British Flying Boats Peter London,2012-06 The complete history of the British flying boat - contains all makes, models and individual examples

Seaplanes of the World Bill Yenne,1997 Seaplanes hold a special place in our memory of the wonderful aircraft of aviation's golden age. Streamlined by necessity, they were magnificent and beautiful machines that caught and held the eye and the imagination. In this magnificent album, aviation historian Bill Yenne has assembled a marvelous collection of photographs of the great Supermarine racers, the Pan American Clippers that pioneered the air routes across the Atlantic and Pacific, the fighting flying boats of World War II, and the post-war jet seaplanes. This book is illustrated with carefully selected color and black white photographs from the world's most important aviation historical archives. These are complemented by authoritative descriptive text and over a dozen exquisite cutaway paintings by John Batchelor, the dean of the world's technical aviation illustrators.

Flying Empires Brian Cassidy,1999

Big Wings Philip Kaplan,2005-09-30 In the history of aviation there have been many attempts to produce aircraft of extraordinary proportions to expand the limits of technology and create new performance standards. With few exceptions, the early attempts did not become the successes envisaged until post-World War II when such aircraft as the Boeing B-52 long-range heavy bomber and the Boeing 747 'Jumbo Jet' airliner changed the face of aviation in both the military and civil roles. Big Wings is a well-researched, highly informative and sometimes nostalgic look at the sixteen most significant giants of the air. Each chosen aircraft is introduced and its raison d'être explained, then follows an in-depth review of the successful and failed technical aspects of the design, its operational history, first-hand accounts from those that had flown the aircraft and finally some startling facts and statistics. The aircraft selected are as follows: Military - Douglas B-19, Boeing B-29, Consolidated B-36, Northrop B-49 and Boeing B-52, Airliners - Bristol Brabazon, Boeing 747 and Airbus A380, Heavy Lifters - Messerschmitt Me323, Consolidated XC-99, Lockheed C5 and Antonov AN-225, Flying Boats - Dornier Do-X, Martin JRM Mars, Hughes HK-1 and Saunders Roe Princess.

The World's Worst Aircraft Bill Yenne,1990 The subjects of this book have embarrassed their builders, enraged their owners and frightened their pilots. In many cases, these are aircraft that should never have been built, and which are more starkly bizarre than the most deranged flights of fantasy.

Flying Boats Alex Frame,2007 Flying Boats : My Father's War in the Mediterranean is an exciting and original blend of personal memoir and war history. Alex Frame's father was a flying boat pilot in war and afterwards in peace, and the roots of this book are the logbooks he kept over his 30 year career, the first covering early flights in 1938 and the war years, the second from 1950 to 1960 flying in Sydney and then Tahiti on the legendary Coral route around the Pacific Islands, and the third the final years flying in the Pacific from 1960 to 1969. This book concentrates on the years of World War II , and the star of the story is the Sunderland flying boat T9046, while under the command of Alex's father from November 1940 to June 1941. During this concentrated period of setbacks and disasters for the Commonwealth and British forces, the crews of the large, graceful flying boats were both saviours and victims in the struggle against Hitler's war machine. --Back cover.

Cleared for Takeoff Rowland White,2016-10-11 All of aviation's dangerous, exciting, and most courageous moments are featured within this stunning compendium on flight. Packed with stories of heroic and innovative pioneers, fascinating profiles of remarkable planes from Spitfires to space shuttles, and how-to instructions for making everything from origami helicopters to bottle rockets—all accompanied by sensational photographs, illustrations, and diagrams—Cleared for Takeoff promises to astonish, entertain, and fire the imaginations of everyone with their head in the clouds.

Ministry Of Space Warren Ellis,2006-07-24 This is the story of how we could have gone to space. Maybe how we should have gone to space. This is the story of the Ministry of Space: The black budget that financed the move into space. The deaths of the test pilots taken from the surviving Spitfire flyers of the Battle of Britain. And in 2000, the end of the Golden Age, as America and Russia begin moving into space. The secret revealed, and the destruction of a man who sacrificed himself for the Ministry of Space. Plus, a sketchbook section by Chris Weston and an all-new appendix by Warren Ellis revealing the facts behind the fiction!

Postwar Aircraft Jerry Scutts,2000-10-27 Postwar military aviation is dominated by the multi-role jet aircraft. This book looks at military jets from the F-86 Sabre of the Korean War through to the Tornados and F-18s of today and the key issues associated with accurate detailing, markings and camouflage schemes.

