*Salyut - The First Space Station* Grujica S. Ivanovich,2008-10-22 This remarkable book gives a comprehensive account of the longest manned space mission of the time. It details for the first time the people involved and the crews assigned to operate the first space station Salyut. The book portrays the selection of the crews, dramatic flights and tragedy of Soyuz 11. Biographies of the Soyuz 11 cosmonauts are published for the first time in English. The book relates discussions between the key personnel, and investigates the causes of the tragedy. The book ends with memories of all those affected by the DOS program and the tragedy of Soyuz 11 and looks forward to a continuation of the historic mission of Salyut.

Salyut : Soviet steps toward permanent human presence in space. ,2008 As the other major spacefaring nation, the Soviet Union is a subject of interest to the Congress in their deliberations concerning the future of U.S. space activities. In the course of an assessment of Civilian Space Stations (in 1983), the Office of Tech. Assessment (OTA) undertook a study of the presence of Soviets in space & their Salyut space stations. The major element in this technical memorandum was a workshop held at OTA in Dec. 1982: it was the first occasion when a significant number of experts in this area of Soviet space activities had met for extended unclassified discussion. As a result of the workshop, OTA prepared this report. Includes ¿Graphic Comparison of Soviet & U.S. Space Vehicles.¿ Illustrations.

Soviets in Space P. L. L. Smolders,1974 Recent terrorist actions have led hospitals to try to improve their preparedness for a mass casualty incident. The American Hospital Association convened an Invitational Forum on Hospital Preparedness for Mass Casualties on March 8-9, 2000 in Chicago, Il. It brought together a diverse group of hospital and governmental personnel to develop recommendations and strategies for hospitals, hospital associations, and the HHS Office of Emergency Preparedness. They discussed a large number of issues and preparedness needs grouped into four broad categories: community-wide preparedness, staffing, communications, and public policy.

**The Story of Manned Space Stations** Philip Baker,2007-08-20 This book charts the history of manned space stations in a logical, chronological order. It tells the story of the two major space powers starting out on their very separate programs, but slowly coming together. It describes rarely mentioned development programs, most of which never flew, including the US Manned Orbiting Laboratory, the Soviet Almaz station, and the Soviet Polyus battlestation. The Mir space station was one of the greatest human achievements in modern history, and a thorough telling of its story is essential to this book. This book is the first of its kind to tell the whole story of the manned space stations from the USA and Russia.

*Linking the Space Shuttle and Space Stations* David J. Shayler,2017-06-27 How could the newly authorized space shuttle help in the U.S. quest to build a large research station in Earth orbit? As a means of transporting goods, the shuttle could help supply the parts to

the station. But how would the two entities be physically linked? Docking technologies had to constantly evolve as the designs of the early space stations changed. It was hoped the shuttle would make missions to the Russian Salyut and American Skylab stations, but these were postponed until the Mir station became available, while plans for getting a new U. S. space station underway were stalled. In *Linking the Space Shuttle and Space Stations*, the author delves into the rich history of the Space Shuttle and its connection to these early space stations, culminating in the nine missions to dock the shuttle to Mir. By 1998, after nearly three decades of planning and operations, shuttle missions to Mir had resulted in:

- A proven system to link up the space shuttle to a space station
- Equipment and hands-on experience in handling tons of materials
- An infrastructure to support space station assembly and resupply

Each of these played a pivotal role in developing the skills and procedures crucial to the creation of the later, much larger and far more complex International Space Station, as described in the companion volume *Assembling and Supplying the ISS: The Space Shuttle Fulfills Its Mission*.

**The Hunting of Salyut 7** Brendan Guy Alimo, 2003-03-01 The secret Cold-War Saga of the Arab-Israeli conflict. The bloody lives of two infants driven to kill each other from the day of Israel's birth - May 14, 1948 - 5th day of Iyar 5708. Born the same night to neighboring families in Old Jerusalem, Michael - an Israeli and Shabir - a Palestinian, lose everything but their lives in their fight for the Holy land. Each becomes a gladiator of the superpowers. Their battles begin in Jerusalem - known to Muslims as El Wad - expand to the land of the Pharaohs and threaten Armageddon. They will fight with Colt against Kalashnikov, Phantom against Mig, Blackbird against Foxbat. They will meet face-to-face in mortal combat in baking desert, in war-torn clouds, even the utter darkness of space. 22 years before the first tragic flight of Israeli astronaut Ilan Ramon in the Space Shuttle Columbia, Brendan Guy Alimo wrote the classic Cold War novel *THE HUNTING OF SALYUT 7* that described Israeli-born Michael Allon's first flight in Columbia, about to face his nemesis, Shabir Al-Timimi, the first Palestinian cosmonaut. Readers will learn some of the incredible, untold stories of secret weapons and intelligence that led the world towards fulfillment of the prophecy of Apocalypse in the fields of Megiddo - also known as Armageddon!

