🔍 **ADVANCED VEHICLE CONTROL** Johannes Edelmann,Manfred Plöchl,Peter E. Pfeffer,2016-12-19 The AVEC symposium is a leading international conference in the fields of vehicle dynamics and advanced vehicle control, bringing together scientists and engineers from academia and automotive industry. The first symposium was held in 1992 in Yokohama, Japan. Since then, biennial AVEC symposia have been established internationally and have considerably contributed to the progress of technology in automotive research and development. In 2016 the 13th International Symposium on Advanced Vehicle Control (AVEC’16) was held in Munich, Germany, from 13th to 16th of September 2016. The symposium was hosted by the Munich University of Applied Sciences. AVEC’16 puts a special focus on automatic driving, autonomous driving functions and driver assist systems, integrated control of interacting control systems, controlled suspension systems, active wheel torque distribution, and vehicle state and parameter estimation. 132 papers were presented at the symposium and are published in these proceedings as full paper contributions. The papers review the latest research developments and practical applications in highly relevant areas of vehicle control, and may serve as a reference for researchers and engineers.

🔍 **REGENERATIVE MEDICINE IN OTOLARYNGOLOGY** Juichi Ito,2015-05-07 This book describes an exciting new movement using regenerative medicine to treat patients with otolaryngological diseases. The emerging field of regenerative medicine uses tissue engineering, which combines medicine and engineering not only to treat the diseases themselves but also to enable recovery of the function of affected areas. As otolaryngology covers wide regions, including many diseases of the head and neck, the book is divided into sections, each corresponding to a different anatomical structure — the ear, nose, oral cavity, pharynx, larynx and head and neck. The structural developments of each region, the underlying mechanisms of diseases specific to these regions, their experimental models and proposals for new regenerative treatment are all discussed in detail. The various diseases and symptoms considered in the book include inner ear and middle ear diseases, rhinitis, nasal sinusitis and otolaryngological cancers. To date there have been few clinical studies reporting regenerative medical applications in the field of otolaryngology, but in this volume leading authors present the latest research findings to help provide new therapies for patients in the future. This state-of-the-art information makes the book a valuable professional reference work for all doctors and researchers who focus on regenerative treatments in the field of otolaryngology and neuroscience.

🔍 **PLANT NUTRITION FOR SUSTAINABLE FOOD PRODUCTION AND ENVIRONMENT** Tadao Ando,Kounosuke Fujita,Tadahiko Mae,Hideaki Matsumoto,Satoshi Mori,Jiro Sekiya,2012-12-06 In the history of the International Plant Nutrition Colloquium from its first meeting in 1954, this meeting, the 13th Colloquium, is the first to be held in Asia and will be the last in the 20th century. The 20th century has seen huge changes in the number and activities of mankind. Our population has increased from around 1.7 billion to more than 5.8 billion and technological innovations have completely altered our way of living. As a consequence of such rapid change, we are facing many problems including changes in our environment of a global scale. But, while food shortage has been a serious concern to mankind throughout our history, serious food shortages in the 20th century have been confined to limited times and areas. As Lester Brown discusses in this volume, farmers have increased food production heroically on demand. We, the plant nutritionists should be proud of our support to the world’s farmers which has helped them make their achievement possible. During the 20th century, the science of plant nutrition also has achieved great progress as described by Jack Loneragan; it became established as a discipline firmly based in science, defined the chemical elements supporting plant growth, and has contributed to improvements in plant production and environmental quality, as readers will find in many contributions in this volume.

🔍 **COMPLEMENTARY AND ALTERNATIVE APPROACHES TO BIOMEDICINE** Edwin L. Cooper,Nobuo Yamaguchi,2013-06-29 WHAT HAPPENED IN KANAZAWA? THE BIRTH OF eCAM This book contains the proceedings of the International Symposium on Complementary and Alternative Medicine, (CAM) which was convened in Kanazawa Japan, November 8-10, 2002. The participants were mainly from Japan, USA, China, France, England, Germany, Taiwan, and India. The world of western medicine is gradually opening its doors to new ways of approaching healing. Since many of these approaches began centuries and even millennia ago in Asia, it was entirely appropriate to open our symposium in Kanazawa, a beautiful, traditional city located on the Sea of Japan. Experts from Asia, Europe and the United States gathered together for true discussions on complementary and alternative medicine and its role developing all over the world. As scientists, we listened to historical perspectives from India, China and Japan, where CAM is still being practiced as it has been for centuries. It is well to mention at the outset that this book will cover a rapidly growing field that has strong advocates but others who are less than enthusiastic. This should be evident by the presentation of chapters that aim to significantly dispel some of the criticisms of pseudoscience and myth that often surround the discipline. It is our purpose to present high quality peer reviewed chapters.