The Dakota Hunter Hans Wiesman,2015-03-19 A tale of a lifelong passion for a WWII aircraft that changed the author's life: "It is almost like an adventure novel except it is true" (Air Classics). This book tells the story of a Dutch boy who grew up during the 1950s in postwar Borneo, where he had frequent encounters with an airplane, the Douglas DC-3, a.k.a. the C-47 Skytrain or Dakota, of World War II fame. For a young boy living in a remote jungle community, the aircraft reached the proportions of a romantic icon as the essential lifeline to a bigger world for him, the beginning of a special bond. In 1957, his family left the island and all its residual wreckage of World War II, and he attended college in The Hague. After graduation, he started a career as a corporate executive—and met the aircraft again during business trips to the Americas. His childhood passion for the Dakota flared up anew, and the fascination pulled like a magnet. As if predestined, or maybe just looking for an excuse to come closer, he began a business to salvage and convert Dakota parts, which meant first of all finding them. As the demand for these war relic parts and cockpits soared, he began to travel the world to track down surplus, crashed, or derelict Dakotas. He ventured deeper and deeper into remote mountains, jungles, savannas, and the seas where the planes are found, usually as ghostly wrecks but sometimes still in full commercial operation. In hunting the mythical Dakota, he often encountered intimidating or dicey situations in countries plagued by wars or revolts, others by arms and narcotics trafficking, warlords, and conmen. The stories of these expeditions take the reader to some of the remotest spots in the world, but once there, one is often greeted by the comfort of what was once the West's apex in transportation—however now haunted by the courageous airmen of the past.

Victoria: The Queen Julia Baird,2017-10-03 The true story for fans of the PBS Masterpiece series Victoria, this page-turning biography reveals the real woman behind the myth: a bold, glamorous, unbreakable queen—a Victoria for our times. Drawing on previously unpublished papers, this stunning portrait is a story of love and heartbreak, of devotion and grief, of strength and resilience. NAMED ONE OF THE BEST BOOKS OF THE YEAR BY THE NEW YORK TIMES • ESQUIRE • THE CHICAGO PUBLIC LIBRARY "Victoria the Queen, Julia Baird's exquisitely wrought and meticulously researched biography, brushes the dusty myth off this extraordinary monarch."—The New York Times Book Review (Editor's Choice) When Victoria was born, in 1819, the world was a very different place. Revolution would threaten many of Europe's monarchies in the coming decades. In Britain, a generation of royals had indulged their whims at the public's expense, and republican sentiment was growing. The Industrial Revolution was transforming the landscape, and the British Empire was commanding ever larger tracts of the globe. In a world where women were often powerless, during a century roiling with change, Victoria went on to rule the most powerful country on earth with a decisive hand. Fifth in line to the

throne at the time of her birth, Victoria was an ordinary woman thrust into an extraordinary role. As a girl, she defied her mother's meddling and an adviser's bullying, forging an iron will of her own. As a teenage queen, she eagerly grasped the crown and relished the freedom it brought her. At twenty, she fell passionately in love with Prince Albert of Saxe-Coburg and Gotha, eventually giving birth to nine children. She loved sex and delighted in power. She was outspoken with her ministers, overstepping conventional boundaries and asserting her opinions. After the death of her adored Albert, she began a controversial, intimate relationship with her servant John Brown. She survived eight assassination attempts over the course of her lifetime. And as science, technology, and democracy were dramatically reshaping the world, Victoria was a symbol of steadfastness and security—queen of a quarter of the world's population at the height of the British Empire's reach. Drawing on sources that include fresh revelations about Victoria's relationship with John Brown, Julia Baird brings vividly to life the fascinating story of a woman who struggled with so many of the things we do today: balancing work and family, raising children, navigating marital strife, losing parents, combating anxiety and self-doubt, finding an identity, searching for meaning.

Flying Boats Charles Woodley,2018-08-10 Flying Boats: Air Travel in the Golden Age sets out to do justice to a time of glamorous, unhurried air travel, unrecognisable to most of today's air travellers, but sorely missed by some. During the 1930s, long-distance air travel was the preserve of the flying boat, which transported well-heeled passengers in ocean-liner style and comfort across the oceans. But then the Second World War came, and things changed. Suddenly, landplanes were more efficient, and in abundance: long concrete runways had been constructed during the war that could be used by a new generation of large transport aircraft; and endless developments in aircraft meant they could fly faster and for further distances. Commercial flying boat services resumed, but their days would be numbered.

High Hulls Charles R. G. Bain ,2018-11-27 For a time, the flying boat was seen as the way of the future. These aircraft, so strange and foreign to the modern mind, once criss-crossed the world and fulfilled essential military roles. In his latest book for Fonthill, Charles Bain looks at the golden age of the flying boat, when these sometimes strange and often beautiful vessels spanned the globe. These vessels-a combination of ship and airplane-found themselves working as patrol aircraft, passenger aircraft, transports, and even as combat aircraft. This volume contains their stories, from memorable aircraft such as the Short Sunderland and Boeing 314 Clipper, to the craft that roamed the Pacific Theatre of the Second World War, to forgotten giants from Saunders-Roe and even strange jet fighters that once landed like ducks. It even includes the flying boat that has not let time get in the way of doing its job-the Martin Mars. Each of these aircraft has a story worthy of the telling, and often a memorable role to play in the history of aviation. `High Hulls' delves deeply into a long-vanished part of aviation's golden age.