This report on Soyuz history was conceived as a possible analogy relevant to domestic commercial spaceflight vehicles. The question of how to human-rate new spacecraft has been asked many times throughout the history of human spaceflight. The U. S., Russia, and, now China have each separately and successfully addressed this question. NASA's operational experience with human-rating primarily resides with Mercury, Gemini, Apollo, Space Shuttle, and the International Space Station (ISS). NASA's latest developmental experience includes Constellation, but also encompasses X38, X33, and the Orbital Space Plane.

**Rockets and People: Volume IV: Memoirs of Russian Space Pioneer Boris Chertok, Stories about the Moon Race, N-1 Rocket, Salyut Space Stations, Soyuz 11 Tragedy, and Energiya-Buran Space Shuttle** World Spaceflight News, Boris Chertok, Asif A. Siddiqi, National Aeronautics and Space Administration (NASA), 2017-09-13 In this fourth and final volume of the series, Boris Chertok concludes his monumental trek through a nearly 100-year life, providing fascinating insights into the Soviet moon landing program and the four failed launches of its giant N-1 moon rocket. He also provides new details about the Soyuz 11 depressurization accident which killed three cosmonauts, the Almaz and Salyut space stations, and the Energiya-Buran Space Shuttle. Contents: Chapter 1 \* Rocket-Space Chronology (Historical Overview) \* Chapter 2 \* U.S. Lunar Program \* Chapter 3 \* N1-L3 Lunar Program Under Korolev \* Chapter 4 \* A Difficult Conversation with Korolev \* Chapter 5 \* N1-L3 Control \* Chapter 6 \* We're Behind, but We're Not Giving In \* Chapter 7 \* KORD and ATG \* Chapter 8 \* Once Again We're Ahead of the Whole World \* Chapter 9 \* Sort It Out, and Report on Your

Editor Asif Sidiqi notes: Having known both Korolev and Glushko, Chertok has much to say about the relationship between the two giants of the Soviet space program. Contrary to much innuendo that their relationship was marred by the experience of the Great Terror in the late 1930s, Chertok shows that they enjoyed a collegial and friendly rapport well into the 1950s. Chertok has much to say about the development of the so-called KORD system, designed to control and synchronize the operation of the 42 engines on the first three changes of the giant rocket (see Chapters 5 and 7, especially). One of the main challenges of developing the N-1's engines was the decision to forego integrated ground testing of the first stage, a critical lapse in judgment that could have saved the engineers from the many launch accidents. Chertok's descriptions of the four launches of the N-1 (two in 1969, one in 1971, and one in 1972) are superb. He delves into great technical detail but also brings into relief all the human emotions of the thousands of engineers, managers, and servicemen and women involved in these massive undertakings. His accounts are particularly valuable for giving details of the process of investigations into the disasters, thus providing a unique perspective into how the technical frequently intersected with the political and the personal. His account in Chapter 17 of the investigation into the last N-1 failure in 1972 confirms that the process was fractured by factional politics, one side representing the makers of the rocket (the Mishin design bureau) and other representing the engine makers (the Kuznetsov design bureau).

Mir Hardware Heritage David S. F. Portree, 1995 The heritage of the major Mir complex hardware elements is described. These elements include Soyuz-TM and Progress-M ; the Kvant, Kvant 2, and Kristall modules ; and the Mir base block. Configuration changes and major mission events of Salyut 6, Salyut 7, and Mir multiport space stations are described in detail for the period 1977-1994. A comparative chronology of U.S. and Soviet/Russian manned spaceflight is also given for that period. The 68 illustrations include comparative scale drawings of U.S. and Russian spacecraft as well as sequential drawings depicting missions and mission events.