🔍 **DIALOGUES ACROSS DIASPORAS** Marion Christina Rohrleitner,Sarah E. Ryan,2013 Dialogues across diasporas makes an important contribution to the growing body of interdisciplinary scholarship on the intimate historical, political, and literary connections between two of the largest diasporic groups in the Americas and beyond - members of the African/A and Latina/o diasporas. This collection not only serves as a useful required text for diaspora studies courses, it offers a model for taking discussions of diasporic identities, community politics, and cultural memory beyond the classroom and into the c ...

🔍 **FROM HILBERT TO DILBERT** Victor Christianto ,Florentin Smarandache, This book took an unconventional theme because we submit an unorthodox theme too. Karl Popper’s epistemology suggests that when the theory is refuted by observation, then it is time to look for a set of new approaches. In the first chapter, it is shown that Hilbert’s axiomatic program has failed not only by experiment (Mie theory does not agree with experiment) but also in terms of logic (Gödel theorem). Therefore we set out a new approach, starting from an old theory of Isaac Newton. Dilbert cartoon series often offer surprising for old problems, especially in this era of corporatocracy. Now we would call such an out-of-the-box solution to the old Hilbert axiomatic program as Dilbert way (or Dilbertian, if you wish). Readers may ask : but what can physicists learn from Dilbert cartoons? While it seems not obvious at first glance, yes we believe there is a great character of Dilbert cartoon, i.e. to put it in one phrase: “out-of-thebox and brutally honest.” From managers who tend to criticize other folks, only to make him/her looks smart. Or people who often send “FYI emails” only to make him/her looks managing well. We do think that such a brutal honesty is also needed in many fields of physics: from theoretical physics to applied physics, as will be discussed throughout this book.

🔍 **PUSH THE BUTTON** Elizabeth Rodwell,2024-01-05 In Push the Button, Elizabeth Rodwell follows a battle over what interactivity will mean for Japanese television, as major media conglomerates took on independent media professionals developing interactive forms from new media. Rodwell argues that at the dawn of a potentially transformative moment in television history, content conservatism has triumphed over technological innovation. Despite the ambition and idealism of Japanese TV professionals and independent journalists, corporate media worked to squelch interactive broadcast projects such as smartphone-playable television and live-streamed and open press conferences before they caught on. Instead, interactive programming in the hands of major TV networks retained the structure and qualities of most other television and maintained conventional barriers between audiences and the actual space of broadcast. Despite their lack of success, the innovators behind these experiments nonetheless sought to expand the possibilities for mass media, national identity, and open journalism.

🔍 **EXERCISE THERAPY FOR RECOVERY FROM HEMIPLEGIA** Kazumi Kawahira,Megumi Shimodozono,Tomokazu Noma,2022-11-14 This book introduces an innovative, efficient, and patient-friendly neural net constructive therapy for patients with mild to severe hemiplegia, not only in the recovery phase but also in acute and chronic phases. The explanations are supported by extensive photographs of each position and a set of 72 video clips to help readers follow and reproduce the techniques. This book explains the theory of Repetitive Facilitative Exercise (RFE), which is a combination of repetitive volitional flexion and extension movements from neurofacilitation approaches. This exercise is aimed at achieving the intended movements and lessening synergistic movement patterns by reconstructing and strengthening the neuropathways of the injured nerve tract. Instead of interpreting disorders based on reflex theory and constructing treatment methods, the new approach considers scientific treatment methods that emphasize the formation of neural pathways by improving synapse formation and transmission efficiency based on functional localization, central programs, and neural nets. Chapters provide a basic theory of RFE, offering the underlying mechanisms of nerve tract formation/strengthening, such as functional localization, voluntary movement, plasticity, and neural lateral sprouting, giving readers a comprehensive understanding of the prompt and repetitive therapy. This is followed by an exposition of practice and techniques, planning of treatment programs, and facilitation techniques for voluntary movements of the upper limb, individual

FINGERS, AND LOWER LIMB. FINALLY, THE BOOK INTRODUCES RFE TO FACILITATE AND ENHANCE MOTOR SKILLS IN WALKING AND OTHER FUNCTIONS. EXERCISE THERAPY FOR RECOVERY FROM HEMIPLEGIA - THEORY AND PRACTICE OF REPETITIVE FACILITATIVE EXERCISE WILL PROVIDE REHABILITATION THERAPISTS, PHYSIOTHERAPISTS, OCCUPATIONAL THERAPISTS, AND MEDICAL DOCTORS A REFRESHING ALTERNATIVE THEORY AND PRACTICE TO CURRENT APPROACHES. NEUROSCIENCE RESEARCHERS, STROKE PATIENTS, AND THEIR FAMILIES WOULD FIND THIS BOOK INFORMATIVE.
