Rockets & Satellites Earle Rice, Jr.,2016-07-15 The trail to find Osama bin Laden was uncovered by human and satellite intelligence, and the raid that killed him was directed by a fleet of intelligence-collecting satellites over Pakistan. Even though we can't see them, satellites play a large role in reconnaissance and defense support. Students will learn about the rockets that launch satellites, how satellites are used, and how the military uses secret space planes and test vehicles that are ready to spy from space or engage in any possible space wars. Full color photos, fact boxes, and comprehensive coverage of the history of the US satellite program fill out this timely title.

Beyond the Ionosphere Andrew J. Butrica,1997 Fifty years after the founding of NASA, from 28 to 29 October 2008, the NASA History Division convened a conference whose purpose was a scholarly analysis of NASA's first 50 years. Over two days at NASA Headquarters, historians and policy analysts discussed NASA's role in aeronautics, human spaceflight, exploration, space science, life science, and Earth science, as well as crosscutting themes ranging from space access to international relations in space and NASA's interaction with the public. The speakers were asked to keep in mind the following questions: What are the lessons learned from the first 50 years? What is NASA's role in American culture and in the history of exploration and discovery? What if there had never been a NASA? Based on the past, does NASA have a future? The results of those papers, elaborated and fully referenced, are found in this 50th anniversary volume.--Introduction.

User Modeling Anthony Jameson,Cecile Paris,Carlo Tasso,2014-05-04 User modeling researchers look for ways of enabling interactive software systems to adapt to their users-by constructing, maintaining, and exploiting user models, which are representations of properties of individual users. User modeling has been found to enhance the effectiveness and/or usability of software systems in a wide variety of situations. Techniques for user modeling have been developed and evaluated by researchers in a number of fields, including artificial intelligence, education, psychology, linguistics, human-computer interaction, and information science. The biennial series of International Conferences on User Modeling provides a forum in which academic and industrial researchers from all of these fields can exchange their complementary insights on user modeling issues. The published proceedings of these conferences represent a major source of information about developments in this area.

Outer Space - Battlefield of the Future? Sipri, 2021-01-26 This book, first published in 1978, examines the military use of space – around 60 per cent of US and Soviet satellites were military ones. The satellites were for military communications, weather prediction, navigation, photographic and electronic reconnaissance, targeting, early warning, and satellites capable of destroying enemy satellites. This book analyses the capabilities of military satellites as part of the debate around the encroachment of military technology and purposes into space.

Vanguard Satellite Spin-reduction Mechanism Robert C. Baumann, 1961 The Cloud Cover Satellite flown in Vanguard vehicles SLV-3 and SLV-4 required a spin rate of 55 r.p.m. when entering orbit. Since the third-stage rocket was spin-stabilized in flight, and because other considerations required that the satellite remain attached long enough to acquire more than the desired 55 r.p.m., a satellite spin-reduction mechanism was developed. Although the mechanisms functioned properly in both flights, the desired spin rate was not achieved owing to uncontrollable flight effects. These effects make the prediction of satellite spin rates after a long pre-separation coasting period extremely difficult. To meet future requirements a control system is needed which can orient a payload according to a predetermined scheme and maintain that orientation for the desired period.
