Savoia-Marchetti S.79 Sparviero Torpedo-Bomber Units Marco Mattioli, 2014-10-20 Italy's most successful wartime bomber, the S.79 saw combat with the Regia Aeronautica in France, Yugoslavia, Greece, North Africa, East Africa and in the Mediterranean. Initially developed as a transport, the aircraft evolved into a dedicated medium bomber during the Spanish Civil War in 1936. The manufacturer then produced the S.79-II torpedo-bomber which entered service in 1939 – which primarily saw service against the Royal Navy in the Mediterranean. Illustrated with 30 full colour profiles of the main units that saw action with either the Regia Aeronautica or the ANR, this title is the first of two volumes to cover the development history and wartime performance of the S.79.

Savoia-Marchetti S.79 Sparviero Bomber Units Marco Mattioli, 2018-02-22 Initially developed by Savoia-Marchetti as a transport, the aircraft had evolved into a dedicated medium bomber by the time the S.79-I made its combat debut in the Spanish Civil War in 1936. During World War 2, it became Italy's most successful bomber, and the most produced, with around 1370 built between 1936 and

early 1944. Although initially hampered by poor tactics, the S.79 bomber crews nonetheless scored sunk a number of Allied vessels, and provided a constant threat to Allied sailors in the Mediterranean in the early stages of the war. In East Africa and the Red Sea the Sparvieri were the most modern bombers in-theatre, proving a challenge to RAF and SAAF biplane fighters. Using specially commissioned full-colour artwork, first-hand accounts and historic photographs, this volume chronicles the history of the S.79's war in the Mediterranean, North African, Balkan, and East African theatres.

100 Years of Civil Aviation Ben Skipper,2023-11-15 An examination of civil aviation history from the end of World War I to the retiring of the Jumbo Jet. The book examines a century of civil aviation; in 1919 a fledgling industry was born out of civilianizing First World War bombers. The book covers the design and development of civil aircraft and all the personalities that shaped the industry; it features the hay-day of air travel before the advent of mass passenger transit, and the rise of smaller, austerity airlines. It covers the influence of military aircraft on civil planes, unpacks the laws that govern civil aviation and how they have changed over the past century. It chronicles air disasters, both mechanical and tyrannical, and for the first time, looks at the role of women in civil aviation. Playing its part in

times of crisis, civil aviation has led rescue missions and covert operations; civilian pilots were often used to test and transport new aircraft from their manufacturers to the frontline, often unarmed and unescorted. The book ends with the quiet retirement of an icon, amid a global pandemic and what lies in store for a greener flying future.

Everybody's Aviation Guide Victor Wilfred Pagé, 1928

Air War in East Africa, 1940–41 Jon Sutherland, Diane Canwell, 2009-06-25 This little known campaign against the Italian invasion of British Somalia was bravely fought by a small force of elderly RAF and Commonwealth aircraft against almost overwhelming odds. This, against a backdrop of Britain's meager assets being in demand in the much more prominent and important theatres such as Egypt and, of course, at home during the height of the Battle of Britain and the Blitz. The history starts with the Italians use of airpower and gas against the spear-armed Abyssinians in 1936. In August 1940 the Italians attacked and overwhelmed British Somalia and under air cover the British evacuated

to Aden. The Allies fought many air battles with the better equipped invaders and flew dangerous reconnaissance missions in preparation for the major offensives in 1941. On the Northern Front, the first phases see aggressive air patrols and Allied reinforcements arriving from Egypt. They attacked towards Agordat pushing deep into Eritrea from the Sudan. Meanwhile to the south the South African Air Force and ground forces attacked into Italian Somalia during January and February 1941. In March the allies attacked Keren and the Italians finally surrendered. The final allied air strikes against Asmara and Massawa led to the final collapse of Italian resistance in May 1941. The campaign in Ethiopia saw General Cunningham's force advance 1,725 miles from Kenya in 53 days to reach the Ethiopian capital Addis Ababa and liberating it on April 6 1941. However, the conflict was still not over there was continued resistance from 7,000 Italian troops and air operations continued against them until their surrender in September 1941. The book includes the experiences of the men who flew the outdated aircraft of the RAF and the SAAF in the campaign and includes many quotes and incidents from both Allied and Italian pilots.
