John Starkey

**Sauber-Mercedes C9** Ian Bamsey,2007-02-01 The Mercedes sports-prototype of the late 1980s arguably came closer than any other car of the era to recapturing the spirit of the original 'Silver Arrows' of the 1930s. This stunning, fully enclosed, twin turbo, V8 sports-racing car took on the might of Porsche and Jaguar, and, notwithstanding opposition from the likes of Aston Martin, Nissan and Toyota, beat them all! This book is a detailed analysis of the famous C9 racing car, built by the Swiss firm of Sauber, which brought the might of Mercedes back into international motor racing for the first time in over thirty years. The author was present at the time and enjoyed the keen cooperation of the engineers at the heart of the project.

### **SAUBER-MERCEDES – The Group C Racecars 1985-1991**

John Starkey,2022-01-10 An in-depth study of the Sauber-Mercedes racecars that dominated the Group C racing scene during the late 1980s and early 1990s. When Peter Sauber started using Mercedes V8 engines in his Group C sports cars in 1985 the result was World Championship wins in 1989 and 1990. Utterly dominant, the three-pointed star of Mercedes beat the TWR Jaguars and Nissans, and introduced a certain M Schumacher into

the factory team in 1990. This book features interviews with many of the personalities who raced with the Sauber-Mercedes team, including Jochen Mass, Mauro Baldi, Kenny Acheson, David Price, Bobby Bell and Leo Riss. A host of magnificent colour photographs backs up the history and development of the cars. Also included is a chassis-by-chassis history of each individual car.

### **Basic Course in Race Car Technology** Lars

Frömmig,2023-03-28 The focus of the book is on the driving dynamics of racing vehicles. The interaction of the tyre, the aerodynamics, of the chassis and the limited slip differential specific to racing vehicles is dealt with. A chapter on the basics of vehicle dynamics makes it possible to get started with this topic even without prior automotive engineering training. A historical review and a consideration of the essential safety aspects create an understanding of higher-level requirements, which are specified, for example, by the technical regulations.

**Silver Arrows** Andrew Noakes, 2022-03-21 Lewis Hamilton's record-breaking achievements in F1 are the latest successes in a glorious motor sport record for Mercedes and Benz that stretches back to the very first races in the 1890s. For the first time, this book tells the story of Mercedes in motor sport from the very beginning, with those pioneers of the 19th century, right through to today's hybrid F1 cars. It covers the triumphs and disasters, from

the early Grand Prix machines and the extraordinarily advanced and massively powerful racers of the 1930s to the highs of F1, Le Mans and Mille Miglia glory and the sorrow of the 1955 Le Mans disaster. The story is brought right up to date, tracing Mercedes victories in sports car racing, Indycar, F1 and Formula E – and this book celebrates the achievements of some of the world's greatest drivers, from Caracciola, Fangio and Moss to Hakkinen, Unser and Hamilton.

Mercedes-Benz SLK Brian Long, 2014-11-28 This book reveals the full history of the first generation Mercedes-Benz SLK, covering in detail the German, US, UK, Australian and Japanese markets. Written by a highly regarded motoring historian, with many years' ownership of the type in question, this is THE definitive study of the subject. All major world markets are looked at, along with competition history. Extensive appendices cover engine specifications, chassis

numbers, build numbers, and so on.

Endurance Racing at Silverstone in the 1970s & 1980s Chas Parker, 2010-09-15 Charts the progress of sports car races, year-by-year from 1976, through the era of the Group C cars, up to the end of the eighties, with accounts and photographs of each event. This book includes maps of the circuit, showing changes over the years and results from each of the races.

24 Hours Richard Williams, 2023-05-25 Award-winning writer Richard Williams tells the remarkable story of the 24 Hours of Le Mans, one of the world's most iconic motorsports events, which celebrates its centenary in 2023. The event was created by a group of Frenchmen in 1923 and remains uniquely compelling to spectators, to the major motor manufacturers who continue to see it as an opportunity for priceless publicity, as well as to drivers hoping to add their names to its distinguished roll of honour. Between the wars, those manufacturers included Bugatti, Bentley and Alfa Romeo. Subsequently, Ferrari, Jaguar, Mercedes, Aston Martin, Ford, Porsche, Audi and Toyota have all been serial winners, guaranteeing the continuation of ferocious inter-marque rivalry. Over the decades the race acquired a rich folklore, including stories of leaking petrol tanks being sealed with chewing

gum, one competitor making his last pit-stop for a fill-up and a glass of champagne, or the woman who drove her MG through the night wearing a fur coat. Competitors have included princes, debutantes, drug smugglers and a Nazi spy. Leading Hollywood film-makers lured to the romance of the race include Steve McQueen, who conceived and starred in Le Mans in 1971, and James Mangold, who made Le Mans '66 in 2019. But in 1955 it had also been the scene of the greatest tragedy ever to befall motor racing, when 82 people were killed by a competing car, an accident that for a while threatened the sport's entire future. From the Bentley Boys of the 1920s, through record-breaking multiple winners Jacky Ickx and Tom Kristensen to modern stars such as Allan McNish, 24 Hours celebrates the skill, courage and technical brilliance of the men and women who gave the race its worldwide renown.

DAMAGED 07 , For the seventh issue of Damaged magazine

our editor George Mefsut prepared seven articles, which are again devoted to subjects that are less commonly seen in other publications. This includes a post apocalyptic vignette featuring a robot, a racing car converted into a hover car, a space shuttle from the Star Wars universum, a WWII aircraft drop tank converted into a vehicle, an atmospheric 'bird-watching trip' diorama, a scratch-built propeller-driven land vehicle, and the famous Chucky doll figure. All articles are written in step-by-step style and are illustrated with high quality photos, allowing to explain different building, painting and weathering techniques and notice interesting details created by the authors.

The Bulletin ,1988

Complete vehicle Michael Trzesniowski,2023-04-03 In this book, the reader learns the essential differences to the passenger car through the analysis divided according to assemblies. This gives him the tools to apply the detailed knowledge acquired to the design and development of competition vehicles. The course for a successful car is set in the concept phase. For this reason, it is given a lot of space and associated design-related areas such as the choice of materials, lightweight construction, design principles, reliability, etc. are discussed. When considering the vehicle as a

whole, however, safety systems (rollover device, crash elements, restraining ropes), the cockpit (driver position, seat with restraint system, steering wheel, gearshift, pedal system), the frame or monocoque, the outer skin and aerodynamic devices (ventilation, aerodynamic drag, downforce) must not be omitted. The detailed, in-depth presentation makes the work just as suitable for the interested motorsport enthusiast as it is for the engineer with a practical interest in questions relating to the complete vehicle. The formula material is prepared in such a way that the book can also be used as a reference work. .

#### Porsche Air-Cooled Turbos 1974-1996 Johnny

Tipler, 2019-11-25 Porsche applied turbocharging to its racing cars in 1972 and, within a year, this technology had crossed over into its production cars: the first road-going 911 Turbo was unveiled at the Frankfurt Motor Show in 1973. Johnny Tipler tells the story of the air-cooled turbocharged 911s, starting with the 934 and 935 race cars that fostered the Type 930 in 1974. The 930 accounted for over 21,000 vehicle sales before being replaced by the 964 Turbo in 1990, followed by the 993 Turbo in 1995. With 300 colour photographs, many taken specially by renowned photographer Antony Fraser this book also presents exclusive interviews with

Klaus Ludwig, Jochen Mass and Nick Heidfeld, as well as including full specification tables for each key model type. Foreword is by Alois Ruf.
