacturers who overcame them.
